MEMORANDUM FOR INFRASTRUCTURE STEERING GROUP (ISG) MEMBERS

SUBJECT: Coordination on Scenario Conflicts Proposed Resolutions

As agreed at the October 15, 2004, Infrastructure Steering Group meeting, the DASs were to brief only those scenarios for which they could not agree on a proposed resolution. Because the DAS’s review of the seventh batch of scenarios indicated there were no issues for in-person ISG deliberations, we will obtain your concurrence on the DAS’s newly proposed resolutions via paper.

The attached package includes all 518 scenarios registered in the tracking tool as of November 12, 2004. A summary of these scenarios, broken out by category (Independent, Enabling, Conflicting, Deleted, and Not Ready for Categorization) can be found at TAB 1. The section titled “New Conflicts Settled” includes new scenario conflicts on which the DASs and affected JCSGs agree regarding the proposed resolution (TAB 2).

TAB 3 represents the one contested conflict resolution for an E&T and Air Force scenario. Discussions regarding this issue are scheduled for the December 3, 2004, ISG meeting. Details of the remaining scenarios, by category (Old Conflicts Settled, Independent, Enabling, Deleted, and Not Ready for Categorization), are provided on a disc at TAB 4-8.

Request your written concurrence on the proposed resolutions (TAB 2) by close of business on Friday, December 3, 2004.

Scenario # HSA-0045 Date Created: 10/15/2004

Scenario Title: MAH-MAH-0001 (Dc): Consolidate Defense Information Systems Agency (DISA) Components within DC Area

Description:

Close 5 leased locations and realign 4 leased locations, Arlington Service Center (Navy), and Ft. Belvoir by consolidating components of DISA at Ft. Meade.

Justification/Impact:
- Consolidation of HQ locations from 11 to 1 eliminates redundancy and enhances efficiency.
- Encompasses 1.06 million GSF (or equivalent), as currently reported. Computed space required at 200 GSF/person = 754,200 GSF.
- Eliminates 581,000 USF of leased space within the DC Area (726,000 GSF equiv).
- 5 leased locations can be closed: approx. 555,000 USF.
- Affects 4,714 personnel, as currently reported. Scenario estimates a 20% personnel savings as a result of consolidation, or 943 positions.
- Enhances AT/FP
- Relocates major tenant from Arlington Service Center and allows Navy to consider closing that installation.
- Ft. Meade reports 28,755 GSF of vacant administrative space and sufficient land to accommodate 7.4 million GSF of new administrative space.
- Scenario does not consolidate the following locations: Anacostia Annex, Chambersburg, and Mechanicsburg.

Scenario # | HSA-0048 | Date Created: | 10/15/2004
Scenario Title: | MAH-MAH-0002 (Dc): Consolidate Missile Defense Agency (MDA) within DC Area

Description:

Realign 2 leased locations, close 7 leased locations, and facilitate disposal of Federal Office Building 2 (FOB 2) by consolidating MDA HQ and relocating at Ft. Meade.

Justification/Impact:
- Consolidation of MDA-controlled HQ locations from 10 to 1 eliminates redundancy and enhances efficiency.
- Encompasses nearly 600,000 GSF (or equivalent), as currently reported as MDA-controlled. Computed space required at 200 GSF/person=419,600 GSF.
- Eliminates over 248,000 USF of leased space within the DC Area.
- 7 leased locations can be closed: approx. 195,000 USF.
- Affects approximately 2,400 personnel, as currently reported. Scenario estimates a 14% personnel savings as a result of consolidation, or 341 positions.
- Enhances AT/FP.
- Relocates major tenant from FOB 2, which is projected to close in 2010+.
- Ft. Meade reports 28,755 GSF of vacant administrative space and sufficient land to accommodate 7.4 million GSF of new administrative space.

Scenario Title: | MAH-MAH-0012 (Dc): Create New Agency for Media and Publications

Description:

- Close 1 leased location in Alexandria, VA by co-locating the American Forces Information Service with the Defense Information School and the new DoD Media Activity at Ft. Meade.

Justification/Impact:
- Eliminates approximately 84,000 USF of leased space.
- Affects 608 personnel. Scenario estimates a 20% personnel savings for the media activities as a result of consolidation, or 78 positions, and a 10% savings for AFIS as a result of co-location, or 22 positions.
- Space required is approximately 101,600 GSF.
- Enhances AT/FP.
- Consolidation and co-location of organizations with like missions promotes “jointness” and creates opportunities for synergy.
- Consolidation and co-location of organizations facilitates possible consolidation of common support functions.
- Ft. Meade reports 28,755 GSF of vacant administrative space and sufficient land to accommodate 7.4 million GSF of new administrative space.

**Scenario Title:** | GC-DA-0003: [I] [Alt to HSA-0095] Consolidate DSS/CIFA At Fort Meade, MD (12 Oct 04)  
**Description:**

Realign leased space in Arlington and Alexandria, VA; Columbus, OH; Smyrna, GA, Long Beach, CA; Elkridge and Linthicum, MD, and Colorado Springs, CO, by disestablishing Defense Security Service and Defense Counterintelligence Field Activity (CIFA) and consolidating functions under a newly-created organization, e.g., DoD Counterintelligence and Security Agency, and relocating them to a new facility to be built on 526 acres of available administrative space at Fort Meade, MD. This is an HSA and Intel collaborative scenario; the HSA JCSG is Office of Primary Responsibility, Intel JCSG is the Office of Collatoral Responsibility. This is an alternate scenario to HSA-0095, which places this organization at Wright Patterson AFB, OH.

### Description:

Justification/Impact:
- Frees up 510,000 GSF close to Pentagon for other uses.
- Affects 2,293 personnel, as currently reported.
- Co-location of organizations facilitates possible consolidation of common support functions; applied a 10% personnel savings factor to the smallest organizations in this scenario, resulting in a forecast reduction of 141 positions.
- Computed space required at 200 GSF/person = 430,000 GSF.
- Navy NCIS needs upgraded HQ facility.
- Ft. Meade reports 28,755 GSF of vacant administrative space and sufficient land to accommodate 7.4 million GSF of new administrative space.
- Co-location of organizations with like missions promotes "jointness" and creates opportunities for synergy.

Realign Washington Navy Yard and 1 leased location in Alexandria, Virginia by co-locating USN Military Sealift Command (COMSC) and USA Surface Deployment and Distribution Command (SDDC) with existing SDDC offices at Ft. Eustis.

**Justification/Impact:**
- Eliminates 162,000 USF of leased space within the DC Area.
- Affects 959 personnel. Scenario estimates a 14% personnel savings for SDDC as a result of consolidation, or 74 positions, and a 7% personnel savings factor for COMSC as a result of co-location, or 30 positions.
- Space required is 171,000 GSF.
- Enhances AT/FP.
- Co-location of organizations with like missions promotes “jointness” and creates opportunities for synergy.
- Consolidation and co-location of organizations facilitates possible consolidation of common support functions.
- Ft. Eustis reports no vacant administrative space and sufficient land to accommodate 6 million GSF of new administrative space.

Abstract: The end state of this multi-action scenario will reduce the amount of leased space required in the National Capital Region (NCR) and create/expand Centers of Excellence for Battlefield Health and Trauma at Fort Sam Houston TX, Hyperbaric and Undersea Medicine at Groton CT, Infectious Disease at WRAMC-Forest Glenn Annex MD, and Medical Chemical Defense at APG-EA MD.

Narrative: This scenario realigns combat casualty care R&D activities, less neuroprotection, from Walter Reed Army Medical Center Forest Glen Annex in Silver Spring, MD (Walter Reed Army Institute of Research and Naval Medical Research Center), and disestablishes and relocates dental R&D activities currently at Great Lakes Naval Training Center (U.S. Army Dental and Trauma Research Detachment, Naval Dental and Biomedical Research Laboratory, Air Force Dental Investigative Service) to a Tri-Service Center of Excellence for Battlefield Health and Trauma at the U.S. Army Institute of Surgical Research at Brooke Army Medical Center, Fort Sam Houston TX.

The three units at Great Lakes will realign to BAMC-ISR in their entirety (~83 FTEs), and the following elements of the Naval Medical Research Center and Walter Reed Army Institute of Research will realign:
- NMRC's Combat Casualty Care and Resuscitative Medicine Directorate, including those FTEs for the Tissue Transplant program office currently in leased space, but excluding those in the Hyperbaric Medicine Department (NMRC total ~60 FTEs)
- All of WRAIR's Division of Military Trauma Research (~89 FTEs) and approximately 20 additional authorized Combat Casualty support positions from the Divisions of Veterinary Medicine, Pathology, Logistics and Biometrics (WRAIR total ~109 FTEs)

Since USASIAR's excess capacity is only 20 FTE's, if space is not available elsewhere within the BAMC facility, a MILCON project to accommodate a total of up to 232 personnel, including any associated increase in veterinary facilities, will be required as part of this scenario.

As part of this scenario, the NMRC Hyperbaric Medicine R&D program, including approximately 9 FTE's and associated unique equipment will relocate to Groton CT to consolidate with the Naval Submarine Medical Research Laboratory (NSMRL). This move assumes that a planned MILCON project for NSMRL, currently scheduled for 2012, will be accelerated and expanded to accommodate relocation of unique equipment from NMRC. It is assumed that no military animal facility support is required, as this support can be provided through an agreement with local industry or academic facilities.

Also, as part of this scenario, portions of the Division of Biochemistry and Medicine, WRAIR, which has historically been a major participant in the Medical Chemical Defense R&D program, will relocate to Aberdeen Proving Ground –Edgewood Area to consolidate with the U.S. Army Medical Research Institute of Chemical Defense to occupy excess capacity. (~31 FTEs)

In order to optimally utilize capacity at the NMRC-WRAIR complex at Forest Glen Annex, the following organizational elements, currently located within leased space in the National Capital Region, will be relocated to the Forest Glen Annex:
- The Division of Retrovirology, WRAIR (~146 FTEs)
- The vaccine research program of the NMRC Biological Defense Research Directorate (~24 FTEs). An alternative site for these personnel would be Fort Detrick, MD, but such a move would require accelerated recapitalization and expansion of the U.S. Army Medical Research Institute of Infectious Diseases and a relocation to Fort Detrick of the entire NMRC Biological Defense Directorate (~60 FTEs), as well as consideration of relocation of biodefense efforts of the WRAIR to Fort Detrick.

Assumptions:
- A planned MILCON project for NSMRL, currently scheduled for 2012, will be accelerated and expanded to accommodate relocation of unique equipment from NMRC.
- UICs for leased space in NCR are the same as the parent organization.
- Excess space, or land for a MILCON, for up to 232 people is available in or adjacent to Brooke Army Medical Center.
- Definitions of TBRCEs are aligned at the sub-DTAP level and associated FTEs and Equipment must be confirmed.

Action list:
- Creation of TBRCE for Battlefield Health and Trauma moves relevant assets of the following activities to 48399, Fort Sam Houston, TX, for collocation with W03SAA, U.S. Army Institute of Surgical Research.
  - Defense agency: None
  - Army activities:
    - Division of Military Trauma Research and associated support personnel, Walter Reed Army Institute of Research, WRAMC, Silver Spring MD, W03KAA
    - Army Dental and Trauma Detachment, Great Lakes Naval Training Station, IL, W03K05
  - Air Force activities:
    - Air Force Dental Investigative Service, Great Lakes Naval Training Station, IL

Registered Scenarios

Navy activity:
- Naval Institute of Dental and Biomedical Research, Great Lakes NTS, IL, N65786
- Combat Casualty Care and Resuscitative Medicine Directorate, including those FTEs for the Tissue Transplant program office currently in leased space, but excluding those in the Hyperbaric Medicine Department, NAVMEDRSCHCEN BETHESDA, Silver Spring, MD, N32398

Exclusions:
- All personnel and assets of the listed units not performing functions within the defined scope of the defined TBRCE.
- Neuroprotection research will remain at Forest Glen Annex.
- Hyperbaric Medicine Department of NMRC will be realigned to the Hyperbaric and Undersea Medicine TBRCE, instead of the Battlefield Health and Trauma TBRCE.

Creation of TBRCE for Hyperbaric and Undersea Medicine moves relevant assets of the following activities to N00129, Naval Submarine Base New London, Groton CT, for collocation with N66596, NAVSUBMEDRSCHLAB NEW LONDON.

Scenario Title: Consolidate SLCs at MCB Quantico

Description:

Realign Carlisle Barracks, PA; Maxwell Air Force Base, AL; Naval Station Newport, RI; Marine Corps Base Quantico, VA; and Fort McNair, Washington D.C. by moving the United States Army War College, Air War College, College of Naval Warfare, National War College, and the Industrial College of the Armed Forces to Marine Corps base Quantico, VA. Consolidate the United States Army War College, Air War College, College of Naval Warfare, Marine Corps War College, National War College, and the Industrial College of the Armed Forces as a single school under the National Defense University.

Senior level education will be provided a single Department of Defense School under the National Defense University. The consolidated school will maintain educational tracks focusing on Land Warfare, Maritime Warfare, Air Warfare, and Expeditionary Warfare. The scenario will disestablish all individual Service senior level education. The curriculum will be controlled by the Chairman of the Joint Chiefs of Staff. Joint Forces Staff College will remain a separate source of Joint Professional Military Education Level II for Joint Specialty Officers.

Scenario Title: MAH-MAH-0043 (Alt to MAH-0007); Co-locate MILDEP Investigation Agencies

Description:

Justification/Impact:
- Frees up 510,000 GSF close to Pentagon for other uses.
- Affects 2,293 personnel, as currently reported.
- Co-location of organizations facilitates possible consolidation of common support functions; applied a 10% personnel savings factor to the smallest organizations in this scenario, resulting in a forecast reduction of 141 positions.
- Computed space required at 200 GSF/person = 430,000 GSF.
- Navy NCIS needs upgraded HQ facility.
- MCB Quantico reports 61,436 GSF of vacant administrative space and sufficient land to accommodate 3.4 million GSF of new administrative space.
- Co-location of organizations with like missions promotes “jointness” and creates opportunities for synergy.

Scenario Title: | MAH-MAH-0011 (I): Co-locate MILDEP and DoD Medical Activities

Description:
Close 1 and realign 5 leased locations in the DC Area and realign Bolling AFB and Potomac Annex by co-locating the following medical entities at Walter Reed Army Medical Center (WRAMC): Tricare Management Agency, AF Medical Support Agency, USA Office of the Surgeon General (includes USA Medical Command (DC Area offices)), and Navy Bureau of Medicine (BUMED).

