Department of Defense
Selected Acquisition Reports
As of March 31, 1983

Selected Acquisition Reports (SARs) summarize the latest estimates of cost, schedule, and technical status of major defense acquisition programs. The reports are prepared for each individual program in accordance with the provisions of section 139a, title 10, United States Code. These reports are prepared annually in conjunction with the President's budget for each covered program. After each subsequent calendar quarter, reports are submitted only for those programs experiencing changes in cost, schedule or performance.

The total program cost estimates provided in SARS include research and development, procurement, and military construction. Total program costs reflect actual costs on delivered items as well as anticipated costs for future procurement, which in some instances extend into the 1990s. All estimates include allowances for anticipated inflation.

The annual Selected Acquisition Reports for the 53 major acquisition programs provided for December 31, 1982, reflected a total current $539,740.6 million. Since those 53 reports were submitted, 21 programs have experienced changes including cost increases or decreases amounting to a total net decrease of $1,384.0 million. The cost changes between the December 31, 1982, and March 31, 1983, reports are summarized below:

	Current Estimate ($ Millions)
December 31, 1982, Total 53 Programs	$539,740.6
Changes in Continuing SARs:	
Economic Changes	+ 100.2
Schedule Changes	+ 973.1
Engineering Changes	- 198.9
Estimating Changes	-2,379.4
Support Changes	+ 121.0
	-1,384.0
March 31, 1983, Total 53 Programs	$538,356.6

No program experienced a net increase of more than 0.4 percent or a net decrease of more than 1.5 percent. The most significant cost changes this quarter are summarized below:

UNCLASSIFIED

F-15 - The F-15 program decreased $596.5 million (1.4%). The net reduction is due to a correction in the application of the December 1982 inflation rates for procurement ($-783.4 million) and by a reestimate of countermeasures dispenser cost ($+186.9 million). In addition, there are net $0 adjustments to correct the cost change categorizations displayed in the December 1982 SAR. These adjustments are comprised of support corrections ($+108.6 million), schedule corrections ($+686.3 million), engineering corrections ($-188.4 million), and estimating corrections ($-606.5 million).

F-16 - The F-16 program decreased $660.7 million (1.5%). The net reduction was primarily caused by a correction in the application of the December 1982 SAR inflation rates ($-661.6 million) offset by a slight increase in support costs.

M1 ABRAMS TANK - M1 Abrams Tank program cost decreased by $41.8 million (0.002%) primarily due to actual contract cost being lower than planned. In addition, the 2 year production stretch was improperly shown as an estimating change in the December SAR . Correction results in a schedule increase of $270.2 million with offsetting estimating and support reductions of $261.3 million and $8.9 million respectively.

PHOENIX - The Phoenix program decreased $50.2 million (1.19%). The decrease is due primarily to the correction of an error in reporting advanced procurement funds ($-50.0 million) in the last procurement year.

HELLFIRE - The HELLFIRE program increased $0.4 million (0.02%) only for construction of five ammunition storage bunkers. However, correction of an improper application of inflation indices in the December SAR has resulted in an increase of $97.5 million dollars in the inflation component of the total program cost which was exactly offset by an estimating reduction of the same amount. This correction merely reconciles program constant dollars and escalated dollars and has no impact on program cost.
