**Department of Defense  
Base Structure Report (BSR)  
FY 2005 Baseline**

## **I. INTRODUCTION**

The Base Structure Report represents a consolidated summary of the Services' native real property inventories to provide an overall look at the physical infrastructure that makes up the Department of Defense. This report has been published annually since 1999 and is used for many functions both internal and external to the Department. Every September, the Services provide a comprehensive database of their real property inventory to the Office of the Deputy Under Secretary of Defense for Installations and Environment. This data is then compiled into the Facilities Assessments Database (FAD) for use in providing a comprehensive listing of installations and sites owned and used by the Department. For each site large enough to be individually listed in the report, a summary of facilities, square footage, a Plant Replacement Value and personnel are provided. Other pertinent information such as the name of the nearest city are included.

The Department of Defense is one of the world's largest "landlords" with a physical plant consisting of more than 571,900 facilities (buildings, structures and utilities) located on more than 3,740 sites, on nearly 30 million acres. Those sites range in size from small, unoccupied locations supporting an Air Force navigational aid on less than one-half acre to the Army's White Sands Missile Range in New Mexico with over 2.3 million acres. Sites can be as small as the Marine Corps Barracks in Washington, DC with just a handful of buildings on less than five acres or as large as the Navy's complex of installations at Norfolk, Virginia with more than 70,000 employees on over 7,300 acres. With this vast array of assets, some summarization is required to effectively present usable material in a single, manageable document. The criteria for inclusion in this report, explained in detail in Section III, uses a minimum acreage and Plant Replacement Value threshold as a means of summation.

## **II. PORTFOLIO SUMMARY**

The real property portfolio managed by the Department of Defense represents large amounts of real property in both the United States and around the world. While over 79% of the 3,748 DoD sites are located in the United States or U.S. Territories, the majority of the foreign sites are located in three countries; Germany (302 sites), Japan (111 sites), and South Korea (106 sites). The remaining 251 overseas sites are dispersed among 36 other foreign countries.

Overall, the real property inventory is classified as buildings, structures, utilities, or land. Facility classification is derived from DoD's Real Property Classification System (RPCS) developed by ODUSD(I&E). The RPCS serves as the framework for identifying, categorizing, and analyzing the Department's land and facilities around the world. Changes in the inventory count from last year's Base Structure Report are primarily the result of facilities being recategorized. For example, some facilities previously categorized as structures have now been recategorized as buildings. In total, over 61% of all DoD's real property records are categorized as buildings, approximately 28% are reported as structures, and the remaining 11% are classified as utilities (this excludes land records and facilities classified as "Miscellaneous Component of Other Facility" or "Not Real Property"). Examples of facilities classified as structures include roads, runways, bridges, flag poles, covered outdoor storage areas and railroad tracks. Communications lines, electrical distribution lines, and sewage treatment facilities are examples of utilities. Those facilities classified as "Miscellaneous Component of Other Facility" or "Not Real Property" include such items as fire alarm systems, sprinkler systems, and air conditioning

**Department of Defense  
Base Structure Report (BSR)  
FY 2005 Baseline**

window units.

The reported Plant Replacement Value (PRV) of DoD's inventory, which is the cost to replace these facilities using today's construction costs and standards is approximately \$658 billion - \$426 billion for buildings, \$150 billion for structures, and \$82 billion for utilities. An additional PRV of \$142 million was reported by Washington Headquarters Service (WHS) which could not be classified according to the RPCS. Over 81% of the DoD portfolio's PRV is located in the United States or its territories.

Of the 29.8 million acres of land used by the Department of Defense, 98% of the acreage is located in the United States or U.S. Territories.

The table below summarizes the real property that make up the DoD portfolio for the fiscal year 2005 baseline, data collected as of September 30, 2004.

