**Press Release  
June 2012**

## **Defense Finance & Accounting Service (DFAS) Electronic Data Interchange (EDI) Team**

The DFAS EDI Team includes Anthony Cross, Nancy Harrison, and Susan Oldaker. This team has been instrumental in the development, testing, coordination, and implementation of a number of critical interfaces between DoD Component contracting systems and the Mechanization of Contract Administration Service (MOCAS) system. The DFAS EDI Team also reviews production operations to identify, diagnose, and correct production-processing problems. Once testing is done the Team analyzes production processing to identify viable systems improvements in application response, usability, flexibility, and data integrity.

The systems the DFAS EDI Team has worked with include Army's PADDs and GFEBs, Navy's ITIMP, Air Force's CONWRITE, Defense Logistics Agency's eProcurement, and the Standard Procurement System, which is used by most Components. Additionally, the team has completed mapping and unit testing of 24 additional Component lines of accounting to MOCAS. In 2011 alone the DFAS EDI Team tested with and for the Marine Corps, DCMA, DARPA, Washington Headquarters Service, Missile Defense Agency, NAVSEA, SPS Global Navy, Navy ERP End-to-End processes for MOCAS, MDO 2.0, eProcurement, Federal Procurement Data System, EDI transfer of PCO office, PGI payment instructions, and foreign currency. Without each of the DFAS Columbus EDI team member there would be none of the critical interfaces to MOCAS. Their work has provided significant benefit to the Department.
