SELECTED ACQUISITION REPORTS - HIGHLIGHTS

(As of September 30, 1987)

The Secretary of Defense released details of cost and schedule changes since the June 1987 reporting period on 97 major systems based on the Selected Acquisition Reports (SARs) submitted to the Congress for the September 30, 1987 reporting period. Included are SARs on 95 programs that have been reported previously and two additional reports being submitted for the first time.

SARs summarize the latest estimates of cost, schedule, and technical status on major defense systems. These reports are prepared annually (as of December 31) in conjunction with the President's budget for each covered program. After each subsequent calendar year quarter, reports are required only for those programs experiencing cost changes of at least five percent or schedule delays of at least six months.

The program cost estimates provided in the SARs generally include research and development, procurement, and military construction. Program costs reflect actual costs on delivered items as well as anticipated costs for future procurement which, in some instances, extend beyond the year 2000. All estimates include allowances for anticipated inflation.

The cost for one of the 95 programs, ASAS, is classified. The total current estimate of program acquisition costs for the remaining 94 major systems covered by SARs for the June 1987 reporting period was $823,988.5 million. Since the June 1987 quarter, nine programs have experienced cost changes amounting to a net decrease of $202.3 million. The cost changes between June and September 1987 are summarized below:

	Current Estimate ($ in Millions)
June 1987 (94 programs[1/])	**$ 823,988.5**
Changes Since Last Report:	
Economic	$ +0.9
Quantity	+214.9
Schedule	-26.0
Engineering	+50.3
Estimating	-341.4
Support	-101.0
Net Cost Variance	-202.3
September 1987 (94 programs[1/])	**$ 823,786.2**

[1/] *Classified costs for ASAS are excluded.*

The cost variance decrease of $202.3 million, or 0.02 percent, was due primarily to a downward revision in the estimated costs for the Army's SINCGARS program ($-482.6 million). This decrease was partially offset by an increase in the Air Force's IUS (Inertial Upper Stage) program ($+273.9 million), mostly because of the planned acquisition of four additional booster vehicles. Seven other programs (FFG-7, CIS, DSP, MLS, SFW, SRAM II, and WIS) experienced minor cost changes as shown in the succeeding tables.

The ADDS and AN/SQQ-89 programs submitted SARs as a result of schedule delays with no cost changes. Final reports were submitted for PERSHING II and FFG-7, since the programs are 90 percent complete thereby meeting the statutory requirement for termination of reporting.

New Reports
(As of September 30, 1987)

The Secretary of Defense released new SARs on two additional programs in accordance with section 2432, title 10, United States Code. These reports do not represent cost growth. Baselines established on these programs will be the point from which future changes will be measured. The current cost estimates are provided below:

Program	Current Estimate ($ in Millions)
HFAJ (High Frequency Anti-Jam)	$ 4,540.3
LSD-41 CARGO VARIANT	1,651.3
Total	$ 6,191.6