	Number of Buildings	Bldg SqFt (K)	Number of Structures	Number of Utilities	Total Buildings Structures, Utilities	Acres	PRV (\$M)
United States	283,547	1,950,706	120,482	49,985	454,014	29,031,672	\$ 514,483.5
Territories	7,486	30,839	3,077	2,022	12,585	111,329	\$ 18,793.9
Foreign	56,933	412,300	35,551	12,882	105,366	676,491	\$ 124,761.7
Total	347,966	2,393,845	159,110	64,889	571,965	29,819,492	\$ 658,039.1

**Table 1: Overview of Federally DoD Real Property holdings.**

**Department of Defense  
Base Structure Report (BSR)  
FY 2005 Baseline**

**Sites Profile**

DoD sites are located at all 50 States, 7 of the U.S. Territories, and 39 foreign locations. Figure 1 summarizes locations of DoD sites by Service and Agency.

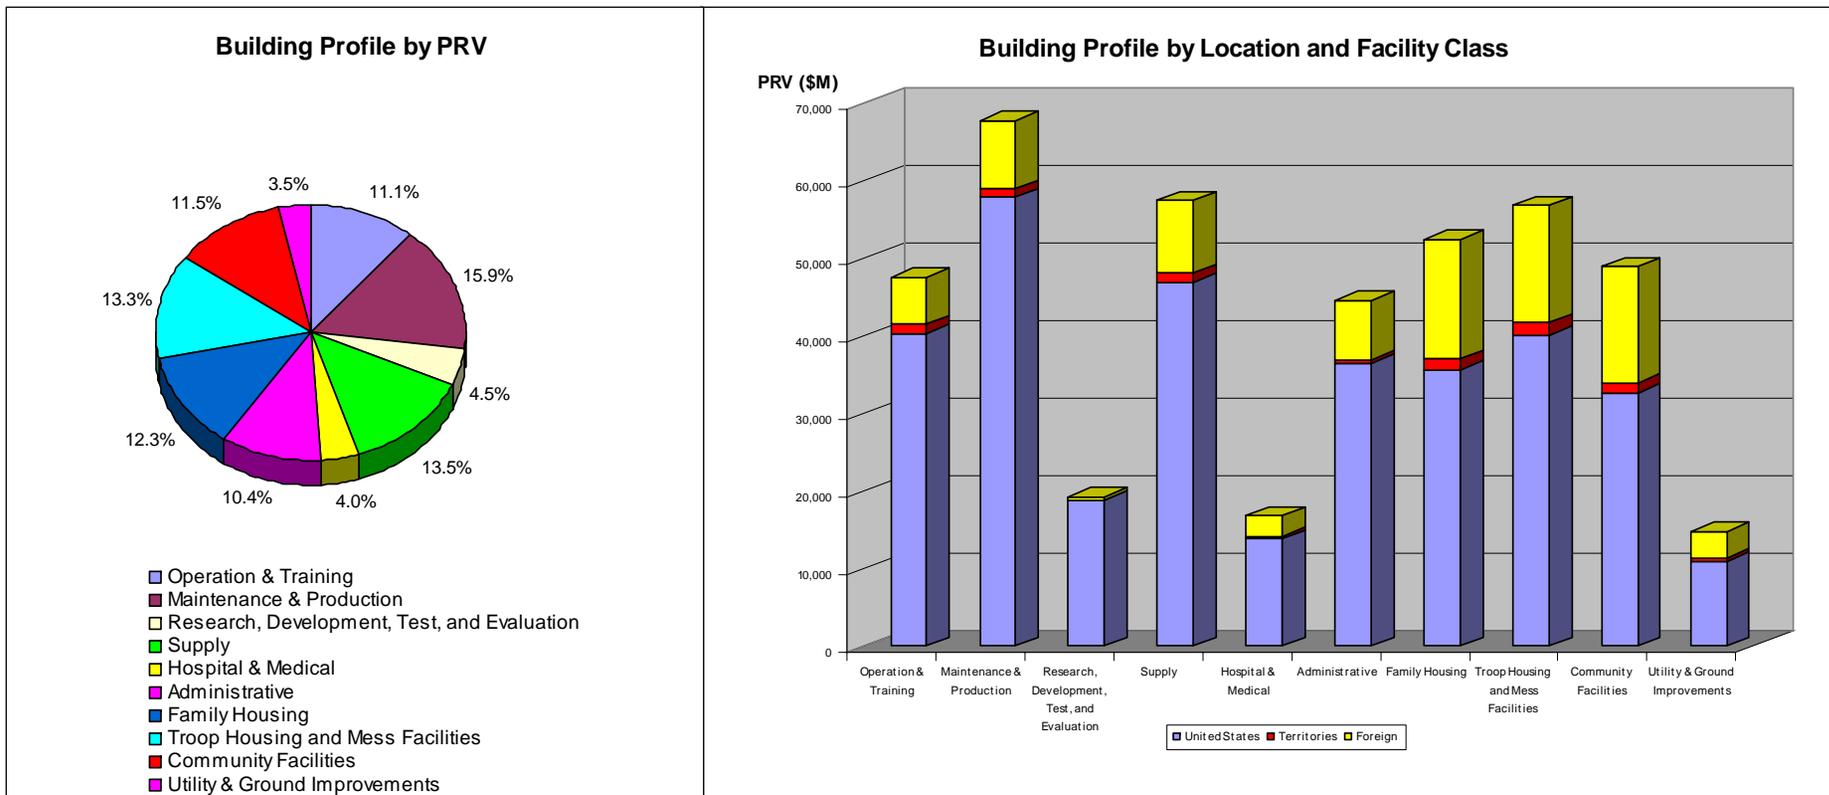

**Figure 1: Location of DoD Sites by Service/Agency.**

# Department of Defense Base Structure Report (BSR) FY 2005 Baseline

## Buildings Profile

DoD occupies a reported 347,966 buildings throughout the world, valued at over \$426 billion and comprising almost 2.4 billion square feet of building area. The RPCS Facility Classes driving the largest PRV costs are Maintenance and Production, Supply, and Troop Housing and Mess Facilities. About 82% of the buildings are located in the United States.

