Selected Acquisition Reports

as of September 30, 1985

The Secretary of Defense released the details of cost changes since last June on the 93 major systems covered by Selected Acquisition Reports (SARs) submitted to the Congress in accordance with title 10, United States Code. SARs summarize the latest estimates of cost, schedule, and technical status on major defense acquisition programs. These reports are prepared annually in conjunction with the President's budget for each covered program. After each subsequent calendar quarter, reports are submitted only for those programs experiencing changes in cost of at least five percent or at least a three month delay in any SAR schedule milestone since the last report.

The total program cost estimates provided in SARs include research and development, procurement, and military construction. Total program costs reflect actual costs on delivered items as well as anticipated costs for future procurement, which in some instances, extend well into the 1990s. All estimates include allowances for anticipated inflation.

The total current estimate for the 93 major acquisition programs covered by SARs for the June 30, 1985 quarter was $781.8 billion. Since the June quarter, 13 programs have experienced changes requiring a SAR. Eight of the 13 programs have cost changes amounting to a total net decrease of $3.2 billion. The current estimate of program acquisition cost as of September 30, 1985 for the 93 major acquisition programs is $778.6 billion. The cost changes between June 30 and September 30 are summarized below:

| | Current Estimate ($ in millions) |
|---|---|
| June 1985 (93 SAR programs)* | $ 781,793.1 |
| September 1985 (93 SAR programs)* | $ 778,563.4 |
| Net Changes | $ -3,229.7 |
| Reasons for Change: | |
| Economic | $ -85.7 |
| Quantity | -1,256.2 |
| Schedule | -405.8 |
| Engineering | -89.7 |
| Estimating | -894.4 |
| Support | -497.9 |
| Total | $ -3,229.7 |

* *These totals exclude the ASAS cost estimate which is classified.*

Details of the most significant changes by program are provided below:

ARMY

SGT YORK GUN - Program costs decreased $2,456.0 million (-54.9 percent), from $4,470.3 million to $2,014.3 million, due to the Secretary of Defense decision to terminate the acquisition of the program immediately.

AIR FORCE

AMRAAM - Program costs decreased $792.6 million (-8.4 percent), from $9,438.8 million to $8,646.2 million, due primarily to incorporation of producibility initiatives resulting in outyear cost savings ($-373.7 million), reestimates of warranty costs ($-156.6 million), cancellation of a classified project ($-171.0 million), and the use of contractor maintenance support until completion of production ($-71.7 million). The current estimate represents the Air Force's best estimate to execute the restructured program. These costs are under review and will not be final until approved by the Secretary of Defense in 1986.

I-S/A AMPE - Program costs decreased $247.7 million (-29.9 percent), from $829.5 million to $581.8 million, due primarily to reduced costs by using a single contractor rather then two prime contractors for development ($-166.1 million), reestimate based on actual design phase contract award experience ($-78.1 million), and reestimate of construction costs based on site surveys ($-28.6 million).

WIS - Program costs increased $283.4 million (+13.8 percent), from $2,059.9 million to $2,343.3 million, due primarily to identifying funding requirements for follow-on development effort and for site-specific hardware beyond the five year program.

DISTRIBUTION OF COST CHANGES BETWEEN DEVELOPMENT ESTIMATES AND CURRENT ESTIMATE
BY CATEGORY OF CHANGE
AS OF SEPT 30, 85
