

NDIA HSI-SE Committee

Mission

- Develop a Government and Industry partnership to effectively integrate Human Systems Integration (HSI) in the DoD acquisition process to improve overall system performance and decrease total ownership lifecycle costs.

Strategic Goals

- Establish and promote a common understanding of HSI
- Advocate for the continued integration of HSI in acquisition efforts
- Establish a means to share HSI knowledge, methods and best practices
- Address common HSI gap areas
- Standardize on use of language

Objectives

- Grow our HSI community of practice to share knowledge, methods & tools, and collaborate with other committees and industry/academia groups
- Implement HSI uniformly, per DoDI5000.02, Enclosure 8 for best value HSI design & development solutions
- Leverage the best of HSI best practices and technology use from government, industry and academia to close gap areas and position HSI for the future

Meetings

- Co-chairs: Elaine Thorpe and Matthew Risser
- Quarterly HSI meetings (contact Elaine Thorpe, elaine.m.thorpe@boeing.com)
- HSI track at annual SE Division Meetings