Justification/Impact:
- Eliminates 168,000 USF of leased space within the DC Area.
- Affects 1,589 personnel.
- Enhances AT/FP.
- Co-location of organizations with like missions promotes “jointness” and creates opportunities for synergy.
- Co-location of organizations facilitates possible consolidation of common support functions; applied a 7% personnel savings factor to the smallest organizations in this scenario, resulting in a forecast reduction of 71 positions.
- Space required is approximately 303,600 GSF.
- Relocates major tenant from Potomac Annex and allows Navy to consider closing that installation.
- Space is expected to become available at WRAMC as a result of other BRAC actions.

-Eliminates 939,000 USF of regular leased space within the DC Area, plus over 900,000 equiv GSF in Pentagon Renovation space.
-9 leased locations can be closed, including Pentagon Renovation buildings: approx. 1.26 million USF.
-Affects 3,208 personnel in regular space plus provides space for an estimated 5,000 personnel potentially affected by the Pentagon Renovation overflow, as currently reported.
-Scenario estimates a 20% personnel savings for WHS as a result of consolidation, or 61 positions, and a 7% factor for all other entities except OSD as a result of co-location, or 109 positions.
-Enhances AT/FP.
-Consolidation of HQ location with sub-components eliminates redundancy and enhances efficiency.
-Space is expected to become available at WRAMC as a result of other BRAC actions.

Scenario Title: Create Tri-Service Biomedical Research Centers of Excellence

Description:

Abstract: The end state of this multi-action scenario will reduce the amount of leased space required in the National Capital Region (NCR) and create/expand Centers of Excellence for Battlefield Health and Trauma at Fort Sam Houston TX, Hyperbaric and Undersea Medicine at Groton CT, Infectious Disease at WRAMC-Flint Annex MD, and Medical Chemical Defense at APG-EA MD.

Narrative: This scenario realigns combat casualty care R&D activities, less neuroprotection, from Walter Reed Army Medical Center Forest Glen Annex in Silver Spring, MD (Walter Reed Army Institute of Research and Naval Medical Research Center), and disestablishes and relocates dental R&D activities currently at Great Lakes Naval Training Center (U.S. Army Dental and Trauma Research Detachment, Naval Dental and Biomedical Research Laboratory, Air Force Dental Investigative Service) to a Tri-Service Center of Excellence for Battlefield Health and Trauma at the U.S. Army Institute of Surgical Research at Brooke Army Medical Center, Fort Sam Houston TX.

The three units at Great Lakes will realign to BAMC-ISR in their entirety (~83 FTEs), and the following elements of the Naval Medical Research Center and Walter Reed Army Institute of Research will realign:
- NMRC's Combat Casualty Care and Resuscitative Medicine Directorate, including those FTEs for the Tissue Transplant program office currently in leased space, but excluding those in the Hyperbaric Medicine Department (NMRC total ~60 FTEs)
- All of WRAIR's Division of Military Trauma Research (~89 FTEs) and approximately 20 additional authorized Combat Casualty support positions from the Divisions of Veterinary Medicine, Pathology, Logistics, and Biometrics (WRAIR total ~109 FTEs)

Since USAISR's excess capacity is only 20 FTE's, if space is not available elsewhere within the BAMC facility, a MILCON project to accommodate a total of up to 232 personnel, including any associated increase in veterinary facilities, will be required as part of this scenario.

As part of this scenario, the NMRC Hyperbaric Medicine R&D program, including approximately 9 FTE's and associated unique equipment will relocate to Groton CT to consolidate with the Naval Submarine Medical Research Laboratory (NSMRL). This move assumes that a planned MILCON project for NSMRL, currently scheduled for 2012, will be accelerated and expanded to accommodate relocation of unique equipment from NMRC. It is assumed that no military animal facility support is required, as this support can be provided through an agreement with local industry or academic facilities.

Also, as part of this scenario, portions of the Division of Biochemistry and Medicine, WRAIR, which has historically been a major participant in the Medical Chemical Defense R&D program, will relocate to Aberdeen Proving Ground –Edgewood Area to consolidate with the U.S. Army Medical Research Institute of Chemical Defense to occupy excess capacity. (~31 FTEs)

In order to optimally utilize capacity at the NMRC-WRAIR complex at Forest Glen Annex, the following organizational elements, currently located within leased space in the National Capital Region, will be relocated to the Forest Glen Annex:
- The Division of Retrovirology, WRAIR (~146 FTEs)
- The vaccine research program of the NMRC Biological Defense Research Directorate (~24 FTEs). An alternative site for these personnel would be Fort Detrick, MD, but such a move would require accelerated recapitalization and expansion of the U.S. Army Medical Research Institute of Infectious Diseases and a relocation to Fort Detrick of the entire NMRC Biological Defense Directorate (~60 FTEs), as well as consideration of relocation of biodefense efforts of the WRAIR to Fort Detrick.

Assumptions:
- A planned MILCON project for NSMRL, currently scheduled for 2012, will be accelerated and expanded to accommodate relocation of unique equipment from NMRC.
- UICs for leased space in NCR are the same as the parent organization.
- Excess space, or land for a MILCON, for up to 232 people is available in or adjacent to Brooke Army Medical Center.
- Definitions of TBRCEs are aligned at the sub-DTAP level and associated FTEs and Equipment must be confirmed.

Action list:

Creation of TBRCE for Battlefield Health and Trauma moves relevant assets of the following activities to 48399, Fort Sam Houston, TX, for collocation with W03SAA, U.S. Army Institute of Surgical Research.

Defense agency:
- None

Army activities:
- Division of Military Trauma Research and associated support personnel, Walter Reed Army Institute of Research, WRAMC, Silver Spring MD, W03KAA
- Army Dental and Trauma Detachment, Great Lakes Naval Training Station, IL, W03K05

Air Force activities:
- Air Force Dental Investigative Service, Great Lakes Naval Training Station, IL

Marine Corps activities:

Navy activity:
- Naval Institute of Dental and Biomedical Research, Great Lakes NTS, IL, N65786
- Combat Casualty Care and Resuscitative Medicine Directorate, including those FTEs for the Tissue Transplant program office currently in leased space, but excluding those in the Hyperbaric Medicine Department, NAVMEDRSCHCEN BETHTESDA, Silver Spring, MD, N32398

Exclusions:
- All personnel and assets of the listed units not performing functions within the defined scope of the defined TBRCE.
- Neuroprotection research will remain at Forest Glen Annex.
- Hyperbaric Medicine Department of NMRC will be realigned to the Hyperbaric and Undersea Medicine TBRCE, instead of the Battlefield Health and Trauma TBRCE.

Creation of TBRCE for Hyperbaric and Undersea Medicine moves relevant assets of the following activities to N00129, Naval Submarine Base New London, Groton CT, for collocation with N66596, NAVSUBMEDRSCHLAB NEW LONDON.

Also, as part of this scenario, portions of the Division of Biochemistry and Medicine, WRAIR, which has historically been a major participant in the Medical Chemical Defense R&D program, will relocate to Aberdeen Proving Ground –Edgewood Area to consolidate with the U.S. Army Medical Research Institute of Chemical Defense to occupy excess capacity. Not Resolved
## Scenarios Involved

- Realign Altus AFB by relocating the 47th (T-1 portion) and 88th Flying Training Squadron to Little Rock AFB. (E&T-0008)
- Realign Dyess AFB, TX by relocating C-130H Aircraft to Little Rock AFB, AR. (USAF-0018)

## Conflicts

- Facilities – (E&T-0008 & USAF-0018)
- Doctrine – (E&T-0008)
  - UFT with operational units
  - New trng concept not discussed with USAF

## Proposed Resolution

- Continue with original scenarios (E&T-0008 & USAF-0018)
- Direct E&T and USAF to develop and analyze scenarios that do not use Little Rock AFB. (E&T-0008 & USAF-0018)
- USAF objects to developing and analyzing an alternate scenario at this time. (USAF-0018)

As Of: 11/12/2004

Draft Deliberative Document-For Discussion Purposes Only-Do Not Release Under FOIA
Registered Scenarios

As Of: 11/12/2004

(a) NOTE: DFAS requires an additional 127,929 USF above CDC #1 reported assigned space. Departure of Air Reserve Personnel Center (ARPC) will free up 127, 964 USF and enable completion of DFAS realignment to Buckley AFB Annex. Scenarios associated with the ARPC are HSA-0004, HSA-0005, and HSA-0008.

(b) Pending scenario question responses, functions from the following locations have the greatest potential for realignment to DFAS-Denver: DFAS-Lawton, DFAS-Oakland, DFAS-Pacific (Ford Island), DFAS-Red River, DFAS-San Antonio, DFAS-San Bernardino, DFAS-San Diego, and DFAS-Seaside.

(3) DFAS-Indianapolis, (Bean Federal Center, former Ft Benjamin Harrison) 8899 E. 56th Street, Indianapolis, IN 46249 (Accounting Services, Commercial Pay Services, Military & Civilian Pay Services, Corporate and Administrative Organizations, and Technology Services Organization)

(a) NOTE: DFAS requires an additional 26,697 USF above CDC #1 reported assigned space. Departure of Human Resource Command – Indianapolis (former EREC) will free up 76,740 USF and enable completion of DFAS realignment. Scenarios associated with the Human Resource Command – Indianapolis HSA-0004, HSA-0005, and HSA-0006.

(b) Pending scenario question responses, functions from the following locations have the greatest potential for realignment to DFAS-Indianapolis: DFAS-Charleston, DFAS-Kansas City, DFAS-Lexington, DFAS-Orlando, DFAS-Pensacola NAS, DFAS-Pensacola Saufley Field, DFAS-Rock Island, and DFAS-St Louis.

Locations with potential retained customer support/ liaison staff, contracted function(s), or which are deemed special purpose in nature include:

(2) Other customer support/liaison staff locations TBD (i.e., DFAS-Seaside, Corporate and Administrative Organization-Internal Review Auditors for Defense Manpower Data Center )

(3) LMIT-Retired & Annuitant Pay Contractor, DFAS-Cleveland, 1240 E 9th Street, Cleveland, OH 44199

(4) Corporate and Administrative Organization-Contractor Support, Southbridge Hotel & Conference Center, 14 Mechanic Street, Southbridge, MA 01566

(5) Technology Services Organization, DFAS-Cleveland Bratenahl, (Defense Contract Management Agency Hosted Installation) 555 E 88th St (Admiral Kidd Center), Bratenahl, OH 44108

(6) DFAS-Red River, Texas Avenue, Texarkana, TX 75505 (Army Non-Appropriated Funds Accounting - Accounting Services and Technology Services Organization)

Justification/Impact proposed:

• Reduces footprint – Admin by 42% or 1,399,421 USF and Warehouse by 69% or 525,690 GSF.
• Implements merge/co-location personnel reduction (15%).
• Overall AT/FP enhancement – DFAS will be on a DoD installation or in Government leased space that meets DoD AT/FP standards.
• Service’s unit costs will go down.
• Gaining site expansion enabled by departure of specific military personnel organizations from Denver and Indianapolis.
• No requirement for renovation at gaining sites.
• Risk averse – Mitigates risk thru centralized, apportioned operations (each segment may serve as backup).
• Better Business Practice - Creates business line centers of excellence.
• Facilitates DFAS re-engineering for FY2011 organization.

Scenario Title: | MAH-MAH-0034 (Alt to MAH-0001): Consolidate DISA Components outside of DC Area

Description:
Close 5 leased locations and realign 4 leased locations, Arlington Service Center (Navy), and Ft. Belvoir by consolidating components of DISA at Offutt Air Force Base.

Justification/Impact:
- Consolidation of HQ locations from 11 to 1 eliminates redundancy and enhances efficiency.
- Encompasses 1.06 million GSF (or equivalent), as currently reported. Computed space required at 200 GSF/person = 754,200 GSF.
- Eliminates 581,000 USF of leased space within the DC Area (726,000 GSF equiv).
- 5 leased locations can be closed: approx. 555,000 USF.
- Affects 4,714 personnel, as currently reported. Scenario estimates a 20% personnel savings as a result of consolidation, or 943 positions.
- Enhances AT/FP
- Relocates major tenant from Arlington Service Center and allows Navy to consider closing that installation.
- Offutt AFB reports 26,986 GSF of vacant administrative space and sufficient land to accommodate 5.6 million GSF of new administrative space.
- Scenario does not consolidate the following locations: Anacostia Annex, Chambersburg, and Mechanicsburg.

Scenario # HSA-0069  Date Created: 10/15/2004

Scenario Title: MAH-MAH-0015 (C): Co-locate Miscellaneous Army Leased Locations

Description:

- Realign 18 leased locations by relocating components of the following USA Activities to Arlington Hall, Aberdeen Proving Ground, and Ft. Belvoir: Office of the Administrative Assistant of the Army (SAAA), Army Audit Agency, ASA(F&M), ASA(I&E), ASA(M&R), CECOM(Acq. Center), DUSA, G-1, G-3, G-8, OASA(Alt), OCAR, OCPA, Army Safety Office, Office of the Chief of Chaplains, the PEO Bio Defense Office, and USALSA.
- MAH-R&RC-0008 enables MAH-MAH-0015 by relocating the HQ Army National Guard from Arlington Hall to Andrews AFB.

Justification/Impact:
- Encompasses 788,000 GSF (or equivalent), as currently reported. Computed space required at 200 GSF/person = 686,200 GSF.
- Affects 3,431 personnel, as currently reported.
- Enhances AT/FP.
- Co-location of organizations facilitates possible consolidation of common support functions.
- Arlington Hall has a capacity of 248,000 GSF; it is expected to be available due to the relocation of the Army National Guard HQ.
- Ft. Belvoir reports no vacant administrative space but sufficient land to accommodate over 15 million GSF of new administrative space.
- Aberdeen Proving Ground reports 68,297 GSF of vacant administrative space and sufficient land to accommodate 9 million GSF of new administrative space.

Scenario Title: MOB-MOB-0006: Joint Mobilization Sites: Blis, Campbell, Dix, Lewis, McCoy, Sill, Shelby, Atterbury.

Description:

Realign Gowen Field, Ft Knox, Ft Jackson, Ft Lee, Ft Huachuca, APG, Ft Rucker, Ft Eustis, Bangor NSB, Groton NSB, McGuire AFB and McChord AFB mob processing operations.

Transfer/Consolidate into newly established Joint Mob/reserve training center sites at Ft Bliss, Ft Dix, Ft Lewis, Ft McCoy, Ft Sill, Ft Leonard Wood, Ft Campbell, Camp Shelby, and Camp Atterbury.

