SELECTED ACQUISITION REPORTS - HIGHLIGHTS
(AS OF JUNE 30, 1986)

The Secretary of Defense released details of cost and schedule changes since the December 1985 reporting period on 95 major systems based on the Selected Acquisition Reports (SARs) submitted to the Congress for the June 30, 1986 reporting period. SARs summarize the latest estimates of cost, schedule, and technical status on major defense programs. These reports are prepared annually (as of December 31) in conjunction with the President's budget for each covered program. After each subsequent calendar year quarter, reports are required only for those programs experiencing cost changes of at least five percent or schedule delays of at least three months.

The total program cost estimates provided in the SARs include research and development, procurement, and military construction. Total program costs reflect actual costs on delivered items as well as anticipated costs for future procurement, which in some instances, extend into the 1990s. All estimates include allowances for anticipated inflation.

There were no quarterly SARs submitted for the March 31, 1986 reporting period. The total current estimate for the 95 major systems covered by SARs for the December 1985 reporting period was $763,940.6 million. This includes the correction of an error in the SAR Summary Tables for the V-22 (JVX) program. The cost reflected in the December 31, 1985 SAR Summary Tables for this program was overstated by $499.9 million from the correct cost reported in the actual SAR. Since the December 1985 quarter, six programs have experienced cost changes amounting to a net decrease of $323.0 million. In addition, the Microwave Landing System (MLS) is submitting a June SAR for a schedule delay with no cost change. Therefore, the total current estimate for the 95 major systems as of June 30, 1986 is $763,617.6 million. The cost changes between December 1985 and June 1986 are summarized below:

	Current Estimate ($ in Millions)
December 1985 (88 programs*)	$ 732,276.6
Correction of overstatement in V-22 (JVX) costs	-499.9
Plus eight new SAR programs (LHX, MSE, MK-48, SH-60F, (CELV, CSRL, SMALL ICBM, SRAM II)	+36,281.6
Less one terminated SAR (ALCM program will no longer report since expenditures greater than 90%)	-4,117.7
December 1985 Adjusted (95 programs*)	763,940.6

June 1986 (95 programs*)	763,617.6
Net Change	-323.0

Reasons for Change:

Economic	+8.0
Quantity	-315.3
Schedule	+30.8
Engineering	+23.6
Estimating	-21.3
Support	-48.8
Other	0.0
Total	$ -323.0

**Classified costs for ASAS are excluded.*

Program acquisition costs for the 95 programs decreased $323.0 million, or 0.04 percent. The decrease was primarily attributed to the cancellation of the Precision Location Strike System (PLSS) production program ($-374.2 million) and the revised estimates for I-S/A AMPE ($-31.0 million). However, this decrease was partially offset by an increase in the estimated costs for SFW ($+71.3 million). A SAR was submitted for this program because the baseline is being changed from a planning estimate to a development estimate, reflecting transition from advanced development to full-scale development. Three other SARs for the C-17A, DSCS III, and MK 50 programs reported minor cost and schedule changes.

DISTRIBUTION OF COST CHANGES BETWEEN DEVELOPMENT ESTIMATES AND CURRENT ESTIMATE

a/ Escalation associated with program changes estimated from the base year of the program involved. The escalation related to each program and the cost of the program change in base year dollars make up the cost of the program change in then-year dollars (the actual or current cost of the change).

DISTRIBUTION OF COST CHANGES BETWEEN DEVELOPMENT ESTIMATES AND CURRENT ESTIMATE
BY CATEGORY OF CHANGE
AS OF June 30, 1986
($ In Millions)
