

In Executive Order 13514 of October 5, 2009, Federal Leadership in Environmental, Energy, and Economic Performance, the President set a goal of reducing petroleum use in the Federal fleet. In order to provide guidance to executive departments and agencies (agencies) to help achieve the Administration's Federal fleet performance goals, and to ensure that agencies are in compliance with Executive Order 13514, the President directed in part the following:

Pursuant to motor vehicle management regulations, set forth at 41 C.F.R. 102-34.50, executive fleets are required to achieve maximum fuel efficiency; be limited in motor vehicle body size, engine size, and optional equipment to what is essential to meet agency mission; and be midsize or smaller sedans, except where larger sedans are essential to the agency mission. Within 180 days of the date of this memorandum, any executive fleet vehicles that are larger than a midsize sedan or do not comply with alternative fueled vehicle requirements must be disclosed on agency websites.

In compliance with the above requirement, DSS has identified the inventory of one (1) fleet vehicle, which meets the description of executive vehicles that are larger than a midsize sedan or do not comply with alternative fueled vehicle requirements, thus disclosing to the public the required information.

Executive Fleet Summary Report Defense Agencies - FY2012

<u>Fleet</u>	<u>Vehicle (Year Make Model)</u>	<u>Fuel Type</u>	<u>Qty</u>
DCMA	Light Duty SUV 4X2	E85 FF	1
DLA	Light Duty SUV 4X4	E85 FF	1