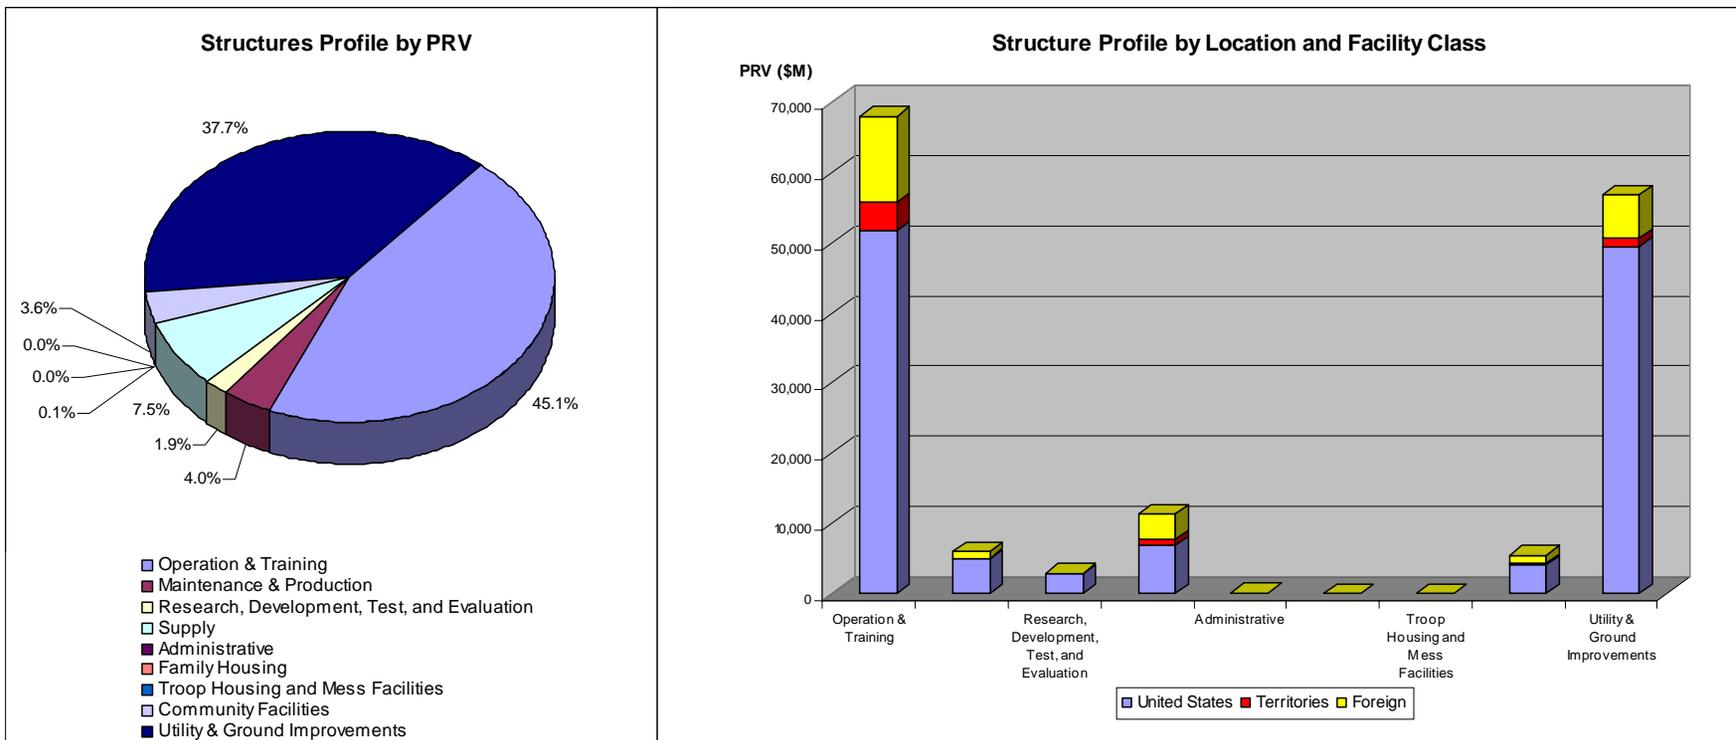

**Figure 2: Buildings Profile**

# Department of Defense Base Structure Report (BSR) FY 2005 Baseline

## Structures Profile

DoD uses a reported 159,110 structures throughout the world, valued at over \$149 billion. The RPCS Facility Classes driving the largest PRV costs are Operation and Training, and Utility and Grounds Improvements. Almost 80% (based on PRV) of the structures are located in the United States.

**Figure 3: Structures Profile**

# Department of Defense Base Structure Report (BSR) FY 2005 Baseline

## Utilities Profile

DoD manages a reported 64,889 utility facilities throughout the world, valued at over \$81.9 billion. Utility and Ground Improvements comprise 96.4% of the total Utilities Profile PRV costs.