Justification/Impact

- Army G-3 proposed primary mobilization sites.
- Joint Mob Processing Sites would enhance deployment capabilities for all services.
- Buildable acres, training acres and unconstrained acres are available for expansion.
- Billeting available for personnel along with dining, medical, storage infrastructure available.

Scenario Title:    MAH-MAH-0039 (Alt to MAH-0014) : Relocate Army Materiel Command(AMC)-Alternate

Description:

Realignment Ft. Belvoir by relocating AMC and the Security Assistance Command (USA SAC, an AMC sub-component) to Redstone Arsenal.

- Frees up small amount of permanent space at Ft. Belvoir.
- Provides for permanent facilities for Army MACOM.
- Space required for 1,411 personnel is 282,200 GSF at 200 GSF/person.
- Redstone Arsenal reports no vacant administrative space but sufficient land to accommodate over 30 million GSF of new administrative space.

Scenario # HSA-0104 Date Created: 11/4/2004
Scenario Title: MAH-MAH-0045 (Alt to MAH-0012): Create New Agency for Media and Publications

Description:

Realignment Fort Belvoir, Anacostia Annex, 2 leased locations in Alexandria, VA, 1 leased location in Norfolk, VA, and 1 leased location in San Antonio, TX by consolidating Army Broadcasting Service, Soldiers Radio & TV; Soldiers Magazine, Air Force News Agency, Army/Air Force Hometown News Service; Naval Media Center; and Navy’s Fleet Hometown News into a newly created DoD Media Activity at Lackland Air Force Base.

Close 1 leased location in Alexandria, VA by co-locating the American Forces Information Service with the new DoD Media Activity at Lackland Air Force Base.

Justification/Impact:
- Eliminates approximately 84,000 USF of leased space.
- Affects 608 personnel. Scenario estimates a 20% personnel savings for the media activities as a result of consolidation, or 78 positions, and a 10% savings for AFIS as a result of co-location, or 22 positions.
- Space required is approximately 101,600 GSF.
- Enhances AT/FP.
- Consolidation and co-location of organizations with like missions promotes “jointness” and creates opportunities for synergy.
- Consolidation and co-location of organizations facilitates possible consolidation of common support functions.
- Lackland AFB reports no vacant administrative space and sufficient land to accommodate 1.76 million GSF of new administrative space.

### Description:

Realign two leased space locations in Arlington, Virginia by relocating Headquarters components of USA Space and Missile Command to Peterson Air Force Base.

**Justification/Impact:**

- Eliminates 27,000 USF of leased space.
- Enhances AT/FP.
- Consolidation of HQs from multiple to single locations eliminates redundancy.
- Affects approximately 161 personnel, as currently reported. Scenario estimates a 14% personnel savings as a result of consolidation, or 23 positions.
- SMDC has existing, large presence at Peterson AFB.
- Peterson AFB reports 0 GSF of vacant administrative space and sufficient land to accommodate 2.3 million GSF of new administrative space.

**Scenario Title:** | MAH-MAH-0042 (Alt to MAH-0009): Consolidate/Co-locate Inst Mgmt Agencies and Army Service Providers

**Description:**

- Realign 1 leased location in Arlington, Virginia by re-locating USA Installation Management Agency (IMA) to Aberdeen Proving Ground (APG).
- Realign 5 leased locations in Falls Church, Arlington, and Alexandria, Virginia by co-locating USA Community and Family Support Center, USA Center for Substance Abuse, USA Family Liaison Office, and USA Human Resources Office XXI with IMA headquarters at APG.
- Realign Ft. McPherson and Ft. Monroe by consolidating regional offices of IMA with new IMA HQ at APG, forming an IMA Eastern Region.
- Realign Ft. Sam Houston by consolidating IMA regional office with existing office at Rock Island Arsenal (RIA), forming IMA Western Region.
- Realign 2 leased locations in Falls Church and Alexandria, Virginia, Ft. Monroe, and Ft. Eustis by consolidating Army Contracting Agency (ACA) HQ and regional offices to form ACA Eastern Region at APG.
- Realign Ft. McPherson by consolidating ACA regional office with existing office to form ACA Western Region at RIA.
- Realign 1 leased location in Arlington, Virginia, Ft. Monroe, and Ft. McPherson by consolidating USA NETCOM HQ and regional offices to form NETCOM Eastern Region at APG.
- Realign Ft. Sam Houston by consolidating NETCOM regional office with existing office to form NETCOM Western Region at RIA.

**Justification/Impact:**

- Eliminates nearly 300,000 equivalent GSF of leased space within the DC Area.
- Impacts over 1,431 personnel (figure not final; missing some Army data).
- Enhances AT/FP.
- Co-location of organizations with like missions promotes “jointness” and creates opportunities for synergy.
- Co-location of organizations facilitates possible consolidation of common support functions.
- USA estimated personnel reduction of up to 200 positions (IMA Regions).
- Aberdeen Proving Ground reports 68,297 GSF of vacant administrative space and sufficient land to accommodate 9 million GSF of new administrative space.
- Rock Island Arsenal – Capacity TBD.

Description:

This scenario consolidates intermediate-level ship maintenance, specifically:
- Realigns and consolidates intermediate workload at Norfolk Naval Shipyard. SIMA Norfolk would be closed and Norfolk Naval Shipyard would assume the intermediate workload. Assumes all SSNs from Norfolk would change homeport to Subase, New London. Intermediate submarine work at SIMA Norfolk would be realigned to NAVSUBSUPFAC NEW LONDON. Scenario Title: | SR-4; Realigns I-Level and D-Level Ship Maintenance Work  
Description: | This scenario assumes a DON scenario which moves a CVN Strike Group from San Diego to Hawaii, moves a CVN from Everett to Bremerton and a CV from Mayport to Norfolk. Everett would be closed and 3 DD/DDGs from Everett would move to San Diego. Also assumes the replacement carrier for USS KITTY HAWK (CV 63) upon her decommissioning comes from the East Coast. Pearl Harbor NSY&IMF partners with Puget Sound NSY or other nuclear carrier qualified workforce to perform the I-Level ship maintenance work for the carrier. To compensate for the additional carrier work performed at Pearl Harbor, this scenario moves some long-term submarine depot work from Pearl Harbor to Portsmouth NSY or to Puget Sound NSY&IMF or Norfolk NSY. This scenario also assumes a DON scenario closes SUBBASE New London and moves 2 SSN 21 ships to Bangor, 5 SSNs to Norfolk, 4 SSNs to Pearl Harbor and 6 SSNs to Portsmouth NSY. This scenario also assumes a DON scenario closes SUBBASE Point Loma and moves the SSNs and the floating drydock ARCO to Pearl Harbor. Also assumes 2 SSGNs move from Kings Bay to Bangor. Also assumes 2 FFGs move from Pascagoula to Mayport and SIMA and NAVSTA Pascagoula close. Also assumes 5 MCMs and 6 MHCs move from Ingleside to both Mayport and to San Diego and Ingleside closes. All associated intermediate-level ship maintenance work moves to the new ship locations. This scenario also disestablishes Boston Planning Yard and Plant Equipment Support Office, Annapolis, and realigns there work with their respective shipyards, Puget Sound NSY and Norfolk NSY. The ship maintenance work at SHIPSO, Philadelphia, and at TRF Kings Bay is realigned to Norfolk NSY and SUBMEPP is consolidated into Portsmouth NSY.

Scenario Title:  Regionalization of Strategic Distribution Platforms (3 Regions)

Description:

Expands the number of wholesale Strategic Distribution Platforms (SDPs) from two to three. It positions the SDPs regionally across CONUS and provides for storage and distribution support to customers on a regional basis. SDPs support their assigned customers while in CONUS and while deployed overseas. Retains the Defense Distribution Depots co-located with service industrial facilities.

Region 1. Boundaries are in the North-Maine, Vermont, New York, Ohio, Michigan; South-Florida, Alabama; East- New Jersey, Delaware, Virginia, Georgia; West-Indiana, Kentucky, Tennessee, Mississippi.

- DDSP, Susquehanna: Susquehanna remains a SDP but its customer base gets realigned and downsized. It will provide storage and distribution support to customers in its assigned Eastern US region and those permanently assigned OCONUS across the Atlantic. It will support those customers at their home bases and when deployed for contingencies.

Region 2. Boundaries are in the North- Minnesota, North Dakota; South-Mississippi, Texas; East- Wisconsin, Illinois, Missouri, Arkansas, Louisiana; West-South Dakota, Nebraska, Oklahoma.

- Red River: The Red River Distribution Depot will be realigned and expanded to become a SDP supporting customers in the Central US region. Its storage and distribution mission gets expanded to include all DoD customers in the Central region. Supplies and inventory will be redistributed to Red River from other wholesale locations. Depending on availability and condition of storage infrastructure at Red River, this may require some future MILCON. Red River's assigned personnel also increase to handle the increased mission.

Region 3. Boundaries are in the North-Idaho, Montana; South-New Mexico, Arizona; East-Montana, Wyoming, Colorado; West-Washington, Oregon, California.

- DDSJ, San Joaquin: San Joaquin remains a strategic distribution platform but its customer base gets realigned and downsized. It will provide storage and distribution support to customers in its assigned Western US region and those permanently assigned OCONUS across the Pacific. It will support those customers at their home bases and when deployed for contingencies.

Scenario # TECH-0001  Date Created: 10/4/2004

Scenario Title: Establish Joint Centers for Air Platforms RDAT&E Centers

Description:

Abstract: This scenario proposes to consolidate air platform RDAT&E to three principal sites while retaining several specialty sites. The planned component moves will enhance synergy including RW/FW interaction by consolidating to major sites, preserve healthy competition, leverage climatic/geographic conditions and existing infrastructure, minimize environmental impact, distribute demand on the telemetry spectrum and effect reasonable homeland security risk dispersal. The relocation of air platform R functions are proposed in concert with the S&T Reliance Agreements.

Narrative: Consolidate Fixed and Rotary Wing R, D&A, T&E into principally 3 core sites Patuxent River, Wright-Patterson, and Redstone Arsenal. Additionally, Fixed Wing R will be consolidated at Wright Patterson, Rotary Wing R will be consolidated at Redstone Arsenal, ship installations related R (catapults, arresting gear, helo RAST, etc.) will be consolidated at Patuxent River, and Air Force T&E will be consolidated at Edwards AFB.

• Assumptions: A number of test-centric sites reported data under Research or D&A where they are doing testing in support of these two functions. This testing could possibly move as part of a T&E scenario but does not need to move to the receiver sites associated with the proposed R or D&A realignments listed below.

RESEARCH
- Arnold AFB [FP2804], NAVAIRWARCENWPNDIV China Lake [N60530] and Edwards AFB [FB2805], while they reported R, were not included because the work they reported is associated with proof of concept testing.

D&A
- Aberdeen Proving Ground [W26210 – SLAD, W0JEAA – DTC, and W3JCAA – AMSAA] are all management or analysis activities that perform their mission for all Army programs.
- White Sands Missile Range [W04WAA] and Yuma Proving Ground [W03XAA] was not included because of their specialized testing climate, features and environment.

T&E
- Arnold AFS [FP2804] was not included because it is the national site for air breathing engine T&E.
- COMOPTEVFOR Norfolk [57023] was not included because they are a headquarters unit in-so-far-as air platforms are concerned.
- Holloman AFB [FVHC0/46TG] was not included because impracticality of moving the RAMS facility.
- Aberdeen Proving Ground [W26210 – SLAD, W0JEAA – DTC] are all management or analysis activities that perform their mission for all Army programs. Ft. Bragg [W46907], Ft. Hood [W469AA] were not included because it provides OT support and is co-located with their user.
- Redstone Arsenal [W1HTAA] is T&E in support of R.

Scenario #  TECH-0006  Date Created: 10/22/2004
Scenario Title: Establish Joint Centers for Fixed Wing Platform RDAT&E

Description:

Consolidate Fixed Wing Air Platform R, D&A, T&E into principally 2 core sites. R and D&A at Patuxent River and Wright-Patterson AFB. Additionally, Fixed Wing R will be consolidated at Wright Patterson, ship installation related fixed wing R (catapults, arresting gear, helo RAST, etc.) will be consolidated at Patuxent River. Air Force T&E will be consolidated at Edwards AFB and Navy T&E at Patuxent River.

• Assumptions:
  RESEARCH
  - Arnold AFB [FP2804], NAVAIRWARCENWPNDIV China Lake [N60530] and Edwards AFB [FB2805], while they reported R, were not included because the work they reported is associated with proof of concept testing.
  T&E
  - Arnold AFS [FP2804] was not included because it is the national site for air breathing engine T&E.
  - COMOPTEVFOR Norfolk [57023] was not included because they are only a headquarters unit.
  - Holloman AFB [FVHC0/46TG] was not included because impracticality of moving the RAMS facility.
  - McKinley Laboratory at Eglin AFB will not be relocated.

Scenario # | TECH-0007  | Date Created: | 10/22/2004
Scenario Title: | Relocate Ground Vehicle RDAT&E at Detroit Arsenal to Selfridge ANG Base

Description:

Abstract: Relocation of Detroit Arsenal to US Army Garrison - Selfridge is the initial proposed scenario. An alternative would be to consider relocation of Detroit Arsenal to US Army Garrison - Selfridge, except for unique special high-cost laboratory facilities residing at Detroit Arsenal. These facilities will be creatively and cost-effectively maintained at their current geographic location and would include, but not be limited to, 1) unique high-cost, extreme climatic, full scale combat vehicle simulation facilities/individual propulsion performance simulation test cells, and an additional unique full scale transient ground vehicle simulation facility, 2) full-scale unique DOD dynamic physical simulation “shaker” facility (used for spectrum from full-scale armored combat vehicles to tactical trucks/HMMWV type vehicles), 3) unique Army/DoD water and fuel laboratories (built in 1995 as a result of previous BRAC), and 4) additional unique central ground vehicle research laboratories. Physical movement of these capabilities from their current location to US Army Garrison - Selfridge might not be the most cost-effective alternative.

