**OpCentric Plug-and-Play Satellite-1 (PnPSat-1)
Software Demonstration After Action Report**

**Grant K. Holcomb
ATK Launch Systems**

Abstract:

On Thursday, January 7, 2010, the OpCentric™ software development team from ATK Launch Systems (Promontory, Utah) successfully demonstrated its advanced Plug-and-Play software technology running on the Plug-and-Play Satellite (PnPSat) hardware built and maintained by the Air Force Research Laboratory (AFRL) at Kirtland AFB. The Director and staff of the Office of Operationally Responsive Space (ORS) were present along with numerous AFRL personnel (over 25 AFRL/ORS personnel attended). This brief will discuss the after action report following the software demonstration.
