## OVERVIEW

### REPORTING REQUEST

This report responds to Senate Report 110-85, the report accompanying the Military Construction, Veterans Affairs, and Related Agencies Appropriations Bill, 2008, which states in part:

#### Operation and Maintenance Funds

The Committee has noted a significant increase in the number of above-threshold notifications under 10 U.S.C. 2811 Authority for the use of “Operation and Maintenance” [O&M] funds to undertake extensive repairs and renovation of military facilities that could appropriately be funded through the military construction appropriation. The Committee reminds the Department that the intent of the \$7,500,000 threshold for congressional notification of repair projects using O&M funds is to ensure that the O&M accounts are not being used as billpayers to inflate the Services’ military construction budgets. The O&M accounts fund a wide range of “must-pay” operational requirements, whereas the military construction accounts are reserved solely for facilities. The Committee therefore believes that in most cases, military construction funding is the appropriate source of funds for major construction efforts, including extensive repair and renovations, and urges the Services to budget accordingly. The Committee further directs the Department to provide consolidated quarterly reports to the congressional defense committees detailing all facility repair projects carried out during that quarter using over \$750,000 in operation and maintenance funds. The reports shall be due no later than 30 days after the end of each fiscal-year quarter, with the initial report due by March 1, 2008.

### SUMMARY

This report consolidates all project data for FY 2008. During FY 2008, the Department undertook 1,641 facility repair projects costing more than \$750,000 of Operation and Maintenance funds at a total cost of \$4,279,642,000. The following tables summarize these projects.

	No. of projects	Total cost (\$M)		Cost (\$M)
Dept. of Army	707	\$ 1,978	Average (mean) cost	\$ 2.61
Dept. of Navy	353	\$ 1,030	Average (median) cost	\$ 1.57
Dept. of Air Force	581	\$ 1,271	Maximum cost	\$ 138.40
DoD total	1,641	\$ 4,280		

The projects are listed individually in the table on the following pages.
