SELECTED ACQUISITION REPORTS - HIGHLIGHTS
(As of March 31, 1987)

The Secretary of Defense released details of cost and schedule changes since the December 1986 reporting period on 95 major systems based on the Selected Acquisition Reports (SARs) submitted to the Congress for the March 31, 1987 reporting period.

SARs summarize the latest estimates of cost, schedule, and technical status on major defense systems. These reports are prepared annually (as of December 31) in conjunction with the President's budget for each covered program. After each subsequent calendar year quarter, reports are required only for those programs experiencing cost changes of at least five percent or schedule delays of at least six months.

The total program cost estimates provided in the SARs include research and development, procurement, and military construction. Total program costs reflect actual costs on delivered items as well as anticipated costs for future procurement which, in some instances, extend beyond the year 2000. All estimates include allowances for anticipated inflation.

The cost for one of the 95 programs, ASAS, is classified. The total current estimate of program acquisition costs for the remaining 94 major systems covered by SARs for the December 1986 reporting period was $790,383.4 million. Since the December 1986 quarter, one program, the Air Force's I-S/A AMPE, has experienced cost changes amounting to a net increase of $114.2 million. In addition, the Navy TOMAHAWK program is submitting a SAR for a schedule delay with no cost change. The cost changes between December 1986 and March 1987 are summarized below:

	Current Estimate ($ in Millions)
December 1986 (96 programs[1])	$ 810,152.6
Less three terminated SARs (F-14A[2] and KC-10A no longer meet SAR reporting thresholds and T-46A was canceled)	-19,769.2
December 1986 Adjusted (94 programs[1])	$ 790,383.4

[1] *Classified costs for ASAS are excluded.*

[2] *F-14A was previously reported with F-14D, which remains a SAR program.*

Changes Since Last Report:

Quantity	$	+26.6
Schedule		+21.3
Estimating		+55.4
Support		+10.9
Net Change		+114.2
March 1987 (94 programs)		**$ 790,497.6**

The increase of $114.2 million, or 0.01 percent, was due primarily to a quantity increase in the I-S/A AMPE program from 93 to 102 systems, a rephasing of its schedule due to a slippage in the design period, and a refinement of its estimated costs to reflect requiremements.