Narrative: This scenario proposes to relocate Detroit Arsenal to US Army Garrison – Selfridge. This move would retain the Army’s/DoD’s ground vehicle RD&A activity in the world automotive/ground vehicle capital of southeast Michigan. Southeastern Michigan is where the research and development headquarters reside for General Motors, Ford, Chrysler, General Dynamics Land Systems, Toyota-North America, Nissan-North America, Hino, Hyundai, Suzuki, Visteon, Delphi, Johnson Controls, Dana, and many others. Over 85% of the world’s ground vehicle/automotive research and development resources are expended in this southeast Michigan location, and thus Detroit Arsenal’s synergy and ability to leverage the automotive industry’s vast resources and tremendous investment in R&D has always been of immeasurable value to Army/DoD. In addition, local southeast Michigan academia (anchored by schools such as the University of Michigan, Kettering University [formerly General Motors Institute], Wayne State University, and many others) is a unique and world-class network of extremely focused automotive research institutions which Detroit Arsenal has extensively leveraged and used to obtain motivated world-class engineers and scientists to lead Army/DoD’s ground vehicle/automotive efforts from Detroit Arsenal. A nationally unique wealth of automotive, world-class talent resides in southeast Michigan (near Detroit Arsenal) that far surpasses any other area of the country. Since southeastern Michigan is the premier location for automotive engineers, many of Detroit Arsenal engineers have grown up (technically and culturally) in this “world of ground vehicle/advanced automotive technology.”

As such, it could be expected that very few current Detroit Arsenal engineers and scientists would leave the area to another location.

•Assumptions:

- TJCSG did not collect any capacity or MIL VAL data on US Army Garrison – Selfridge. This data will need to be collected as part of the scenario data call.
- Another alternative that could be considered would be to move relocate PEO GCS, PEO CS&CSS, TACOM and TARDEC to US Army Garrison - Selfridge cantoning and minimally staff the special, high cost laboratory equipment that resides in Bldg 212 (Propulsion and Mobility Test Cells) and 215 (Physical Simulation – High Performance Computing).

### Scenario Title:

Establish Joint Centers for Ground Platform R DAT&E

### Description:

**Abstract:** Consolidate Ground Vehicle R, D&A, T&E into 2 core sites Detroit Arsenal and Aberdeen Proving Ground. Additionally, Ground Vehicle T&E will largely be consolidated at Aberdeen Proving Ground.

**Narrative:** This scenario would consolidate Ground Vehicle R, D&A, and T&E into 2 core sites; Detroit Arsenal and Aberdeen Proving Ground. The Army/DoD ground vehicle R and D&A to continue to reside in the world automotive/ground vehicle capital of southeast Michigan, and R, D&A, and the preponderance of ground vehicle T&E would be located at Aberdeen Proving Grounds.

Aberdeen Proving Grounds includes the activities of the Army Research Laboratory (ARL), and the Aberdeen Test Center (ATC), U.S. Army Test and Evaluation Command (USATECOM).

Detroit Arsenal is located in southeastern Michigan where research and development headquarters reside for General Motors, Ford, Chrysler, General Dynamics Land Systems, Toyota-North America, Nissan-North America, Hino, Hyundai, Suzuki, Visteon, Delphi, Johnson Controls, Dana, and many others.

Abstract: This scenario proposes to consolidate all Sea Vehicle RDAT&E to two principal sites while retaining small sites involved in specialized Sea Vehicle support to DDTE/OTE or specialized sites with unique facilities. The planning component moves will enhance and leverage off the existing robust concentration of research, design and development, acquisition support and T&E capabilities that currently reside within the US Navy HQ and Warfare Center infrastructure. This proposal would be consistent with the existing partnership collaboration between the USA and the USN on Theater Support Vessels.

Narrative: Consolidate Sea Vehicle R, D&A and T&E to 2 primary sites while retaining specialty sites for T&E. Program management will be retained for D&A and T&E at COMNAVASEA. Relocate management and direction of Theater Support Vessels programs for USA to COMNAVSEA WNY. Consolidation of all Program management of Sea Vehicle Programs at the WNY collocates these functions with related program offices supporting Weapons and Combat systems, Hull Mechanical and Electrical, C4I integration and related sea vehicle equipment and support functions. This also places it nearby the principal technical direction and development agent for sea vehicles located at NSWC Carderock Division in Bethesda, MD.

Assumptions:
A number of activities reported small amounts of effort related to Sea Vehicles. Some of this work is uniquely in support of specialized testing of Sea Vehicles (e.g. underwater shock testing at Aberdeen Proving Ground, etc). These facilities would be retained under this scenario. Other component activities that reported small amounts of R, and D&A support for either special applications or for traditional Sea Vehicle applications are proposed as candidates to be consolidated at either of two sites, NSWC Carderock Division (West Bethesda or Philadelphia).

**Scenario #** USA-0020  
**Date Created:** 9/23/2004  
**Scenario Title:** 87 AFRC Norman, OK  
**Description:**

Closes 6 occupied facilities (Norman (lease), Broken Arrow, Tonkawa, 23rd Street Armory (including the 23rd Street FMS activity), Farr USARC and Smalley USARC. Closes 3 currently vacant facilities (Rousy USARC in Clinton, OK, the Konawa Armory and the Wewoka Armory) eliminating excess capacity. Constructs a new complex on a state-owned military reservation with rail, air and interstate access. Realigns the CSMS operation currently at Norman and C/700 SB from the Edmonds Armory into the new complex.

Scenario Title | GC-MPC-0010: Consolidate/Co-locate All Military Personnel Centers at Ft Leavenworth
Description:

Realign Army Human Resources Command (HRC)-leased space in Alexandria VA, Indianapolis IN and St Louis MO; the Navy Personnel Command (NAVPERSCOM) at Naval Support Activity (NSA) Mid-South in Millington TN, the Naval Reserve Personnel Center (NAVRESPERSCEN) and Enlisted Placement & Management Center (EPMAC) at Naval Support Activity (NSA) New Orleans LA; the operational military personnel functions from Headquarters Marine Corps Manpower & Reserve Affairs (M&RA) at Marine Corps Base Quantico, the Marine Corps Mobilization Command (MOBCOM) at the Marine Corps Support Activity (MCSA)-leased space in Kansas City; the military personnel functions from Air Force Personnel Center (AFPC) at Randolph Air Force Base TX and the Air Reserve Personnel Center (ARPC) at Buckley Annex CO by consolidating all Active and Reserve Military Personnel Centers within each Service and co-locating all four Service Military Personnel Centers at Fort Leavenworth KS.

ADDITIONAL DATA: Army Human Resources Command (HRC) - Indianapolis (former EREC) is not listed in the drop down menu. Relocation would free up 76,740 square feet of leased space.

No existing Mil Pers Center exists at Leavenworth so no excess is available. Scenario requires ~1,702,600 SF for incoming activities (6100 Gen Adm Bldg only)

Scenario #  HSA-0006  Date Created:  9/23/2004  
Scenario Title:  GC-MPC-0011: Create Army Human Resources Center (Personnel & Recruiting) at Fort Knox  
Description:  
Realign Army Human Resources Command (HRC)-leased space in Alexandria VA, Indianapolis IN and St. Louis MO and owned space occupied by the Army Civilian Human Resources Agency (CHRA) at Aberdeen Proving Ground MD by consolidating all and re-locating to Fort Knox KY.  
Realign Fort Monroe VA, by re-locating Army Accessions Command and Army Cadet Command and co-locating with the Army Enlisted Recruiting Command and the consolidated Army Human Resources Command (HRC) at Fort Knox KY.  
ADDITIONAL DATA: Army Human Resources Command (HRC) - Indianapolis (former EREC) is not listed in the drop down menu. Relocation would free up 76,740 square feet of leased space.  
No existing Mil Pers Center exists at Ft Knox so no excess is available. Existing Recruiting functions currently occupy 213,231 SF and 70,631 has been determined as excess. Scenario requires an additional 667,569 SF for MilPers and Recruiting incoming activities (6100 Gen Adm Bldg only).

**Scenario Title:** GC-CF-0003: [I] Transfer Level III Discharged Prisoners to Federal Bureau of Prisons

**Description:**

Realignment of Ft Leavenworth by transferring long-term (Level III) bed space to Federal Bureau of Prisons (FBOP). Increase number of long-term (Level III) beds with the Federal Bureau of Prisons for transfer from United States Disciplinary Barracks (USDB), Ft Leavenworth.

**Justification/Impact:**

- Current agreement with Federal Bureau of Prisons (FBOP) is insufficient.
- Approximately 1/3 of long-term prisoners are fully adjudicated and discharged from the military.
- Increase in FBOP support would open beds for shorter long-term prisoners at Level II facilities.
- Discharged prisoners would be sent to federal system.
- Promotes “Good order and discipline,” by transferring prisoners who have committed the most serious of offenses and given long term or life sentences, away from general prison population.

**Potential Conflicts:**

- Cultural: “Cradle to grave” mentality. Military departments may wish to keep fully adjudicated and discharged prisoners as a way of the military "taking care" of its own.
- Other: Cost.

Realigned Subase Bangor and Fort Lewis by disestablishing the correctional facility at Subase Bangor and relocating the mission to a single Level II joint regional correctional facility located at Fort Lewis.

**Justification/Impact:**
- Improves jointness, catalyst to creating a DoD correctional system with a single executive agent.
- Subase Bangor (Year built-1995)/(FY01 inmate count-42); Fort Lewis (Year built-1957)/(FY03 inmate count-206). Used largest inmate count provided from Capacity Data FY01-03.
- Buildable land is available at Fort Lewis, questionable as to availability of land at Subase Bangor. New facility required at Fort Lewis.

- Buildable acres available @ MCAS Miramar. Additional facility required.
- MCAS Miramar remains executive agent for Level III females.

**Potential Conflicts:**
- Cultural: Fewer DoD-level correctional facilities amongst military departments.
- DON: Large Level I requirement as of 9/22/04 (60-pre-trial, 61-adjudged level I, 51-level II). Pretrial confinement is used intuitively by DON (cultural). USA and USAF don't use pre-trial as often as DON.

### Scenario # HSA-0045  
**Date Created:** 10/15/2004  
**Scenario Title:** MAH-MAH-0001 (Dc): Consolidate Defense Information Systems Agency (DISA) Components within DC Area

**Description:**
Close 5 leased locations and realign 4 leased locations, Arlington Service Center (Navy), and Ft. Belvoir by consolidating components of DISA at Ft. Meade.

**Justification/Impact:**
- Consolidation of HQ locations from 11 to 1 eliminates redundancy and enhances efficiency.  
- Encompasses 1.06 million GSF (or equivalent), as currently reported. Computed space required at 200 GSF/person = 754,200 GSF.  
- Eliminates 581,000 USF of leased space within the DC Area (726,000 GSF equiv).  
- 5 leased locations can be closed: approx. 555,000 USF.  
- Affects 4,714 personnel, as currently reported. Scenario estimates a 20% personnel savings as a result of consolidation, or 943 positions.  
- Enhances AT/FP  
- Relocates major tenant from Arlington Service Center and allows Navy to consider closing that installation.  
- Ft. Meade reports 28,755 GSF of vacant administrative space and sufficient land to accommodate 7.4 million GSF of new administrative space.  
- Scenario does not consolidate the following locations: Anacostia Annex, Chambersburg, and Mechanicsburg.

### Registered Scenarios

**Scenario #**  HSA-0047  
**Date Created:** 10/15/2004

**Scenario Title:** MAH-MAH 0004 (Dc): Co-locate Missile and Space Defense Agencies

**Description:**

Close 7 leased locations in the DC Area, close 10 leased locations in Huntsville, AL, realign 3 leased locations in the DC Area, realign Naval Support Activity Dahlgren, and facilitate disposal of Federal Office Building 2 by consolidating components of Missile Defense Agency (MDA) and co-locating with USA Space and Missile Defense Command Headquarters (SMDC), Naval Network and Space Operations Command (COMNAVNETSPAOPSCOM), and existing offices of SMDC and MDA at Redstone Arsenal.

**Justification/Impact:**

- Encompasses 933,000 GSF (or equivalent), as currently reported. Computed space required at 200 GSF/person = 728,600 GSF.
- 17 leased locations can be closed: approx. 395,000 USF
- Affects 4,194 personnel, as currently reported. Scenario estimates a 14% personnel savings for MDA and SMDC as a result of consolidation, or 515 personnel, and a 7% personnel savings for the Navy activity as a result of co-location, or 36 positions.
- Enhances AT/FP.
- Consolidation of HQs from multiple to single locations, e.g. MDA from at least 20 to 1, eliminates redundancy and enhances efficiency.
- Consolidation and co-location of large HQs facilitates possible consolidation of common support functions.
- Relocates major tenant from FOB 2, which is projected to close in 2010+.
- Consolidation and co-location of organizations with like missions promotes “jointness” and creates opportunities for synergy.
- Redstone Arsenal reports no vacant administrative space but sufficient land to accommodate over 30 million GSF of new administrative space.

**Description:**

Close 9 and realign 26 leased locations by co-locating components of the Office of the Secretary of Defense, Washington Headquarters Services, the Defense Technology Security Administration, the Defense Legal Services Agency, the Defense Human Resources Activity, and the DOD Inspector General along with sufficient space to accommodate overflow from the Pentagon Renovation Project at an administrative campus at the Engineering Proving Ground site at Ft. Belvoir.

Justification/Impact:
- Encompasses 1.1 million GSF (or equivalent) of regular leased space plus 1.0 million GSF as a placeholder for Pentagon Renovation overflow. Computed space required at 200 GSF/person = 1.6 million GSF.
- Eliminates 939,000 USF of regular leased space within the DC Area, plus over 900,000 equiv GSF in Pentagon Renovation space.
- 9 leased locations can be closed, including Pentagon Renovation buildings: approx. 1.26 million USF.
- Affects 3,208 personnel in regular space plus provides space for an estimated 5,000 personnel potentially affected by the Pentagon Renovation overflow, as currently reported.

Scenario Title: MAH-MAH-0024 (I): Co-locate Miscellaneous USAF Leased Locations

Description:

Close 3 and realign 17 leased locations in the DC Area by co-locating components of the following USAF Activities at Andrews Air Force Base: SAF/SB, SAF/PA, SAF/IE, SAF/GC, SAF/FM, SAF/AQ, SAF/AG, SAF/AA, AF/CIO, AF/XO, AF/JA, AF/IL, AF/DP, and AF Personnel Operations.

Justification/Impact:
- Eliminates 212,000 USF of leased space within DC Area.
- 3 leased locations can be closed: 78,600 USF.
- Affects 979 personnel, as currently reported. Scenario estimates a 7% personnel savings for all but largest organization (AF/IL) as a result of co-location, or 52 positions.
- Computed space required at 200 GSF/person = 185,600 GSF.
- Enhances AT/FP.
- Co-location of organizations facilitates possible consolidation of common support functions.
- Sufficient existing administrative space is expected to be available at Andrews AFB as a result of relocation of activities via other scenarios.