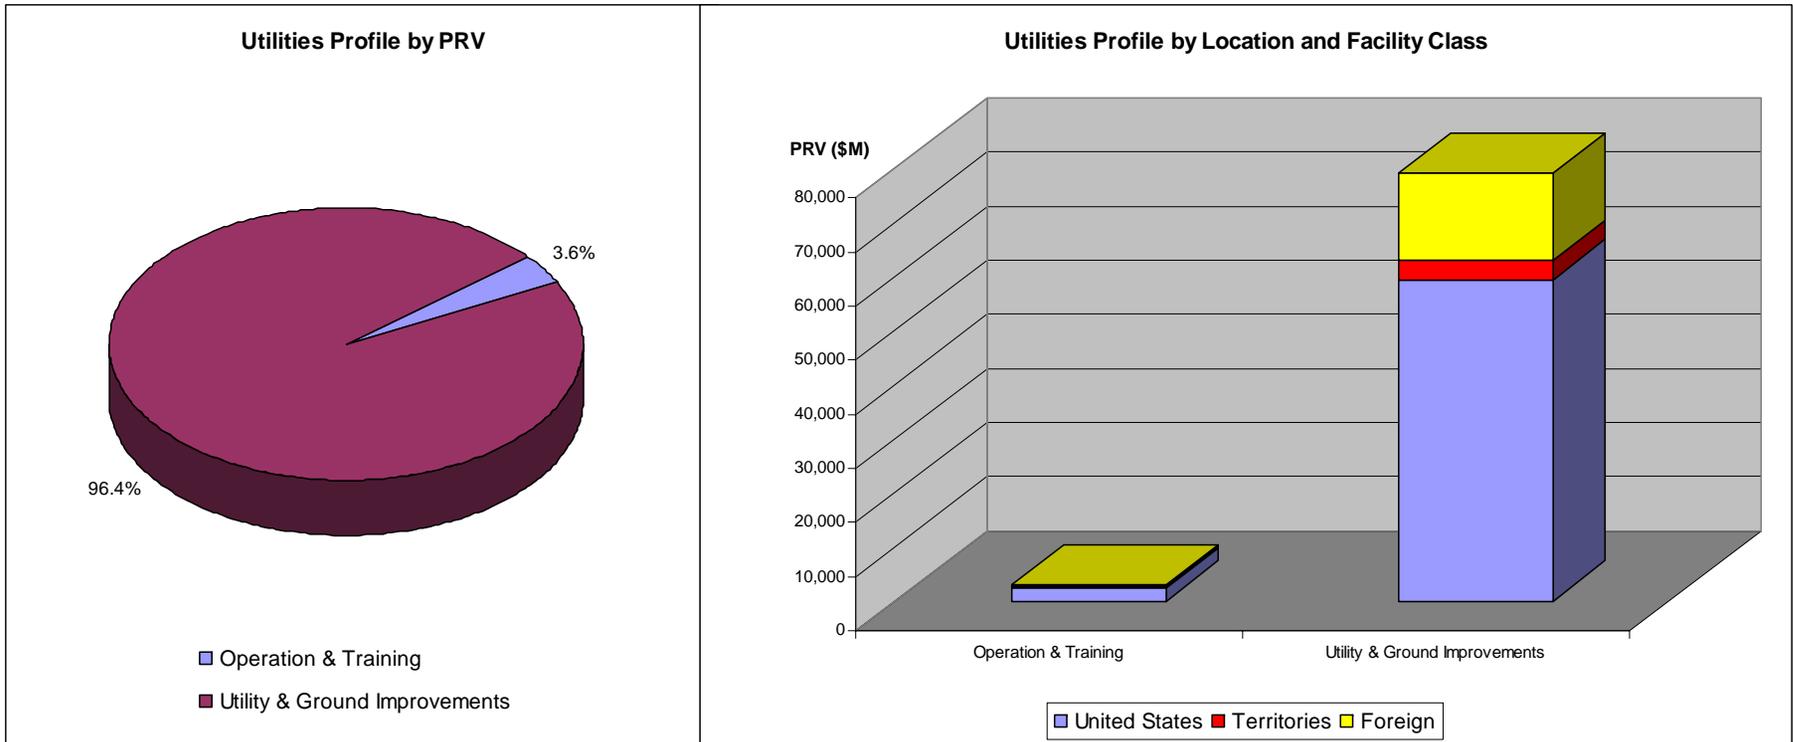

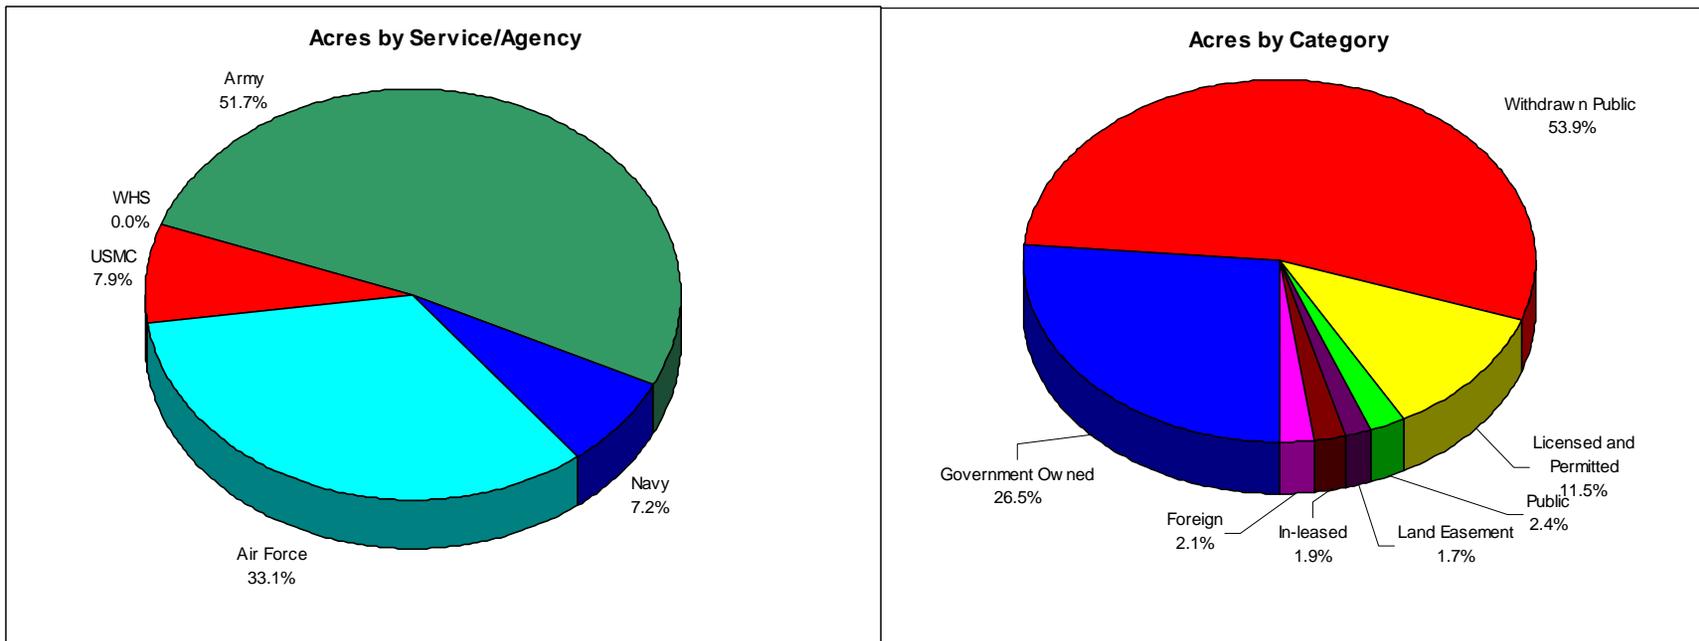

Figure 4: Utilities Profile

# Department of Defense Base Structure Report (BSR) FY 2005 Baseline

## Land Profile

DoD manages a reported 29.8 million acres of land worldwide. More than 98% of that land is located in the United States or U.S. Territories. The majority of land controlled by the Department (80%) is government owned or withdrawn public land. The Army controls the largest percentage of the Department's land - 52%. The Air Force manages the next largest portion of the total acreage at 33%. The Marine Corps acreage increased by 2% from last year, reported over 691,000 acres at MCAS Yuma Barry Goldwater Range. Washington Headquarters Service, which reports the Pentagon Reservation, owns 443 acres.

**Figure 5: Land Profile.**

**Department of Defense  
Base Structure Report (BSR)  
FY 2005 Baseline**

### **III. CONTENT AND ORGANIZATION**

It is important to note the following parameters for the content of this report:

- **Timeliness.** While the physical base structure may change throughout the year (new construction, demolitions, etc.), the BSR is a “snapshot” of the DoD’s physical plant, as reported on September 30, 2004. The bases listed may be in various stages of activity, including unused or awaiting disposal. Due to the legalities involved in transferring deeded property, individual Service inventories may still include a legal property record long after the decision has been made to transfer that asset to another organization. Likewise, ongoing additions to the base structure, including in-transfers, are often not officially recorded until well after the actual decision and occupancy has been finalized.

- **Mode of View.** For the purpose of this report, each entry is defined as a site at a specific location with a name and real property assets (see definition of a “site” in the next section). As an exception, Air Force strategic missile sites were rolled up to the appropriate one of seven parent installations. In the case of F. E. Warren AFB, this means that those missile sites located in Nebraska and Colorado were counted as part of the parent installation total for the state of Wyoming and are not shown in the totals for Nebraska or Colorado. However, Navy/Marine Corps Special Areas are shown as separate sites if the special area is NOT in the same city/state as the main activity (e.g, Outlying Landing Fields)

