

DoD Systems Engineering Plan (SEP) Guidance

The DoD Systems Engineering Plan Preparation Guide (Version 2.01, April 2008) has been replaced by the Systems Engineering Plan Outline (Version 1.0, April 20, 2011).

The SEP Outline was formally released over PDUSD(AT&L) signature as an "Expected Business Practice" for immediate implementation. This streamlined SEP has been developed as one of the process streamlining initiatives under Dr. Carter's "Better Buying Power" initiative. The intent in revising the SEP is to make the document more effective, more data driven and more directly useful to programs in execution. The SEP Outline represents the minimal set of content and format expected in the SEP - local practice may extend this format if desired as long as the minimal set of material outlined remains intact.

DASD(SE) staff members are available to work with programs that are initiating a new SEP or revising an existing SEP in anticipation of a milestone review. Contact them at sep@osd.mil