Scenario #       HSA-0077     Date Created: 10/21/2004
Scenario Title: MAH-MAH-0009 (Dc): Consolidate/Co-locate Installation Management Agencies and Army Service Providers

Description:

- Realign 1 leased location in Arlington, Virginia by relocating USA Installation Management Agency (IMA) to Ft. Lee.
- Realign 5 leased locations in Falls Church, Alexandria, and Arlington, Virginia by co-locating USA Community and Family Support Center, USA Center for Substance Abuse, USA Human Resources Office, and USA Human Resources Office XXI with IMA headquarters at Ft. Lee.
- Realign Rock Island Arsenal by consolidating IMA regional office with existing office at Ft. Sam Houston, forming IMA Western Region.
- Realign 2 leased locations in Falls Church and Alexandria, Virginia, Ft. Monroe, and Ft. Eustis by consolidating Army Contracting Agency (ACA) HQ and regional offices to form ACA Eastern Region at Ft. Lee.
- Realign Ft. McPherson by consolidating ACA regional office with existing office to form ACA Western Region at Ft. Sam Houston.
- Realign Rock Island Arsenal by consolidating NETCOM regional office with existing office to form NETCOM Western Region at Ft. Sam Houston.

Justification/Impact:

- Eliminates nearly 300,000 equivalent GSF of leased space within the DC Area.
- Impacts over 1,431 personnel (figure not final; missing some Army data).
- Enhances AT/FP.
- Co-location of organizations with like missions promotes “jointness” and creates opportunities for synergy.
- Co-location of organizations facilitates possible consolidation of common support functions.
- USA estimated personnel reduction of up to 200 positions (IMA Regions).
- Ft. Lee reports 28,658 GSF of vacant administrative space and sufficient land to accommodate over 21.3 million GSF of new administrative space.
- Ft. Sam Houston reports 88,945 GSF of vacant administrative space and sufficient land to accommodate nearly 11 million GSF of new administrative space.

#### Description:

Realign Naval Station Norfolk, Marine Corps Base Quantico and Camp Lejeune by disestablishing the correction facilities at Marine Corps Base Quantico, Naval Station Norfolk and Camp Lejeune and relocating the mission to a single Level II joint regional correctional facility to be located in Hampton Roads South.

**Justification/Impact:**
- Improves jointness, catalyst to creating a DoD correctional system with a single executive agent.
- Naval Station Norfolk (Year built-1972) / (FY02 inmate count-158); Marine Corps Base Quantico (Year built-1972) / (FY03 inmate count-46); Camp Lejeune (Year built-1969) / (FY02 inmate count-232). Used largest inmate count provided from Capacity Data FY01-03.
- Buildable acres available @ location in Chesapeake, Virginia.
- A 400 bed facility required.

**Potential Conflicts:**
- Cultural: Fewer DoD-level correctional facilities amongst military departments
- DON concern of 4-hour commute to Hampton Roads South and MOA w/FBI/CIA. No MOA exists between Quantico and FBI/CIA per Heads Corrections (PSL) HQ, USMC.

**Scenario Title:** MAH-MAH-0040 (Alt to MAH-0018): Consolidate Army Test and Evaluation Command (ATEC) Headquarters

**Description:**

Realignment of 1 leased location in Alexandria, Virginia by consolidating Army Test and Evaluation Command (ATEC) HQ and an office of the Army Evaluation Center (sub-component of ATEC) with ATEC sub-components at Ft. Belvoir.

Justification/Impact:
- Eliminates 83,000 USF of leased space within the DC Area.
- Affects 470 personnel. Scenario estimates a 14% personnel savings as a result of consolidation, or 66 positions.
- Space required is 80,800 GSF.
- Enhances AT/FP.
- Consolidation of HQ location with sub-components eliminates redundancy and enhances efficiency.
- Ft. Belvoir reports no vacant administrative space but sufficient land to accommodate over 15 million GSF of new administrative space.

**Scenario Title**: GC-DA-0004: [I] [Alt to HSA-0072] Consolidate DSS/CIFA At Wright Patterson AFB, OH (26 Oct 04)

**Description**:  
Realign leased space in Alexandria and Arlington, VA; Columbus, OH; Smyrna, GA; Long Beach, CA; Elkridge and Linthicum, MD; and Colorado Springs, CO, by disestablishing Defense Security Service (DSS) and Defense Counterintelligence Field Activity (CIFA) and consolidating functions in a new facility to be built on 120 admin buildable acres or 82 undetermined acres, or in 182,000 USF of admin space available at Wright Patterson AFB, OH, under a newly-created organization, e.g., DoD Counterintelligence and Security Agency. This is an HSA and Intel collaborative scenario; HSA JCSG is the Office of Primary Responsibility, the Intel JCSG is the Office of Collatoral Responsibility. This is an alternate scenario to HSA-0072, which places this new organization at Ft Meade, MD.

Scenario Title: MAH-MAH-0043 (Alt to MAH-0007): Co-locate MILDEP Investigation Agencies

Description:

Justification/Impact:
- Frees up 510,000 GSF close to Pentagon for other uses.
- Affects 2,293 personnel, as currently reported.
- Co-location of organizations facilitates possible consolidation of common support functions; applied a 10% personnel savings factor to the smallest organizations in this scenario, resulting in a forecast reduction of 141 positions.
- Computed space required at 200 GSF/person = 430,000 GSF.
- Navy NCIS needs upgraded HQ facility.
- MCB Quantico reports 61,436 GSF of vacant administrative space and sufficient land to accommodate 3.4 million GSF of new administrative space.
- Co-location of organizations with like missions promotes “jointness” and creates opportunities for synergy.

**Scenario Title:** Consolidate NCR-Based NGA at Ft. Belvoir

**Description:**
Realignment of NGA functions at Bethesda, MD (Sumner and Dalecarlia sites) named Erskine Hall, Emory Bldg, Maury Hall, Roberdeau Hall, Abert Hall, Ruth Bldg, Fremont Bldg, Motor Pool, and Warren Bldg; Realignment of NGA functions at Reston, VA, named 1 and 2; Realignment of NGA functions at Newington, VA, named 8510, 8520, and 8530; Realignment of NGA functions at Dulles, VA, named Dulles North (or its successor, Reston 3); Realignment of National Geospatial Intelligence College function at Ft Belvoir, VA, named Bldgs 211, 214, 215, and 220; Realignment of NGA and NGIC functions in Bldg 213 at Washington Navy Yard, DC.; Realignment of NGA functions within NRO facility, Westfields; by relocating and consolidating to a new facility at Ft. Belvoir.

This scenario disestablishes all of the functions currently performed at the NCR locations named above and consolidates the functions into a new facility on 150 acres at Ft. Belvoir. The requirement for the 150 acres is due to vulnerability and security reasons.

Draft Deliberative Document-For Discussion Purposes Only-Do Not Release Under FOIA

Monday, November 22, 2004  Page 326 of 669
### Description:

**Abstract:** This scenario will co-locate all aerospace biomedical and human systems R&D performing activities with associated relevant education and training and healthcare delivery activities, thereby enabling efficient and synergistic use of personnel, equipment, and facilities for all 3 functions across all Services. It also reduces the use of leased space.

**Narrative:** The end state of this multi-action scenario will create a new Center of Excellence for Aerospace Medicine at Wright-Patterson Air Force Base. This scenario leverages and is coupled with a medical education and training scenario to consolidate aerospace medical education and training at a single site. This TBRCE includes all DoD research and technology development operations in the areas operational medical issues unique to aviation, including biodynamics, crashworthiness and survival, acceleration, life support equipment (aviation), aviation platform integration, and special occupational health criteria.

This scenario realigns and co-locates diverse aerospace and aeromedical R&D activities from: Brooks City Base, TX (311th Human Systems Wing [Air Force School of Aerospace Medicine, Air Force Institute for Operational Health, Human Systems Program Office (all except program managers identified as part of the Medical RDA Management Center in another scenario) and other pertinent Wing assets] and the Air Force Research Laboratory Human Effectiveness Directorate [less its Directed Energy Program]); Naval Air Station, Pensacola (Naval Aerospace Medical Research Laboratory); and Fort Rucker (Army Aeromedical Research Laboratory). All of the above activities will be relocated to Wright-Patterson AFB, where they will be co-located with the Air Force Research Laboratory Human Effectiveness Directorate.

The Tri-Service Directed Energy programs, currently co-located in leased space at Brooks City Base, will remain in their current location. An alternative is that Air Force and Navy directed energy programs will relocate to Wright-Patterson AFB, while the Army laser injury treatment program will be realigned to and consolidated with the Army Institute of Surgical Research, Fort Sam Houston, TX.

It is assumed that rotary wing aviation support facilities and flying ranges are available at Wright-Patterson AFB. In the event that such facilities are unavailable or unaffordable, a rotary wing flight detachment may be maintained at Fort Rucker, Alabama. It also assumes that Wright-Patterson AFB can provide adequate and affordable access to test subjects.

Since Air Force aeromedical education and training depends upon faculty drawn from R&D and operational medical support organizations that are currently co-located with the U. S. Air Force School of Aerospace Medicine (USAFSAM), the value of this scenario depends on movement of all relevant Air Force R&D activities in concert with USAFSAM.

**Assumptions:**
- Rotary Wing flight operations and maintenance support are available and affordable at Wright-Patterson AFB.
- Adequate space for expansion is available at Wright-Patterson AFB.
- A complete list of subordinate UICs for Air Force at Brooks City Base and Wright-Patterson AFB (AFRL and 311th Sys WG) has not been confirmed.
- Definitions of TBRCEs are aligned at the sub-DTAP level and associated FTEs and Equipment must be confirmed.
- Aerospace medicine education and training elements of the 3 Services will be collocated at Wright-Patterson AFB.

**Action list:**
- Creation of TBRCE for Aerospace Medicine moves relevant assets of the following activities to ZHTV, Wright-Patterson AFB, Dayton, OH, for collocation with FFSDG, Air Force Research Lab, Human Effectiveness Division.

**Defense agency:**
- None

**Army activities:**

Scenario #  MED-0026  Date Created:  11/10/2004

Scenario Title:  Create Center of Excellence for Aerospace Medicine (Brooks City Base TX)

Description:

Abstract: This scenario will co-locate all aerospace biomedical R&D performing activities with associated relevant education and training and healthcare delivery activities, thereby enabling efficient and synergistic use of personnel, equipment, and facilities for all 3 functions across all Services.

Narrative: The end state of this multi-action scenario will create a new Center of Excellence for Aerospace Medicine at Brooks City Base. This scenario leverages and is coupled with a medical education and training scenario to consolidate aerospace medical education and training at a single site.

This scenario realigns and co-locates diverse aerospace and aeromedical R&D performing activities from: Wright-Patterson AFB (Air Force Research Laboratory Human Effectiveness Directorate); Naval Air Station, Pensacola (Naval Aerospace Medical Research Laboratory); and Fort Rucker (Army Aeromedical Research Laboratory). All of the above activities will be relocated to Brooks City Base, where they will be co-located with the 311th Human Systems Wing, including the U.S. Air Force School of Aerospace Medicine and elements of the Air Force Research Laboratory Human Effectiveness Directorate.

It is assumed that rotary wing aviation support facilities and flying ranges are available at Brooks City Base. In the event that such facilities are unavailable or unaffordable, a rotary wing flight detachment may be maintained at Fort Rucker, Alabama. It also assumes that Brooks City Base can provide adequate and affordable access to test subjects.

Assumptions:
- Rotary Wing flight operations and maintenance support are available and affordable at Brooks City Base.
- A complete list of subordinate UICs for Air Force at Brooks City Base and Wright-Patterson AFB (AFRL and 311th Sys WG) has not been confirmed.
- Definitions of TBRCEs are aligned at the sub-DTAP level and associated FTEs and Equipment must be confirmed.
- Adequate space for expansion is available at Brooks City Base.
- Aerospace medicine education and training elements of the 3 Services will be collocated at Brooks City Base.

Action list:

Creation of TBRCE for Aerospace Medicine moves relevant assets of the following activities to CNBC, Brooks City Base, TX, for collocation with FFGR4, the 311th Human Systems Wing, and FFR59, the Air Force Research Lab, Human Effectiveness Directorate.

Defense agency:

Scenario # MED-0027  Date Created: 11/10/2004
Scenario Title: Create Center of Excellence for Aerospace Medicine (NAS Pensacola)

Description:

Abstract: This scenario will co-locate aerospace biomedical R&D performing activities with associated relevant education and training and healthcare delivery activities, thereby enabling efficient and synergistic use of personnel, equipment, and facilities for all 3 functions across all Services. It also reduces the use of leased space.

Narrative: The end state of this multi-action scenario will create a new Center of Excellence for Aerospace Medicine at NAS Pensacola. This scenario leverages and is coupled with a medical education and training scenario to consolidate aerospace medical education and training at a single site.

This scenario realigns and co-locates diverse aerospace and aeromedical R&D performing activities from: Brooks City Base, TX (311th Human Systems Wing [Air Force School of Aerospace Medicine, Air Force Institute for Operational Health, Human Systems Program Office (all except program managers identified as part of the Medical RDA Management Center in another scenario) and other pertinent Wing assets] and the Air Force Research Laboratory Human Effectiveness Directorate [less its Directed Energy Program]); Wright-Patterson AFB (Air Force Research Laboratory Human Effectiveness Directorate); and Fort Rucker (Army Aeromedical Research Laboratory). All of the above activities will be relocated to Naval Air Station, Pensacola, where they will be co-located with the Naval Aerospace Medical Research Laboratory.

The Tri-Service Directed Energy programs, currently co-located in leased space at Brooks City Base, will remain in place. An alternative is that Air Force and Navy directed energy programs will relocate to NAS Pensacola, while the Army laser injury treatment program will be realigned to and consolidated with the Army Institute of Surgical Research.

It is assumed that rotary wing aviation support facilities and flying ranges are available at NAS Pensacola. In the event that such facilities are unavailable or unaffordable, a rotary wing flight detachment may be maintained at Fort Rucker, Alabama. It also assumes that NAS Pensacola can provide adequate and affordable access to test subjects.

Since Air Force aeromedical education and training depends upon faculty drawn from R&D organizations that are currently co-located with the U.S. Air Force School of Aerospace Medicine (USAFSAM), the value of this scenario depends on movement of all relevant Air Force R&D activities in concert with USAFSAM.

Assumptions:
- Rotary Wing flight operations and maintenance support are available and affordable at NAS Pensacola.
- Adequate space for expansion is available at NAS Pensacola.
- A complete list of subordinate UICs for Air Force at Brooks City Base and Wright-Patterson AFB (AFRL and 311th Sys WG) has not been confirmed.
- Definitions of TBRCEs are aligned at the sub-DTAP level and associated FTEs and Equipment must be confirmed.
- Aerospace medicine education and training elements of the 3 Services will be collocated at NAS Pensacola.