- **Display Criteria.** For practicality of use, this report includes specific information on sites meeting a predetermined size and value criteria (except for the Army National Guard State Installations in Section X). To qualify for entry in the published report, a site located in the United States must be larger than 10 acres **AND** have a Plant Replacement Value (PRV) greater than \$10 million. If the site is located in a foreign country, it must be larger than 10 acres **OR** have a Plant Replacement Value (PRV) greater than \$10 million to be shown as a separate entry. To preserve the comprehensiveness of the report, sites that do not meet these criteria are aggregated as an “Other” location within each state or country. For the Army National Guard State Installations, the criteria is slightly reduced to show approximately the same percentage of the total number of sites as shown in the rest of the report. State sites are shown if the site is larger than 5 acres **AND** has a Plant Replacement Value (PRV) greater than \$5 million. State sites not meeting this criteria are aggregated as “Other” for each state.

- **Personnel Data.** Personnel data is included as a means of showing magnitude of size and should not be construed as validated Military Department Manpower Data. Personnel data was collected from multiple sources, to include inputs from the individual Services personnel databases. Since personnel totals reflected in this report attempt to show all personnel regardless of Service affiliation assigned to individual sites or locations, totals should not be confused and viewed as representing only individual Service total strength. It is also possible that totals in this report may not reflect the actual population at a particular site. Detailed personnel questions should be addressed to the appropriate Service manpower or personnel offices.

The report is organized by State/Country and presented first as an overall DoD listing of all sites, then by each Military Service. Each record includes the site name, the component (Active, Guard, or Reserves), the name of the nearest city, the number of buildings

**Department of Defense  
Base Structure Report (BSR)  
FY 2005 Baseline**

owned and leased, total acres owned by the Services and the total acres used, the PRV (in \$ millions) and the authorized number of military, civilian, and other personnel (when available). The PRV represents the reported cost of replacing the facility and its supporting infrastructure using today's construction cost (labor and material for that particular area) and standards (methodologies and codes). Other personnel include any non-appropriated employees, government contractors (if identified) or foreign nationals performing work at the site.

#### **IV. DATA SOURCES AND DEFINITIONS**

The inventory data included in this report is extracted directly from the native Services' real property inventories; i.e., Army - HQ Army Integrated Facilities System (IFS), Navy and Marine Corps – Navy Facilities Assets Database (NFADB), and the Air Force's Real Property Asset (RPA) database. Washington Headquarters Service provided their real property inventory. This report does not attempt to replicate all the details included the source databases. Instead, this report provides a summary view of the Department's installations using common elements that should answer most questions. An explanation of criteria used for each column in the BSR is shown below:

- **SITE:** Indicates the installation or site name as used in the Services' databases. This is based on the Services' Installation Number (Army and Air Force), Unit Identification Code/Special Area Code (Navy and Marine Corps), or Site Code (Washington Headquarters Service).
- **COMPONENT:** Designates the primary component for the owner/reporter of a site or installation, either Active, Guard, or Reserve. For the Navy, this column designates those sites in caretaker status pending some type of further action. This action may be a pending closure or realignment, or the site could remain in caretaker status. This does not reflect any BRAC 2005 activity.
- **NAME NEAREST CITY:** Identifies the name of the nearest city of reasonable size as reported by the Services.
- **BUILDINGS:** A roofed, floored, and walled enclosed structure (of one or more levels) that is constructed over a plot of land and is suitable for any of a wide variety of activities, such as living, office and/or manufacturing spaces.
- **STRUCTURES:** A facility classified as other than a building or utility which is constructed on or in the land (e.g., roads, bridges, shelters, ranges).
- **UTILITIES:** A distribution system that provides a common service or commodity to one or more building or structure (e.g., communications lines, electrical power distribution, sewage treatment).

**Important Note on Buildings Information:** Buildings and acreage are classified according to the DoD Real Property Classification System (RPCS) Facility Type in lieu of the Services' classification. Square footage amounts are normalized by applying

**Department of Defense  
Base Structure Report (BSR)  
FY 2005 Baseline**

RPCS size limits to each facility according to its RPCS classification. Building sizes exceeding the size limit are reset to the median size based on its facility classification, unless the reported data has been validated by the Service. State Owned building/square footage is applicable to Army National Guard State Installations only.

