SELECTED ACQUISITION REPORTS - HIGHLIGHTS

(As of September 30, 1993)

The Department of Defense has released details on major defense acquisition program cost and schedule changes since the June 1993 reporting period. This information is based on the Selected Acquisition Reports (SARs) submitted to the Congress for the September 30, 1993 reporting period.

SARs summarize the latest estimates of cost, schedule, and technical status. These reports are prepared annually in conjunction with the President's budget. Subsequent quarterly exception reports are required only for those programs experiencing unit cost increases of at least 15 percent or schedule delays of at least six months.

The total program cost estimates provided in the SARs include research and development, procurement, and military construction. Total program costs reflect actual costs on delivered items as well as anticipated costs for future acquisitions. All estimates include allowances for anticipated inflation.

The current estimate of program acquisition costs for programs covered by SARs for the prior reporting period (June 1993) was $813,503.4 million. There was a net increase of $ for the current reporting period (September 1993). The cost changes reported between June 1993 and September 1993 are summarized below:

	Current Estimate ($ in Millions)
June 1993 (91 programs*)	**$813,503.4**
Changes Since Last Report:	
Economic	$ 0.0
Quantity	0.0
Schedule	0.0
Engineering	0.0
Estimating	+231.4
Other	0.0
Support	-129.0
Net Cost Change	$ +102.4
September 1993 (91 programs*)	**$813,605.8**

* Excludes the Air Force MILSTAR program due to classified costs.

There were four quarterly SARs submitted for the September 1993 reporting period:

CSSCS (Combat Service Support Control System) -- The SAR was submitted because of a schedule delay of more than six months. Specifically, the start of Initial Operational Test & Evaluation (IOT&E) was moved from August 1993 to July 1994 in order to conduct a Limited User Test and permit the completion of operational test requirements prior to the start of IOT&E. There were no cost changes reported for the program.

MSE -- This is the final SAR. Since the MSE program is more than 90 percent complete, Selected Acquisition Reporting can be terminated in accordance Section 2432, Title 10, United States Code.

SADARM -- The SAR was submitted because of a schedule delay of more than six months. Due to a submunition reliability problem, the program was restructured and extended 27 months. There were no cost changes reported in this SAR. The cost of the restructured program is under review and will be reported in the December 1993 SAR.

C-17A -- The SAR was submitted because of schedule delays of more than six months. Initial Operational Capability (IOC) slipped 13 months from December 1994 to January 1995; the completion of IOT&E slipped 9 months from June 1994 to March 1995; and Full Operational Capability (FOC) slipped 22 months from July 2001 to May 2003. Program costs increased $97.4 million (0.2%) from $39,476.1 million to $39,573.5 million, due primarily to funding Lot III to the contract ceiling.