Action list:

Creation of TBRCE for Aerospace Medicine moves relevant assets of the following activities to N00204, NAS Pensacola, FL, for collocation with N66452, NAVAEROMEDRSLAB.

Defense agency:
- None

Army activities:
- U.S. Army Aeromedical Research Laboratory, Fort Rucker, AL, W03YAA

- Air Force Research Laboratory, Brooks City Base, TX, FFSFM and pertinent AFRL subordinate UICs to be determined
- Air Force Research Lab, Human Effectiveness Division, Wright-Patterson AFB, FFSDG and pertinent AFRL subordinate UICs to be determined

Marine Corps activities:
- None

Navy activity:
- NAVAIRWARCENACDIV, Patuxent River, MD, N00421

Exclusions:
- All personnel and assets of the listed units not performing functions within the defined scope of the defined TBRCE.
- Directed energy programs to remain in leased space at Brooks CB
- Parts of the Human Systems Program Office will be realigned to Fort Detrick, MD under a scenario for collocation of Medical RDA Program Management.

**Scenario #**  MED-0028  **Date Created:**  11/10/2004

**Scenario Title:**  Tri-Service Biomedical Research, Development and Acquisition Management Center (TBRDAMC)

**Description:**

Abstract: This scenario will co-locate all Biomedical Science and Technology, and FDA regulated medical product development, management activities to a single site at Fort Detrick MD, thereby enabling efficient and synergistic use of personnel, processes and acquisition support functions across all Services. It also reduces the need for leased space.

Narrative: The scenario realigns the activities listed below to TBRDAMC to be collocated with the many medical Acquisition, Technology and Logistics activities already located at Fort Detrick MD. The end state of this scenario is to collocate Army, Navy, Air Force, Marine Corps and Defense Agency biomedical D&A program management expertise for FDA regulated product development with Biomedical S&T program management expertise at a single site. In order to support DoD-wide coordination of medical/force health protection and Joint Operating Concepts of the future, this scenario provides a center of mass for coordination in planning and management of all defense biomedical RDA, which optimizes use of critical military professional personnel, licensed medical product D&A expertise, and regulatory affairs and contracting infrastructure capability at Fort Detrick. Synergies and efficiencies in management will be further enhanced through development of integrated planning, programming and regulatory processes. Collocation also facilitates the ability of DoD elements to speak with a single voice when working with the FDA. This scenario also facilitates coordinated medical systems lifecycle management with the medical logistics organizations of the Military Departments, already co-located at Ft. Detrick.

Action list: Creation of the TBRDAMC moves relevant assets of the following activities to 24266, Fort Detrick, MD to collocate with W03JAA, HQ, U.S. Army Medical Research and Materiel Command.

**Defense agency:**
- National Capital Element, DTRA-CB Science and Technology Office (STO) (Medical), Defense Threat Reduction Agency (DTRA)- NCR, W1KJAA

<td>Scenario Title:</td>
<td>Regionalization of Strategic Distribution (5 regions)</td>

</table>

**Description:**

Expands the number of wholesale Strategic Distribution Platforms (SDPs) from two to five. It positions the SDPs regionally across CONUS and provides for storage and distribution support to customers on a regional basis. SDPs support their assigned customers while in CONUS and while deployed overseas. Realigns and downsizes CONUS DLA distribution depots located at industrial installations because the expanded number of SDPs negates the need for these full-up organizations. The downsized activities will perform limited receiving, storage and issuing functions for their colocated industrial activities.

**Region 1:** Boundaries are in the North-Maine, Vermont, New York, Michigan; South-Pennsylvania, Ohio, Indiana; East-New Jersey, Connecticut, New Hampshire; West-Wisconsin, Illinois.

- **DDSP, Susquehanna:** Susquehanna remains a strategic distribution platform but gets realigned and downsized. Its number of customers gets reduced to those in its assigned region and those permanently stationed across the Atlantic. As a result, its storage requirement is reduced and the Mechanicsburg storage location is no longer needed. The storage infrastructure will be returned to the host at Mechanicsburg. Personnel assigned to the storage mission at Mechanicsburg are no longer needed at Mechanicsburg as well. In this proposal Susquehanna will become the New Cumberland SDP. New Cumberland picks up command and control of the Tobyhanna Satellite Activity.

- **Tobyhanna:** The Tobyhanna DD gets realigned and downsized as a satellite activity of New Cumberland. The activity will perform limited receipt, store and issue functions for Tobyhanna Army Depot. Personnel and infrastructure required at Tobyhanna will decrease.

- **Columbus:** The Columbus Distribution Depot gets closed in this proposal. Its storage and distribution functions will be performed by New Cumberland SDP.

- **DDSP Mechanicsburg Storage Site:** The Mechanicsburg storage location for DDSP, Susquehanna gets closed in this proposal.

**Region 2:** Boundaries are in the North-Delaware, Maryland, West Virginia, Kentucky; South-North Carolina; East-Virginia; West-Tennessee.

- **Norfolk:** The Norfolk Distribution Depot will be realigned and expanded to become a strategic distribution platform supporting customers in the East Central US. Its storage and distribution infrastructure get expanded and, depending on available infrastructure at Norfolk, this may require MILCON. Norfolk also picks up command and control of the satellite activities at Richmond and Cherry Point. Norfolk's assigned personnel also increase to handle the increased mission.

- **Richmond:** The Richmond DD gets realigned as a satellite activity of Norfolk SDP. The DD will continue its storage functions for hazardous materials and ozone-depleting substances.

- **Cherry Point:** The Cherry Point DD gets realigned and downsized as an activity of the Norfolk SDP. Personnel and infrastructure required at Cherry Point will decrease.

**Region 3:** Boundaries are in the North-South Carolina, Georgia, Alabama; South-Florida; East-Georgia; West-Mississippi.

- **Warner Robins:** The Warner Robins Distribution Depot will be realigned and expanded to become a strategic distribution platform supporting customers in the South Eastern US. Its storage and distribution infrastructure get expanded and, depending on available infrastructure at Warner Robins, this may require MILCON. Warner Robins also picks up command and control of the satellite activities at Anniston, Jacksonville, and Albany. Warner Robins’ assigned personnel also increase to handle the increased mission.

- **Anniston:** The Anniston DD gets realigned and downsized as a satellite activity of the Warner Robins SDP. Personnel and infrastructure required at Anniston will decrease.

- **Jacksonville:** The Jacksonville DD gets realigned and downsized as a satellite activity of the Warner Robins SDP. Personnel and infrastructure required at Jacksonville will decrease.

- **Albany:** The Albany DD gets realigned and downsized as a satellite activity of the Warner Robins SDP. Personnel and infrastructure required at Albany will decrease.

**Region 4:** Boundaries are in the North-Minnesota, North Dakota; South-Louisiana, Texas; East-Iowa, Missouri, Arkansas; West-Wyoming, Colorado, New Mexico.

- **Red River:** The Red River Distribution Depot will be realigned and expanded to become a strategic distribution platform supporting customers in the Central US. Its storage and distribution infrastructure get expanded and, depending on available infrastructure at Red River, this may require MILCON. Red River also picks up command and control of the satellite activities at Corpus Christi and Oklahoma City. Red River's assigned personnel also increase to handle the increased mission.

- **Corpus Christi:** The Corpus Christi DD gets realigned and downsized as a satellite activity of the Red River SDP. Personnel and infrastructure required at Corpus Christi will decrease.
## Registered Scenarios

**As Of:** 11/12/2004

- **Oklahoma City:** The Oklahoma City DD gets realigned and downsized as a satellite activity of the Red River SDP. Personnel and infrastructure required at Oklahoma City will decrease.

Region 5. Boundaries are in the North-Idaho, Montana; South-Arizona; East-Idaho, Utah; West-Washington, Oregon, California.

- **DDJC, San Joaquin:** San Joaquin remains a Strategic Distribution Platform supporting customers in the Western US and those permanently stationed across the Pacific. Additionally, San Joaquin picks up command and control of satellite activities at Barstow, San Diego, Puget Sound and Hill AFB.

- **Barstow:** The Barstow DD gets realigned and downsized as a satellite activity of the San Joaquin SDP. Personnel and infrastructure required at Barstow will decrease.

- **San Diego:** The San Diego DD gets realigned and downsized as a satellite activity of the San Joaquin SDP. Personnel and infrastructure required at San Diego will decrease.

- **Puget Sound:** The Puget Sound DD gets realigned and downsized as a satellite activity of the San Joaquin SDP. Personnel and infrastructure required at Puget Sound will decrease.

- **Hill AFB:** The Hill AFB DD gets realigned and downsized as a satellite activity of the San Joaquin SDP. Personnel and infrastructure required at Hill will decrease.

Realign: The following distribution depots will be realigned and downsized due to mission change, reduced storage and distribution requirements and reduced personnel with the establishment of the New Cumberland SDP. These distribution depots will become satellite activities of the regional SDP.

- Norfolk Distribution Depot
- Tobyhanna Distribution Depot will perform limited receipt, store and issue functions for Tobyhanna Army Depot.

Realign: Richmond Distribution Depot will be realigned and continue its storage functions for hazardous materials and ozone-depleting substances.

Close: The following distribution depot and activity will be closed due the establishment of Region 1 SDP.

- Columbus Distribution Depot mission will be moved to the New Cumberland SDP.
- Mechanicsburg activity site.

Region 2: Boundaries are in the North-North Carolina, Tennessee; South-Florida; East-South Carolina, Georgia; West-Mississippi.

- Warner Robins: The Warner Robins Distribution Depot will be realigned and expanded to become a SDP supporting customers in the South Eastern US. Its storage and distribution infrastructure expands and, depending on available infrastructure at Warner Robins, may require MILCON. Warner Robins also picks up command and control of the satellite activities at Cherry Point, Albany, Jacksonville, and Anniston. Warner Robins’ assigned personnel will also increase to accommodate the increased mission.

Realign: The following distribution depots will be realigned and downsized due to mission change, reduced storage and distribution requirements and reduced personnel with the establishment of Warner Robins SDP. These distribution depots will become satellite activities of the regional SDP.

- Cherry Point Distribution Depot
- Albany Distribution Depot
- Jacksonville Distribution Depot
- Anniston Distribution Depot

Region 3. Boundaries are in the North-North Dakota; South-Texas; East-Minnesota, Iowa, Missouri, Arkansas, Louisiana; West-Wyoming, Colorado, New Mexico.

- Red River: The Red River Distribution Depot will be realigned and expanded to become a SDP supporting customers in the Central US. Its storage and distribution infrastructure expands and, depending on available infrastructure at Red River, may require MILCON. Red River also picks up command and control of the satellite activities at Oklahoma City and Corpus Christi. Red River's assigned personnel also increase to accommodate the increased mission.

Realign: The following distribution depots will be realigned and downsized due to mission change, reduced storage and distribution requirements and reduced personnel with the establishment of Red River SDP. These distribution depots will become satellite activities of the regional SDP.

- Oklahoma Distribution Depot
- Corpus Christi Distribution Depot
**Registered Scenarios**

Region 4. Boundaries are in the North-Montana, Idaho; South-Arizona; East-Utah; West-Washington, California.

- San Joaquin: San Joaquin remains a SDP supporting customers in the Western US and those permanently stationed across the Pacific. No realignment is anticipated. Additionally, San Joaquin picks up command and control of satellite activities at Puget Sound, Hill AFB, Barstow, and San Diego.

Realignment: The following distribution depots will be realigned and downsized due to mission change, reduced storage and distribution requirements, and reduced personnel with the establishment of San Joaquin SDP. These distribution depots will become satellite activities of the regional SDP.

- Puget Sound Distribution Depot
- Hill Distribution Depot
- Barstow Distribution Depot
- San Diego Distribution Depot

**Scenario #**: S&S-0022  **Date Created**: 11/4/2004

**Scenario Title**: Privatize Storage and Distribution on Specific Commodities (Tires)

**Description**:
Privatizes the receipt, storage, issue, inspection, distribution, repair and disposal for all tires. Tires will be supported through a single designated vendor or a third party logistics arrangement. For this proposal, privatization means vendors perform storage and distribution functions from their facilities. Government facilities may be used by vendors only if leased or purchased. In either case, the Government infrastructure burden is reduced and requirements for personnel are also reduced.

The following Distribution Depots and Strategic Distribution Platforms are affected: Columbus, Tobyhanna, Susquehanna, Richmond, Norfolk, Cherry Point, Warner Robins, Albany, Jacksonville, Anniston, Corpus Christi, Red River, Oklahoma City, San Diego, Barstow, San Joaquin, Hill, and Puget Sound.

Consolidate Air Force wholesale Inventory Control Point (ICP) command and control operations at a single point/commander and align Technology Repair Centers, Commodity Councils, and Sources of Supply as fully as possible.

The ICPs affected by this scenario are Ogden Air Logistics Center (OO-ALC), Hill AFB, UT, Warner Robins Air Logistics Center (WR-ALC), Robins AFB, GA. Although there are exceptions, support is generally located as follows: cargo aircraft and helicopter support at WR-ALC, bomber and engine overhaul support at OC-ALC, fighter and attack aircraft support at OO-ALC, and secure (cryptologic) communication systems support at CPSG.

The AFMC sustainment model assigns and co-locates product support, supply chain management, and repair expertise for specific technology areas and aircraft types at our Air Logistics Centers. The intellectual capital resident in this arrangement has created a shared technical base at each ALC that efficiently supports requirements across the spectrum of sustainment disciplines. AFMC has experienced much recent sustainment success and plans to use it and the BRAC process as a springboard to achieve optimal organization of its already highly integrated supply chain, as follows:

(1) Where materiel management and commodity organic repair workload are not already aligned, achieve optimal alignment by moving the Source of Supply (SOS) to the ALC Technology Repair Center (TRC).

(2) Improve command & control of Air Force spares support by consolidating Inventory Control Point (ICP) command and control operations at a single point/commander, with the remaining functions consolidated to 3 sustainment wings at the ALCs.

(3) Solidify strategic supply chain sourcing via PSCM Commodity Councils to leverage our buying power among our major suppliers wherever possible. Solidification method is where commodity management, SOS, and TRC are not already aligned, achieve optimal alignment by moving SOS and/or TRC.

