

Department of Defense

SUPPLY SYSTEM INVENTORY REPORT

September 30, 1997

FOREWORD

The ***Department of Defense (DoD) Supply System Inventory Report*** is an annual publication. It provides summary statistics on the status of DoD supply system inventories. The report summarizes, by dollar value, inventories by DoD Component and materiel category.

The Departments of the Army, Navy, and Air Force, United States Marine Corps, and Defense Logistics Agency are required to submit reports. The Marine Corps submission is processed by the Department of the Navy.

Commodities in this publication are grouped into two categories for comparison purposes - "Principal Items" and "Secondary Items." Principal items are primarily composed of major systems and weapons, but not complete aircraft, ships, tanks, other combat and tactical vehicles, ICBMs, intermediate range ballistic missiles, or space vehicles. Secondary items are defined as consumable and repairable items other than principal items, including parts and assemblies which support principal items, and other consumables, such as food, medical items, and fuel, which do not support principal items.

DoD Regulation 4140.1-R, *DoD Materiel Management*, has replaced DoD Instruction 4140.18 and contains guidance and definitions for this report.

NOTE: Beginning with fiscal year (FY) 1991, inventory was valued under the standard DoD valuation methodology issued under the direction of the DoD Comptroller. All inventory was valued at latest acquisition cost; the value for reparable items requiring repair was reduced by the cost of repair; and inventory stratified as "Potential DoD Reutilization/Disposal" was valued at salvage prices (2.2% of latest acquisition cost for FY 1991, 2.3% for FY 1992, 2.04% for FY 1993, 2.0% for FY 1994, 2.5% for FY 1995, 3.2% for FY 1996, and 2.7% for FY 1997).

a/ See Note on the FOREWORD page.

b/ Figures may not add to totals due to rounding.

c/ Approved Force Retention Stock was deleted as a category effective September 30, 1991.

Data has been consolidated into this category.

d/ This category, formerly titled Unstratified Assets, was renamed effective September 30, 1991.

e/ Numeric Retention Stock was deleted as a category effective September 30, 1991.

Data has been consolidated into this category.

f/ Total includes reductions in inventory value for materiel in need of repair and inventory with decreased market prices.

g/ Total includes reductions in inventory value for materiel in need of repair, and Potential Reutilization/Disposal Stock is reduced to market prices for surplus usable property sold by the Defense Reutilization and Marketing Service. This is calculated under the DoD Comptroller's latest acquisition cost methodology mandated for all DoD annual reports and financial statements.

* Less than \$100 million

a/ See Note on FOREWORD page.

b/ Figures may not add to totals due to rounding.

c/ Approved Force Retention Stock was deleted as a category effective September 30, 1991.

Data has been consolidated into this category.

d/ This category, formerly titled Unstratified Assets, was renamed effective September 30, 1991.

e/ Numeric Retention Stock was deleted as a category effective September 30, 1991. Data has been consolidated into this category.

f/ Army inadvertently omitted munitions & related equipment valued at \$12+ billion dollars. The \$12+ billion dollars are not included.

g/ DoD 4140.1-R, "DoD Materiel Management," dated January 1993, no longer requires principal items to be broken out by retention category, since principal items are not part of the DoD stratification process.

h/ The reduction in value from 1991 to 1992 reflects the removal of whole tanks and helicopters from the principal item value. Prior to 1987, tanks and helicopters in the repair cycle were included in this report. From 1987 to 1991, all tanks and helicopters were included. The policy as of January 1993 is not to include tanks or helicopters, since major weapon systems are reported elsewhere and are not part of the supply system inventory for any Service.

GLOSSARY

Active Inventory: Materiel which is expected to be consumed within the budget year (2 years) and materiel that has been purchased to meet specific war reserve requirements.

Approved Acquisition Objective (AAO). The quantity of an item authorized for peacetime and wartime requirements to equip and sustain U.S. and Allied Forces in accordance with current DoD policies and plans. This quantity shall be sufficient to support other U.S. Government Agencies, as appropriate.

War Reserve Materiel. Mission essential secondary items; principal and end items computed as part of the acquisition process; and munitions authorized for sustainability planning in Secretary of Defense planning guidance. In the SSIR, secondary items classified as War Reserve Materiel are shown as a memo entry subset of the Approved Acquisition Objective.

In Transit Assets. Assets defined as “In Transit” represent materiel that is between storage locations, either wholesale or retail; materiel shipped from vendors after acceptance by the government but not yet received by the inventory manager; materiel temporarily in-use or on loan with contractors or schools; or materiel which cannot be otherwise categorized. In transit assets are not included in the records of wholesale inventory used in the stratification process. They are recorded in financial inventory accounting records or in retail inventories.

Inactive Inventory: Materiel that is not expected to be consumed within the budget period but is likely to be utilized in future years.

Economic Retention Stock. That portion of the quantity of an item greater than the AAO determined to be more economical to retain for future peacetime issues than to dispose and satisfy projected future requirements through new procurement and/or repair. To warrant economic retention, items must have a reasonably predictable demand rate.

Contingency Retention Stock. That portion of the quantity of an item greater than the AAO and economic retention stock for which there is no predictable demand or quantifiable requirement, and that normally would be allocated as Potential Reutilization Stock except for a determination that the quantity will be retained for specific contingencies.

Potential Security Assistance Materiel. Materiel held for the potential of foreign military sales. It is a memo entry subset of Contingency Retention Stock.

Potential Reutilization/Disposal Materiel: (1) Component materiel identified by an item manager for possible disposal but with potential for reutilization; or (2) materiel that has the potential for being sent by an item manager to the Defense Reutilization and Marketing Service for; (a) possible reutilization by another Component or by a Federal, state, or local government agency; or (b) disposal through sale to the public.

Excess: Materiel that has completed reutilization screening within the DoD and is not required for the needs and the discharge of responsibilities of any activity.

Secondary Items: Consumable and repairable items other than principal items.

Principal Items: End items and replacement assemblies of such importance that management techniques require centralized individual item management throughout the supply system to include items stocked at depot level, base level, and using unit level. Specifically, these include items of which, in the judgment of the Military Services, there is a need for central inventory control, including centralized computation of requirements, central direction of distribution, and central knowledge and control of all assets owned by the Military Services. Principal items normally will be selected on the basis of their essential requirement for combat or training, high monetary value, difficulty of procurement or production, or criticality of basic materials or components.
