MEMORANDUM FOR CONFERENCE ATTENDEES

SUBJECT: OUSD(AT&L) Enterprise Information Policy and DAMIR-AV SOA  
Training Conference

I am pleased to welcome you to the OUSD(AT&L) Enterprise Information Policy and DAMIR-AV SOA Training Conference.

Two years ago, many of you attended the successful DAMIR conference at Ft. Belvoir that introduced DAMIR 3.0. Since then, DAMIR has acquired new capabilities and we have retired the legacy CARS. During this conference you will have many opportunities to explore the full scope of DAMIR's enhanced capabilities.

In addition to DAMIR, this year's conference will include an introduction of a new capability for data availability and governance encompassed by our AV SOA initiative. AV SOA separates data governance and availability from tools such as DAMIR and Kaleidoscope that use the data. For users, this represents a new environment where reliable, consistent and timely data is transparently available to authorized users, irrespective of the tools employed.

Thanks for sharing your valuable time to attend the conference. I hope you find it professionally rewarding and that you enjoy your stay in Charleston.

A handwritten signature in blue ink that reads "Nancy L. Spruill".