1) Inventory Control Points (ICPs) are responsible for performing a number of functions associated with material acquisition, distribution, and maintenance planning. ICP functions were categorized as either integrated material management functions (IMM) or Service “user” functions in the DMRD 926 ICP Consolidation Study, completed in 1990. Since some of the basic IMM functions are separated in this scenario, we will use different terms to differentiate the intent. “Consolidated ICP Functions” represents the command and control supply chain business functions such as policy, consolidation, prioritization, etc. “ALC Supply Chain Management Functions” represents the in-depth work done at the detailed (item/subsystem/system) level, such as the technical/engineering base, demand and supply planning, etc. For the purposes of this scenario, ICP is defined as ALL Air Force managed items (depot level repairables, consumables, and support equipment) and personnel responsible for the associated functions as listed below:

a) Consolidated ICP Functions. The consolidated ICP will perform:
• Centralized forecasting and budgeting for spare part re-procurement and repair requirements
• Develop prices
• Perform working capital fund financial management
• Distribute and prioritize deliveries of spares to users
• Manage assigned strategic supplier relationships
• Approve acquisition strategies of the Commodity Councils
• Develop readiness based inventory levels
• Orchestrate all supply chain operations.

b) ALC Supply Chain Management Functions. Supply chain management responsibilities, aligned under the new Combat Sustainment Wings at each ALC, will retain the item level management tasks:
• Operating Commodity Councils
• Contracting for the acquisition of materiel through purchase of new or repaired items
• Providing engineering and technical support (includes configuration management)
• Performing demand and supply planning. (includes requirements determination, war reserve requirements, maintenance management, material support to Depot Maintenance for General Support Division (GSD) items, Initial Supply Support Lists, provisioning, and budgeting/funding)
• Managing customer and supplier relations
• Managing assigned strategic supplier relationships
• Introducing items into the DOD catalog
• Processing requisitions and stock control
• Initiating actions to dispose of excess materiel
• Weapon System Secondary Item Supply Support

2) The ICP single commander provides the unity of command necessary to ensure spares are acquired and delivered to achieve Air Force weapon system availability targets at the lowest possible costs.

3) Commodity Councils, Material Support to Depot Maintenance for General Support Division (GSD) items, and other Purchasing and Supply Chain Management (PSCM) initiatives are considered to be part of the ICP.

4) This consolidation will reduce overhead overall by eliminating duplicative functions at the headquarters & ALCs. In pursuing efficiencies, personnel savings will be realized from consolidations of AFMC/LG and ALC/LG activities (drawdowns of management and functional oversight

Scenario Title: | Establish Joint Center of Excellence for Space Training

Description:
Realign Vandenberg, CA by establishing a Joint Center of Excellence for Space Training. Realign Dahlgren, VA, Redstone Army Depot, AL, Colorado Springs, CO by relocating Space Training taught there to Vandenberg, CA. The intent of this scenario is to consolidate like courses while maintaining service unique capabilities.

Reason Scenario was deleted
E&T JCSG approved for deletion from OSD Scenario tracking tool. Original scenario was strategy-based without course data. Space courses already consolidated under Interservice Review Organization (ITRO).

**Description:**

Realign Naval Station Norfolk, Marine Corps Base Quantico and Camp Lejeune by disestablishing the correctional facilities at Marine Corps Base Quantico, Naval Station Norfolk and Camp Lejeune and relocating the mission to a single Level II joint regional correctional facility to be located in Hampton Roads South.

Justification/Impact:
- Improves jointness, catalyst to creating a DoD correctional system with a single executive agent.
- Naval Station Norfolk (Year built-1972)/(FY02 inmate count-158); Marine Corps Base Quantico (Year built-1972)/(FY03 inmate count-46); Camp Lejeune (Year built-1969)/(FY02 inmate count-232). Used largest inmate count provided from Capacity Data FY01-03.
- Buildable acres available @ location in Chesapeake, Va.
- A 400 bed facility is required.

Potential Conflicts:
- Cultural: Fewer DoD-level correctional facilities amongst military departments.
- DON concern of 4-hour commute to Hampton Roads and MOA w/FBI/CIA. No MOA exists between Quantico and FBI/CIA per Heads Corrections (PSL) HQ, USMC.

Scenario Title:  MAH-MAH-0020: Relocate USA Space and Missile Defense Command (SMDC) Headquarters

Description:

Realign two leased space locations in Arlington, Virginia by relocating Headquarters components of USA Space and Missile Command to Redstone Arsenal.

Justification/Impact:
- Eliminates 27,000 USF of leased space.
- Enhances AT/FP.
- Consolidation of HQs from multiple to single locations eliminates redundancy.
- Affects approximately 161 personnel, as currently reported. Scenario estimates a 14% personnel savings as a result of consolidation, or 23 positions.
- SMDC has existing, large presence at Redstone Arsenal.
- Redstone Arsenal reports no vacant administrative space but sufficient land to accommodate over 30 million GSF of new administrative space.

Reason Scenario was deleted

Removed leased location in Huntsville, Alabama from scenario b/c determined SMDC no longer occupied. New scenario created.

Scenario #  IND-0010  Date Created:  10/15/2004
Scenario Title:  SR-4; Derivative A

Description:

This scenario assumes a DON scenario which moves a CVN Strike Group from San Diego to Hawaii, moves a CVN from Everett to Bremerton and a CV from Mayport to Norfolk. Everett would be closed and 3 DD/DDGs from Everett would move to San Diego. Also assumes the replacement carrier for USS KITTY HAWK (CV 63) upon her decommissioning comes from the East Coast. Pearl Harbor NSY&IMF partners with Puget Sound NSY or other nuclear carrier qualified workforce to perform the I-Level ship maintenance work for the carrier. To compensate for the additional carrier work performed at Pearl Harbor, this scenario moves some long-term submarine depot work from Pearl Harbor to Portsmouth NSY or to Puget Sound NSY&IMF or Norfolk NSY. Also assumes 2 FFGs move from Pascagoula to Mayport and SIMA and NAVSTA Pascagoula close. Also assumes 5 MCMs and 6 MHCs move from Ingleside to both Mayport and to San Diego and Ingleside closes. All associated intermediate-level ship maintenance work moves to the new ship locations.

<tr>
<td>Scenario Title:</td>
<td>Joint Training, Modeling and Simulation Center (JTMSC)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Description:**

- **Abstract:** Realign and consolidate Human Systems and Information Systems Technology DTAP activities in research, development and acquisition (R, D&A) for the subareas of modeling, simulation, training and cognitive sciences establishing a Joint Training, Modeling and Simulation Center (JTMSC) including relevant PEOs and PMs for training and mission rehearsal systems and their enabling information technologies.

- **Narrative:** JTMSC will be located in the geographic vicinity of the Joint Forces Command's Joint Training Analysis and Simulation Center (JTASC), Joint C4ISR Battle Center (JBC), and Joint Warfighting Center (JWC), Suffolk, Virginia. This Suffolk, VA site is positioned to enable the Joint C4 operational testing including the Joint Distributed Engineering Plant (JDEP). If a JFCOM site option is unavailable for this scenario, other reasonable site options for JTMSC in the Tidewater, Virginia area include Fort Eustis, Fort Monroe, Langley AFB, Norfolk Naval Base, Oceana Naval Air Station, Dam Neck Naval Station, or Little Creek Naval Base. The rationale for co-locating JTMSC with JTASC-JWC and the operational testing capability for C4 is the human-centered synergies of JTMSC with operators, trainers, testers, researchers and acquirers providing a continuum of expertise from science-to-D&A-to-testing into operational use. The target receiver site will be Joint Forces Command, N00066.

The end state of this scenario is to consolidate Army, Navy, Air Force, Marine Corps, OSD program offices (e.g., Advanced Distributed Learning (ADL) and Defense Modeling and Simulation) and Defense Agency RD&A expertise and requisite special equipment (e.g., simulators; computers, Tempest-secure facility for simulator suites, etc) to a single site in order to support "Training Transformation" by providing a) a consolidated center-of-mass for the science base of training systems and enabling models and simulations; b) ready access to active duty military personnel (i.e., current domain expertise and human subjects for research projects) and general domain experts for research and development providing a basis for efficient R&D project execution; c) enhance linkages to providers of Joint Training, Armed Forces staff education and relevant in-service technical training (e.g., school house and field) at operational military bases; and d) efficiencies in development and acquisition through consolidated Joint Program Management where applicable. Military Service platform-specific program offices would be attached to and collocated with JTMSC but would retain their command-and-control chain to the relevant Acquisition Executive.

- **Assumptions:**
  - This scenario would realign and consolidate training and simulation R, D&A to the JFCOM site in Suffolk, Virginia; however, if HS&A JCSC examines an alternate site for the JFCOM Suffolk activities for Force Protection, this scenario would "follow" the re-location of JTASC and JWC.
  - Unconfirmed UICs for the following activities reported under BRAC data calls:
    - ARI HQ, Washington, DC
    - ARI Detachments (e.g., Orlando, Fort Benning, Fort Monroe, Boise, Fort Rucker, Fort Knox, Fort Leavenworth, Fort Bragg)
    - Defense Modeling and Simulation Office (DMSO), Alexandria, VA
    - Advanced Distributed Learning Co-Laboratory, Alexandria, VA
    - Advanced Distributed Learning Co-Laboratory, Orlando, FL
    - DARPA
  - Close all DoD operations in the Orlando, Florida campus for training and simulation technology and relocate the following with equipment to the JTMSC.
  - Close all DoD operations in the Mesa, AZ and relocate the following with equipment to the JTMSC.
  - Realignment of FTEs and equipment reported under BRAC data calls for the subareas of training and cognitive sciences of the Human Systems DTAP area.

**Description:**

Abstract: Realign and co-locate the “Medical” Chemical Defense and “Non-Medical” Chemical and Biological Defense Research, Development and Acquisition (RDA) areas of BRAC-reported Chemical-Biological Defense DTAP activities to Aberdeen Proving Ground, Edgewood Area, MD.

Narrative: This scenario would consolidate, realign and relocate all service and DoD activities in “Medical” Chemical Defense and “Non-Medical” Chemical and Biological Defense Research, Development and Acquisition from the sites below to Aberdeen Proving Ground, Edgewood Area, MD.

The end state of this scenario is to consolidate Army, Navy, Air Force, Marine Corps, and Defense Agency medical chemical defense and non-medical chemical and biological defense RDA to a single site to form a National Center of Excellence. This center of CB Defense positions the Department of Defense to exploit a center-of-mass of scientific, technical, and acquisition expertise with the personnel necessary to provide defense against current and emerging chemical and biological warfare threats. This action completes earlier consolidations of military Service CB programs into a joint, co-located CB program.

Assumptions:
- Unable to confirm UICs for Defense Agencies
- Unable to confirm UIC for USAF Patrick AFB, 6

Action List: the following activities move from current locations to Aberdeen Proving Ground, Edgewood Area, MD.

| Description: | Abstract: Realign and consolidate to Ft Detrick, Frederick, MD the Medocal Biological Defense Subarea of BRAC-reported Chemical-Biological Defense DTAP activities in research, development and acquisition (RDA) 

This scenario consolidates, realigns and relocates all Service and DoD operations in medical biological defense research, development and acquisition from sites listed below to Ft. Detrick, MD. The end state of this scenario is to consolidate Army, navy, Air Force, Marine Corps, and Defense Agency medical biological defense RDA to a single site that has DoD's only capacity for Biosafety Level 4 research and development and has requisite "licensed medical product" acquisition expertise. This realignment and consolidation will position the DoD to exploit a center-of-mass of scientific, technical, medical acquisition, and medical product regulatory expertise and personnel in order to provide defense against current and emerging bio warfare threats. 

Assumptions: Could not confirm UICs for Defense Agencies |

#### Description:

Abstract: Co-locate all Chemical and Biological Defense Test and Evaluation (T&E) areas of BRAC-reported Chemical-Biological Defense (CBD) DTAP activities except those requiring ship-board evaluation to one military installation, Dugway Proving Ground, UT.

This scenario relocates all Service and DoD activities (excluding those requiring ship-board evaluation) in Chemical and Biological Defense T&E from the following sites to Dugway Proving Ground, UT. The end state of this scenario is to consolidate Army, Navy, Air Force, and Marine Corps Chemical and Biological Defense T&E to a single military CBD T&E site. This T&E center for CB Defense will position the Department of Defense to exploit synergy of service efforts with the considerable expertise and history of the T&E capabilities at Dugway Proving Ground. A single site for T&E will provide expert personnel necessary to provide rapid T&E for technologies needed to defend against current and emerging chemical and biological warfare threats. This action completes earlier consolidations of service CB programs into a joint co-located CB T&E program.

### Description:

Abstract: Realign and consolidate all Biomedical Development and Acquisition (D&A) activities to a single site, Army Fort Detrick, Frederick, Maryland.

Narrative: The scenario realigns the activities listed below to JBDAC to be located at the Army Fort Detrick, MD activity. The end state of this scenario is to consolidate Army, Navy, Air Force, Marine Corps and Defense Agency biomedical D&A activities to a single site. In order to support DoD-wide coordination of medical/force health protection and Joint Operating Concepts of the future, this scenario provides a consolidated center of mass for all defense biomedical D&A which optimizes use of critical military professional personnel, licensed medical product D&A expertise, and regulatory affairs infrastructure capability at US Army Medical Research and Materiel Command at Ft. Detrick. It also provides a consolidated D&A single point of contact for the medical logistics organizations of the Military Departments, already co-located at Ft. Detrick.

**Scenario #**  USA-0005  **Date Created:** 9/23/2004

**Scenario Title:** 39 Basic Training consolidation (Benning, Jackson, & Leonard Wood)

**Description:**

Reduce from 5 Basic Training locations (Fort Benning, Fort Knox, Fort Jackson, Fort Leonard Wood, & Fort Sill) to 3 locations: Fort Benning, Fort Jackson, & Fort Leonard Wood. Moves basic training functions from Fort Knox to Fort Benning and from Fort Sill to Fort Jackson.

**Reason Scenario was deleted**

BCT at Benning and Knox will be combined under the Maneuver Center proposals, which will reduce Basic Training at four locations. Moving BCT from Sill to Jackson does not make sense since OSUT will still take place at Sill.

