DEPARTMENT OF ENERGY**48 CFR Parts 904, 952 and 970**

RIN 1991-AB85

Acquisition Regulation: Access to and Ownership of Records

AGENCY: Department of Energy.

ACTION: Final rule.

SUMMARY: The Department of Energy (DOE) is publishing a final rule amending the Department of Energy Acquisition Regulation (DEAR) to ensure the access to and ownership of records generated during contract performance for its contractors and subcontractors performing potentially hazardous work and clarifies management, retention and disposal of records after contract termination. This final rule: Ensures that records generated on individuals that meet the requirements of the Privacy Act are operated and maintained as Privacy Act SORs; clarifies that Privacy Act SORs are Government-owned records, not contractor-owned, even though they are created by the contractor; ensures the inclusion of this clause in contracts where work activities could involve exposure to potentially hazardous substances; and, ensures that DOE has consistent records maintenance, retention, and disposal requirements in accordance with Federal laws, regulations and DOE Directives and updates thereto.

DATES: *Effective Date:* October 20, 2014.

I. Background

Historically, DOE's Management and Operating (M&O) contractors were tasked with performing functions that could involve exposure to radioactive and other hazardous materials. Because of the possible long-term effects of exposure, DOE contractors and subcontractors must create and maintain records documenting the potentially hazardous work activities performed by their personnel. For example, the *Occupational Radiation Protection* program at 10 Code of Federal Regulations (CFR) Part 835 and the *Chronic Beryllium Disease Prevention Program* at 10 CFR Part 850 both require the creation, maintenance and disposition of records on contractor and subcontractor personnel. These records include, but are not limited to: Certain personnel records, medical, and occupational safety and health records. DOE's M&O contractors already provide for DOE ownership and/or access to these types of records. However, DOE now also utilizes other types of contracts to perform many agency functions. Therefore, DOE is making this revised clause applicable to both M&O as well as non-M&O contracts and subcontracts to ensure that records are managed and retained in accordance with Federal laws (including the Privacy Act), applicable regulations and DOE requirements. To provide relevant information for processing of claims under the Energy Employees Occupational Illness Compensation Program Act (EEOICPA; 42 U.S.C. 7385s-10) and for other similar issues, DOE must ensure government-ownership of not only records documenting agency functions, but records documenting potential exposure to hazardous substances. These records are needed for processing claims and provide documentation that otherwise

protects the financial and legal obligations of both individuals and the Government. These records include, but are not limited to: Personnel, medical and exposure records listed as privacy act systems of records, facility, environmental and other project related records, as well as, occupational safety and health records. Personnel records are also needed to allow DOE to identify and contact individuals in the future for participation in the DOE Federal Worker Medical Screening Program (FWP), to comply with other, future records requests, and to meet the requirement to retain the records in accordance with Federal laws and regulations.

The National Archives and Records Administration's (NARA) regulation at 36 Code of Regulations (CFR), Chapter XII, Subchapter B, “*Records Management*” requires agencies to ensure contractors performing agency functions create and maintain records that document these activities and specify government ownership of documents within the contract. For the Department of Energy, Title 42 U.S.C. 7101(b)(1) defines function as any duty, obligation, power, authority, responsibility, right, privilege and activity. Performance of those functions is defined in 42 U.S.C. 7101(b)(2). Throughout its history, DOE has been tasked by Congress to perform certain functions related to research, operations, and environmental clean-up that could cause potential exposure to hazardous substances.

On January 9, 2009, DOE published a System of Records Notice (SORN) in the **Federal Register** (74 FR 994) describing DOE's Privacy Act systems of records (SOR) in accordance with the Privacy Act of 1974 (5 U.S.C. 552a). For example, the SOR for EEOICPA files is located at DOE-10 (74 FR 1,008), and includes such records as: Employment records, exposure records, medical reports, personnel security questionnaires, safety records or other incident reports. The Personnel Medical Records SOR at DOE-33 (74 FR 1,302) includes the following types of records: Medical histories on contractor employees resulting from medical examination, medical records of periodic physical examinations and psychological testing, records on the results of workplace and medical monitoring of individuals for exposure to chemical and physical agents (not covered in DOE-35), and related work history data, including drug testing information and results, contractor employee-completed health questionnaires not resulting from a medical examination. Lastly, the Personnel Radiation Exposure Records
