

DEPARTMENT OF DEFENSE  
PHYSICAL SECURITY EQUIPMENT ACTION GROUP

## VISION STATEMENT

To be the Department of Defense's (DoD) premier Research, Development, Testing & Evaluation (RDT&E) provider to warfighter organizations to mitigate physical security vulnerabilities and close identified capability gaps; serve as the catalyst for developing, demonstrating and evaluating interoperable solutions for DoD-wide capability requirements; and will work in close collaboration with other government agencies to achieve and sustain interoperability.

## MISSION STATEMENT

Harmonize physical security materiel requirements to develop, demonstrate and evaluate emerging interoperable RDT&E solutions. Focus on closing DoD-wide capability gaps through investments resulting in programs of record, technology insertions, or commercial-off-the-shelf solutions. Leverage solutions across nuclear and conventional physical security environments as well as counter nuclear threats.
