**REPORT TO CONGRESS ON
DEPARTMENT OF DEFENSE
FISCAL YEAR 2012 PURCHASES
FROM FOREIGN ENTITIES**

Office of the Under Secretary of Defense for
Acquisition, Technology, and Logistics

May 2013

The estimated cost of report or study for the Department of Defense is approximately \$7,440 for the 2013 Fiscal Year. This includes \$5 in expenses and \$7,435 in DoD labor.
Cost estimate generated on May 2, 2013 RefID: A-F363AE8

Background.

Pursuant to section 8305 of title 41, United States Code, this is the required report on Department of Defense (DoD) purchases from foreign entities in FY 2012. The report is to separately indicate the dollar value of items for which the Buy American Act (BAA) was waived pursuant to any reciprocal defense procurement memorandum of understanding (MOU), the Trade Agreements Act (TAA) of 1979, or any international agreement to which the United States is a party.

Discussion.

The information contained in this report is based on FY 2012 contract data from the Federal Procurement Data System – Next Generation (FPDS-NG) and data compiled and distributed by the DoD Defense Manpower Data Center, Statistical Analysis Information Division. The FPDS-NG data addresses contracting procedures, competition, financing, statutory requirements, socioeconomic programs, and other information relating to DoD acquisitions. The data was then certified by the Military Departments and Defense Agencies.

Section 1 – All procurements from foreign entities

DoD procurement actions recorded and certified in FPDS-NG during FY 2012 totaled approximately \$360 billion. Of that amount, approximately \$22 billion or 6.1 percent was expended on purchases from foreign entities. A detailed breakout of the dollars by country is contained in Table 1.

The \$22 billion covers military hardware, subsistence, fuel, construction, services, and other miscellaneous items. Defense equipment constitutes approximately 10 percent of the purchases from foreign entities. Fuel, services, construction, and subsistence account for approximately 77 percent of the total purchases from foreign entities. The remaining 13 percent of the purchases cover a variety of categories. Table 2 provides a breakout of the \$22 billion by category and percentage of the total.

Section 2 – Dollar value of manufactured articles for which the restrictions of the BAA were not applied pursuant to MOUs, the TAA, or other international agreements

The restrictions of the BAA were not applied to 36,036 DoD purchases totaling \$12.5 billion due to waivers, authorized exceptions, and inapplicability. The breakout of these purchases is as follows:

- The total authorized *wavers* pursuant to MOUs, the TAA, or other international agreements represented 4,634 purchases totaling approximately \$1.1 billion.

- The total authorized *exceptions* to the BAA represented 4,691 purchases for approximately \$.8 billion. These exceptions provided in the law include: (1) manufactured outside the United States – Resale; (2) manufactured outside the United States – Commercial Information Technology; (3) manufactured outside the United States – Public Interest Determinations; (4) manufactured outside the United States – Determination made based on Domestic Non-Availability; and (5) manufactured outside the United States – Unreasonable Cost of Domestic End Product.
- The remaining 27,625 purchases totaling approximately \$10.6 billion represent those for which the restrictions of the BAA *are not applicable* because they are for items manufactured and used outside the United States.

Table 3 provides a detailed breakout of the actions and dollars by category and an explanation of the authority for each of the categories.
