- SA FIPT Membership
- SA FIPT Working Group

Training
Recommendations

Functional Domain Experts (FDE)

Services Portfolio Groups

- Knowledge Based Services
- Transportation Services
- Logistics Management Services
- Electronics and Communication Services
- Medical Services
- Facilities Related Services

Requirements Development Partnership

- Meeting on 28 May to discuss partnership opportunities for training with
 - ALU, OSC Course Director, Bill Latham
 - J4, Lee Tate
 - OCS Plans & Programs, ODASD(PS) Anna Carter
 - Army Services, Stephanie Lopez
 - Army G4, Randy Lewis, Dan Mathews
 - DPAP, Contingency contracting, Bill Reich
 - HCI - invited

Requirements Development Partnership

- Basic requirements development training at ALU has broader application we may be able to build on.
- Joint Staff and ODASD Program Support have initiated broadening this capability to multi-service applicability
- Partnership allows us to leverage additional training source for services audience.

Requirements Development Partnership

- SA will work with HCI to acquire additional instructors, increase training capability.
 - *What is our steady state? How many people do we need to train? How frequently do they need to be trained?*
- The topics and sample scenarios taught in the class are entirely appropriate for OCS but
 - *Is there a difference in the educational training requirement for A&AS vs logistics services vs medical services?*
 - Example: feedback from early SAWs was that PWS for grass cutting was too simple, not representative of the actual services

Service Acquisition FIPT

Working Group Report to FIPT:

- **QUESTION** On training documentation
 - Is it possible to standardize documenting SA training in personnel records? To quantify who needs training?
 - Discuss how your organization/Service documents and tracks training and if you think it could translate to DoD. (Are lists maintained by region? Are they accessible to commands?)
- **ANSWER** from representatives
 - Each provided brief explanations about how their organizations handle tracking certifications
 - Significant discussion on training capacity for DAU, the military departments and agencies.
 - The majority indicated a desire to work with current systems and leave control of information at the Service/agency level.

Service Acquisition FIPT

Working Group Report to FIPT:

- QUESTION on training documentation by non-government entities
 - Are there possible third party options for documenting training? (Recommendations on possible suitability for DoD application.)
 - Are there other options (not covered by third party and DoD) for tracking certifications and training received outside of the service or agency?
- ANSWER
 - Options included commercial off the shelf (COTS) software and every organization accomplished this task differently
 - Some members favor centralized management of training/tracking for services acquisition teams,
 - Also a discussion that decentralizing management of training allows better access to and management of limited resources.

Service Acquisition FIPT

Other Discussion Topics?

Goals for next meeting & direction for the WG

Date for next FIPT – July?