- **BLDGS OWNED:** Represents the number of buildings owned by the Service at the particular site or installation. It does not include licensed or permitted facilities, State-owned National Guard facilities, or facilities provided by other nations at foreign locations.
- **BLDGS OWNED SQFT:** Reflects the normalized RPCS building square footage for the buildings identified as owned.
- **BLDGS STATE OWNED:** Represents the number of buildings that are owned by the State in which the particular site or installation is located.
- **BLDGS STATE OWNED SQFT:** Reflects the normalized RPCS building square footage for the buildings identified as State.
- **BLDGS LEASED:** Identifies the number of buildings leased and reported by the Services in their inventories.
- **BLDGS LEASED SQFT:** Reflects the normalized RPCS building square footage for the buildings identified as leased in the Services' databases.
- **TOTAL ACRES:** Identifies the total number of acres owned, used by, or leased to the DoD. It includes public land, state land, land owned by other federal agencies, and acreage of foreign soil used by DoD sites.
- **PRV (\$M):** Total Plant Replacement Value (PRV) for all facilities (buildings, structures, and utilities) included in the Services RPI databases. This reported value is the cost to replace the current physical plant (facilities and supporting infrastructure) using today's construction costs (labor and materials) and standards (methodologies and codes). The PRV represents the Service-calculated value adjusted for facilities that exceeded the RPCS size limit; for instance, the PRV is reduced by the proportional reduction of the facility size.

**Important Note on Personnel Data:** Each Service does not maintain their personnel data to relate directly to their Real Property Information. Every effort was made to match the personnel strengths to the appropriate site. The population outlined in the report

may not reflect the actual population of the site. Detailed personnel questions should be addressed to the appropriate Service manpower or personnel offices. This information is provided only to project a level of magnitude when comparing sites.

- **MIL:** Identifies all known military personnel authorized for the site or installation. Includes Active Duty, Guard, and Reserve

**Department of Defense  
Base Structure Report (BSR)  
FY 2005 Baseline**

personnel, regardless of Service affiliation.

- **CIV:** Identifies all known DoD civilian personnel authorized for the site or installation, regardless of Service affiliation. Note: civilian numbers for the Navy represent assigned personnel not authorized.
- **OTHER:** Identifies all known other civilian personnel authorized for the site or installation, including personnel paid from Non-appropriated Funds (NAF), Foreign Nationals (direct hire) at foreign locations, and, if available, any full-time contractor personnel, regardless of Service affiliation.
- **TOTAL:** Sum of MIL, CIV, and OTHER personnel columns.

## **V. SUMMARY OF CHANGES FOR THE FY05 BASELINE REPORT**

- **Method on rolling Navy and Marine Corp sites**
  - Navy/Marine Corps Special Areas, previous separated by Special Area, are now separated ONLY if the special area is NOT in the same city/state as the Main Activity.
  - There are a few notable exceptions to the above rule. Some special areas were not combined even though they are in the same area because the sites are known to be geographically distinct. For example, the main naval activity of “Naval Support Activity, Washington DC” has special areas for the “Naval Observatory”, the “Southeast Federal Center”, and “Bolling AFB” among others. Each was maintained as a separate site even though they satisfied the first criteria of being in the same city/state because they are known to be geographically distinct from one another.
- **Enhanced the section summarizing DoD’s real property inventory portfolio.**
  - Applied RPCS business rules to categorize facilities as a building, structure, or utilities. Changes in the inventory count from last year’s Base Structure Report are primarily the result of facilities being recategorized.
  - Added a separate Structures and Utilities profile.

## **VI. CONCLUSION**

The Base Structure Report is designed to provide the reader with a snapshot view of the vast real property inventory maintained by today’s Department of Defense. Our physical infrastructure provides the framework upon which America’s military readiness is built. As we see more of our troops relocate from overseas bases to existing location within the United States, we will see this report change over the next several years. The Department’s vision for transformation will also soon be reflected in this report. Our Defense Installations Strategic Plan challenges the Department to develop and field the “Right Tools and Metrics” for understanding and managing the vast Department of Defense base structure. This document is but one of the tools that have been developed to support that effort. It provides the ability to view the basic elements of our sites and facilities quickly and concisely, which is a valuable tool

**Department of Defense