Scenario Title: | MAH-MAH-0031 (U): Relocate Department of Defense Education Activity (DoDEA) | | |
Description: | Realign one leased location in Arlington, Virginia and close one leased location in Peachtree City, Georgia by consolidating DODEA at Location TBD(Base X). |
| | Justification/Impact: |
| | -Eliminates nearly 110,000 USF of leased space. |
| | -Affects 471 personnel. Scenario estimates a 14% personnel savings as a result of consolidation, or 66 positions. |
| | -Space required is 81,000 GSF (may be reduced if Civilian Personnel activity is removed) |
| | -Enhances AT/FP. |
| | -Consolidation of HQs from multiple to single locations eliminates redundancy and enhances efficiency |

Scenario Title:  Eliminate Base Level Supply Functions in Puget Sound, WA area

Description:

Eliminate base level supply, storage and distribution functions for most classes of supply in favor of expanded use of Government Commercial Purchase Card and / or Performance Based contracts. Eliminates inventories and renders obsolete the base-level supporting infrastructure for the classes of supply listed below (for some branches of service):

CLASS II     Extra Materials
CLASS III    Fuels, POL, Lubricants
CLASS IV    Construction Materials
CLASS IX    Repair Parts (Selected)

The following classes of supply have been excluded due to not having a base-level supply function:

CLASS I      Food
CLASS V     Explosives
CLASS VI    Comfort Materials
CLASS VII   Major end items
CLASS VIII  Medical
CLASS X     Nation Building

Personnel reductions, facility closure, inactivation and/or demolition can be immediately realized while providing acceptable levels of service and Customer Wait Time to regional customers at substantially reduced cost to individual installations.

Losing: Fort Lewis, NAS Whidbey Island, NAVSTA Everett, Naval Base Kitsap (formerly NAVSTA Bremerton and SUBASE Bangor), NUWC Keyport, STRATWEPFAC Silverdale, McChord AFB

Scenario Title: Consolidate base-level supply in areas with high density of installations (Hampton Roads, VA area)

Description:

Consolidates base-level supply, storage and distribution functions for all DOD installations in high density geographical clusters at a new or existing joint facility. Consolidates inventories and renders obsolete the base-level supporting infrastructure for the classes of supply listed below:

CLASS II Extra Materials  
CLASS III Fuels, POL, Lubricants  
CLASS IV Construction Materials  
CLASS IX Repair Parts (Selected)

The following classes of supply have been excluded due to having no base-level supply function:

CLASS VII Major end items  
CLASS VIII Medical  
CLASS X Nation Building

Personnel reductions, facility closure, inactivation and/or demolition can be immediately realized while providing acceptable levels of service and Customer Wait Time to regional customers at substantially reduced cost to individual installations.

Recommend beginning with analysis test cases focused on base-level supply, storage and distribution functions at selected DOD sites in Hampton Roads, VA and Puget Sound, WA with significant Army, Navy and Air Force installations to gather data and prove (or disprove) the concept on paper.

- Hampton Roads, VA: Supply, storage and distribution functions at the following activities are disestablished and their inventories are moved to an optimal site TBD.

Scenario Title: Outsource Wholesale Distribution

Description:

Outsource all distribution (transportation) related services in CONUS currently performed by Defense Distribution Depots. Services to be outsourced include traffic management of incoming and outgoing trucks and railcars, staging and physical loading of commercial vehicles, small parcel and freight terminal operations and the actual transportation of material to customers. Services to be outsourced also include freight planning and record keeping.

The Defense Distribution Depots to have transportation services outsourced total 18 and are: Columbus, Tobyhanna, Susquehanna, Richmond, Norfolk, Cherry Point, Warner Robins, Albany, Jacksonville, Anniston, Corpus Christi, Red River, Oklahoma City, San Diego, Barstow, San Joaquin, Hill, and Puget Sound.

Scenario Title: | Outsource Wholesale Storage and Distribution

Description:
Outsource the wholesale storage and distribution functions and processes supporting DOD. This proposal outsources all the storage and distribution functions currently performed by the CONUS network of DLA distribution depots and strategic distribution platforms. For this proposal, outsourcing means to have private industry perform these functions using their facilities, infrastructure and personnel. Government facilities could be used only if vendors agree to lease it or purchase it. The proposal reduces the infrastructure burden of DoD and allows for reductions in personnel.

The following Strategic Distribution Platforms and Defense Distribution Depots are affected by this proposal: Columbus, Tobyhanna, Susquehanna, Richmond, Norfolk, Cherry Point, Warner Robins, Albany, Jacksonville, Anniston, Corpus Christi, Red River, Oklahoma City, San Diego, Barstow, San Joaquin, Hill, and Puget Sound.

Scenario Title:  Defense Research Service Led Laboratories

Description:

This scenario realigns and consolidates the three service corporate laboratories. Additionally it creates a virtual “Defense Research Laboratory” by establishing a board of directors including Director of Defense Research and Engineering (DDRE), Technical Director of the Naval Research Laboratory (TD-NRL), Commanding Officer of Air Force Research Laboratory (CC-AFRL), Technical Director Army Research Laboratory (TD-ARL) and the Service S&T executives. The Board of Directors will advise and steer Research Labs to reduce duplicative efforts & foster joint centers of excellence. The purpose of this scenario is to consolidate to a smaller number of Service-centric geographic locations in order to increase the multidisciplinary collection of R&D expertise across DTAP capability areas at those locations.

The end state of this scenario will consolidate the Naval Research Laboratory to one primary location, the Army Research Laboratory to a maximum of two primary locations, and the Air Force Research Laboratory to a maximum of four locations. This scenario will provide Service Centric consolidated centers of mass for Science and Technology, with increased effectiveness and efficiencies.

**Scenario #** TECH-0010  
**Date Created:** 10/22/2004  
**Scenario Title:** Consolidate Extramural research Program managers

### Description:

Realign and Co-locate the following organizations at a Military Base in the National Capital Region. The purpose of this scenario is to move all portions of the following organizations located at the sites indicated. The end state of this scenario will be co-location of the organizations listed below at a single location. This “Joint Center of Excellence” will foster additional coordination among the extramural research activities of OSD and the MilDeps. Further it will enhance the Force Protection posture of the organizations by relocating them from leased space and onto a Military Base (TO #14).

This scenario would:

- Realign from the following UICs to JBESC, FTEs and equipment reported under BRAC Questions 3001-3005, 4277, 4279, and 4280 for all DTAP areas and functions:
  - Office of Naval Research, Arlington, VA, N00014
  - Defense Advanced Research Project Agency, Arlington VA
  - Defense Threat Reduction Agency – NCR, Alexandria, VA
  - Army Research Laboratory/Army Research Office, Durham, NC, W26203
  - Army Research Laboratory/Army Research Office, Arlington, VA, W26205
  - AFRL/AFOSR, Arlington, VA, FFFJH

- The following Military Bases in the NCR will be examined as receiving locations:
  - NAS Anacostia, Washington DC
  - Bolling AFB, Washington DC
  - Naval Research Lab, Washington DC, N000173
  - Fort Belvoir, Fort Belvoir, VA

Abstract: Realign and consolidate Battlespace Environments DTAP activities in research, development and acquisition (RDA) for the subareas of space, atmospheric and oceanographic sciences establishing a Joint Battlespace Environments Center (JBSEC) at the Stennis Space Center, Stennis, MS

Narrative: This scenario realigns and consolidates Battlespace Environments DTAP activities in research, development and acquisition (RDA) for the subareas of space, atmospheric and oceanographic sciences establishing a Joint Battlespace Environments Center (JBSEC). JBESC will be located at the Stennis Space Center, Stennis, MS and will be merged with existing battlespace environments organizations at Stennis. The research, development and acquisition focus of the JBESC will be the weather and oceanographic information systems used by all echelons (tactical, operational and strategic). This information is provided via software systems such as Air Force Weather Systems and Navy Metrological Systems. The R&D being consolidated is software systems centered and is inclusive of atmospheric and ocean science related to weather, software engineering, models and simulations, high performance computation, and mathematics. This multidisciplinary collection of R&D expertise and their resulting production information systems are essential for advancements in the Battlespace Environment Joint Functional Concept (CJCSI 3170.01c).

The end state of this scenario is to consolidate Army, Navy, Air Force, Marine Corps, and Defense Agency RDA expertise on to a single site with one of the four DoD High Performance Computing (HPC) Major Shared Resource Centers (MSRCs). In order to support Joint Functional Concepts and relevant Joint Operating Concepts of the future, this scenario provides a) a consolidated center-of-mass for the science base for theater weather, the enabling models and simulations, and predictive tools; b) ready access for research and development to a DoD high performance computing Major Shared Resource Center; and, c) efficiencies in development and acquisition through consolidated Joint Program Management where applicable.

Assumptions:
Could not confirm the UICs for the Defense Agencies

Action List: This scenario realigns the following Battlespace Environments DTAP activities in research, development and acquisition (RDA) for the subareas of space, atmospheric and oceanographic sciences to the Stennis Space Center.

Scenario Title: | 289 Close Selfridge Army Activities

Description:

Close USAG SANGB. Army disestablishes Garrison activities and realigns or disestablishes non JCGG functions. The Industrial, Technical, and HSA JCSGs realigns or disestablish their assigned functions.

This proposal would close the US Army Garrison-Michigan at Selfridge Air National Guard Base. The USAG-M is a federal land owner within the perimeter of Selfridge Air National Guard Base. The mission of USAG-M (Selfridge) is to provide base support, services and facilities to the Selfridge joint military community including housing, morale support, education, information technology, safety, transportation, quality of life, safety, environmental and recreational services, family services, child development, maintenance and repair, law enforcement, force protection, medical, dental, base exchange, commissary and religion. The joint community is home to units of all four branches of the military services as well as the US Coast Guard and the Border Patrol who either live, work or visit Selfridge Air National Guard Base. USAG-M is the primary provider of support and services to ALL military and DHS personnel and their dependents.

### Registered Scenarios

**Scenario #** USAF-0003

**Scenario Title:** Air Sovereignty/Air Defense

**Date Created:** 9/22/2004

**Description:**

Determine airfields and installations sufficient to support air sovereignty/air defense mission

Imperative: Basing to fulfill the air sovereignty protection site and air defense response criteria stipulated by COMNORTHCOM and COMPACOM
**Scenario #** USAF-0006  
**Date Created:** 9/22/2004  
**Scenario Title:** Realign A-10 Fleet

**Description:**
Realign/consolidate current A-10 force structure at as few locations as practicable using standard squadron sizes and crews, consistent with Mission Capabilities Indices and Future Total Force tenets.

**Principle:** Consolidate legacy fleet; ensures force available for AEF construct

### Losing Bases
- Bradley IAP AGS (Windsor Locks, CT) - Close
- Eielson AFB (Fairbanks, AK) - Realignment
- Martin State APT AGS (Baltimore, MD) - Realignment
- NAS New Orleans ARS (New Orleans, LA) - Realignment
- Pope AFB (Spring Lake, NC) - Close
- W. K. Kellogg APT AGS (Battle Creek, MI) - Realignment
- Willow Grove ARS, NAS Willow Grove Joint Reserve (Hatboro, PA) - Realignment

### Losing Activities
- A-10 Fighter Squadron - Relocate

### Receiving Bases
- Barksdale AFB (Bossier City, LA) - Receive
- Barnes MPT AGS (Westfield, MA) - Receive
- Boise Air Terminal AGS (Boise, ID) - Receive
- Davis-Monthan AFB (Tucson, AZ) - Receive
- Selfridge ANGB (Mount Clemens, MI) - Receive
- Whiteman AFB (Knob Noster, MO) - Receive

### Receiving Activities
- A-10 Fighter Squadron
### Registered Scenarios

**Scenario #** USAF-0007  
**Date Created:** 9/22/2004

**Scenario Title:** Realign F-16 Fleet

**Description:**

Realign/consolidate current F-16 force structure by block type to consolidate like block types at as few locations as practicable using standard squadron sizes and crews, consistent with Mission Capabilities Indices and Future Total Force tenants.

**Realign F-16 Fleet**

**Gaining Bases:** Hill AFB, Shaw AFB, Hancock Field, Burlington, Andrews AFB, Dannelly Field, Tulsa, Buckley AFB, Ft Worth, Kelly Annex, Ellington Field

**Losing Bases:** Cannon AFB, Luke AFB, Hector Field, Joe Foss Field, Duluth, Madison, Selfridge, Springfield-Beckley, Capital, Richmond, Mt Home AFB, Great Falls, Des Moines

**Principles:** Consolidate legacy fleet; Optimize squadron size; Ensures force available for AEF construct

### Losing Bases

- Cannon AFB (Clovis, NM) - Close
- Capital APT AGS (Springfield, IL) - Realignment
- Des Moines IAP AGS (Des Moines, IA) - Realignment
- Duluth IAP AGS (Duluth, MN) - Realignment
- Great Falls IAP AGS (Great Falls, MT) - Realignment

### Registered Scenarios

**Scenario #** USAF-0008  
**Date Created:** 9/22/2004

**Scenario Title:** Realign F-15 Fleet

**Description:**

Realign/consolidate current F-15C/D/E force structure to base like MDS capability at as few locations as practicable using standard squadron sizes and crews, consistent with Mission Capabilities Indices and Future Total Force tenants.

Gaining Bases:  
F-15A-D: Hickam AFB, Elmendorf AFB, Nellis AFB, Klamath Falls AGS, NAS New Orleans ARS, Jacksonville AGS, Atlantic Cit AGS;  
F-15E: Mt Home AFB

Losing Bases:  
F-15 A-D: Portland, Mt Home AFB, Lambert Field, Eglin AFB, Tyndall AFB, Langley AFB, Otis;  
F-15 E: Elmendorf AFB, Seymour Johnson AFB

**Principles:** Consolidate legacy fleet; Optimize squadron size; Ensures force available for AEF construct

Scenario #  USAF-0011  Date Created:  9/22/2004
Scenario Title:  Mission Compatibility Index - C2ISR

Description:

- Base C2ISR assets at the optimum number of installations based on MCI rating and theoretical capacity
- Principles: Primary determinant - MCI rating; Consolidate C2ISR assets
- Exceptions: If installation has consolidated MDS now, do not reduce

Scenario # USAF-0015  Date Created: 9/22/2004
Scenario Title: Mission Compatibility Index - Tankers
Description:

- Base at the optimum number of installations based on MCI rating and theoretical capacity
- Principles: Primary determinant - MCI rating; Optimize squadron size at 16 PAA (KC-135s)/12 15 PAA (KC-10)
- Must maintain proximity to deployment routes
**Scenario #**  USAF-0016  **Date Created:**  9/22/2004  

**Scenario Title:**  Mission Compatibility Index - UAV/UCAS  

**Description:**

- Base UAV/UCAS assets at the optimum number of installations based on MCI rating and theoretical capacity
- Principles: Primary determinant - MCI rating; Consolidate similar UAV/UCAS assets
- Preserve capacity required for post-2011 (UAV/UCAS) force structure
Scenario #  USAF-0017  
Date Created:  9/22/2004

Scenario Title: Geographic Co-location

Description:

Consider co-locating Total Force presence among multiple installations when locations are within proximity of each other

Principles: Primary determinant - Maintain/Place ARC units to meet the requirements of the Air Force at locations that meet the demographic and mission requirements unique to the ARC
