# **Business Rules for Procurement Data Documents**

## ***Purpose of this Document***

The PDS standard format for procurement instruments is an XML Schema Definition (xsd) which can be used to generate an Extensible Markup Language (XML) document. While many of the rules regarding what and when data are required are part of the schema, others must be enforced by validations outside of the schema. This document provides the details about those validations or Business Rules (BR).

# Business Rules for Procurement Instrument Documents

## General Business Rules

1. Contract writing systems must be able to produce either a PDS XML document or a transaction that can be converted to the PDS format that meets all data and business rule requirements.
2. **The PDS XML document must contain all data and text included in the actual signed procurement instrument, except for form field names used on standard forms.**
3. In the Procurement Data Standard, the term “Clause” refers to both provisions and clauses.

## Compliance Business Rules – All Documents

### 1. Public Standards Compliance

Rule: Certain public standards need to be followed as part of the PDS business rules. These include enumeration lists for currency, country, etc. as published by a different authoritative source. Always provide names or descriptions of the entity and not the code unless directly specified. Details as follows:

- a. Currency: Follow the International Organization for Standardization (ISO) 4217 for providing currency details.  
[http://www.iso.org/iso/support/currency\\_codes\\_list-1.htm](http://www.iso.org/iso/support/currency_codes_list-1.htm)
- b. Country: Follow the International Organization for Standardization (ISO) 3166 for providing country names.  
[http://www.iso.org/iso/english\\_country\\_names\\_and\\_code\\_elements](http://www.iso.org/iso/english_country_names_and_code_elements)

### 2. Date, Time and Percentage Formats

Rule: For currencies, dates, times, and percentages, follow the following formats:

- a. Currency: Provide the textual name of the currency from ISO 4217 from the International Organization for Standardization (ISO).
- b. Date: All dates must be specified as ‘CCYY-MM-DD’ format unless otherwise specified in the annotation in the schema. ‘CCYY’ is the 4 digit year (including century), ‘MM’ is the 2 digit calendar month, and ‘DD’ is the 2 digit Day of the month. Example: 1988-05-22 indicates the 22<sup>nd</sup> day of May 1988.
- c. Time: Indicate “Time” using a 24 hour clock in ‘HH:MI:SS’ format. ‘HH’ is the hour, ‘MI’ is the minute and ‘SS’ is the seconds. Example: 21-59-03 indicates 57 seconds before 10 PM.
- d. Percentage: For all percentages, include the decimal point. For example, express ‘4.25%’ as ‘4.25’.

### 3. URL Address for Attachments
