**211.273 Substitutions for military or Federal specifications and standards.**

**211.273-1 Definition.**

“SPI process,” as used in this section, is defined in the clause at 252.211-7005, Substitutions for Military or Federal Specifications and Standards.

**211.273-2 Policy.**

(a) Under the Single Process Initiative (SPI), DoD accepts SPI processes in lieu of specific military or Federal specifications or standards that specify a management or manufacturing process.

(b) DoD acceptance of an SPI process follows the decision of a Management Council, which includes representatives of the contractor, the Defense Contract Management Agency, the Defense Contract Audit Agency, and the military departments.

(c) In procurements of previously developed items, SPI processes that previously were accepted by the Management Council shall be considered valid replacements for military or Federal specifications or standards, absent a specific determination to the contrary.

**211.273-3 Procedures.**

Follow the procedures at PGI 211.273-3 for encouraging the use of SPI processes instead of military or Federal specifications and standards.

**211.273-4 Contract clause.**

Use the clause at 252.211-7005, Substitutions for Military or Federal Specifications and Standards, in solicitations and contracts exceeding the micro-purchase threshold, when procuring previously developed items.

**211.274 Item identification and valuation requirements.**

**211.274-1 General.**

Unique item identification and valuation is a system of marking and valuing items delivered to DoD that will enhance logistics, contracting, and financial business transactions supporting the United States and coalition troops. Through unique item identification policy, which capitalizes on leading practices and embraces open standards, DoD can—

- (a) Achieve lower life-cycle cost of item management and improve life-cycle property management;
- (b) Improve operational readiness;
- (c) Provide reliable accountability of property and asset visibility throughout the life cycle; and
- (d) Reduce the burden on the workforce through increased productivity and efficiency.

**211.274-2 Policy for unique item identification.**

(a) It is DoD policy that DoD unique item identification, or a DoD recognized unique identification equivalent, is required for—

(1) All delivered items for which the Government's unit acquisition cost is \$5,000 or more;

(2) Items for which the Government's unit acquisition cost is less than \$5,000, when identified by the requiring activity as serially managed, mission essential, or controlled inventory;

(3) Items for which the Government's unit acquisition cost is less than \$5,000, when the requiring activity determines that permanent identification is required; and

(4) Regardless of value—

(i) Any DoD serially managed subassembly, component, or part embedded

within a delivered item; and

(ii) The parent item (as defined in 252.211-7003(a)) that contains the embedded subassembly, component, or part.

(b) *Exceptions.* The Contractor will not be required to provide DoD unique item identification if—

(1) The items, as determined by the head of the agency, are to be used to support a contingency operation or to facilitate defense against or recovery from nuclear, biological, chemical, or radiological attack; or

(2) A determination and findings has been executed concluding that it is more cost effective for the Government requiring activity to assign, mark, and register the unique item identification after delivery of an item acquired from a small business concern or a commercial item acquired under FAR Part 12 or Part 8.

(i) The determination and findings shall be executed by—

(A) The Component Acquisition Executive for an acquisition category (ACAT) I program; or

(B) The head of the contracting activity for all other programs.

(ii) The DoD Unique Item Identification Program Office must receive a copy of the determination and findings required by paragraph (b)(2)(i) of this subsection. Send the copy to DPAP, SPEC ASST, 3060 Defense Pentagon, 3E1044, Washington, DC 20301-3060; or by facsimile to (703) 695-7596.

#### **211.274-3 Policy for valuation.**

(a) It is DoD policy that contractors shall be required to identify the Government's unit acquisition cost (as defined in 252.211-7003(a)) for all items delivered, even if none of the criteria for placing a unique item identification mark applies.

(b) The Government's unit acquisition cost is—

(1) For fixed-price type line, subline, or exhibit line items, the unit price identified in the contract at the time of delivery;

(2) For cost-type or undefinitized line, subline, or exhibit line items, the contractor's estimated fully burdened unit cost to the Government at the time of delivery; and

(3) For items delivered under a time-and-materials contract, the contractor's estimated fully burdened unit cost to the Government at the time of delivery.

(c) The Government's unit acquisition cost of subassemblies, components, and parts embedded in delivered items need not be separately identified.

**211.274-4 Policy for item unique identification of Government property.**

(a) It is DoD policy that DoD item unique identification, or a DoD-recognized unique identification equivalent, is required for tangible personal property in accordance with 211.274-2, for items—

(1) In the possession of the Government and furnished to a contractor for the performance of a contract; or

(2) Directly acquired by the Government and subsequently furnished to a contractor for the performance of a contract.

(a) *Definitions.* As used in this clause—

“Advance shipment notice” means an electronic notification used to list the contents of a shipment of goods as well as additional information relating to the shipment, such as order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment.

“Bulk commodities” means the following commodities, when shipped in rail tank cars, tanker trucks, trailers, other bulk wheeled conveyances, or pipelines:

- (1) Sand.
- (2) Gravel.

(5) Coal or combustibles such as firewood.

(6) Agricultural products such as seeds, grains, or animal feed.

“Case” means either a MIL-STD-129 defined exterior container within a palletized unit load or a MIL-STD-129 defined individual shipping container.

“Electronic Product Code™ (EPC)” means an identification scheme for universally identifying physical objects via RFID tags and other means. The standardized EPC data consists of an EPC (or EPC identifier) that uniquely identifies an individual object, as well as an optional filter value when judged to be necessary to enable effective and efficient reading of the EPC tags. In addition to this standardized data, certain classes of EPC tags will allow user-defined data. The EPC tag data standards will define the length and position of this data, without defining its content.

“EPCglobal™” means a joint venture between EAN International and the Uniform Code Council to establish and support the EPC network as the global standard for immediate, automatic, and accurate identification of any item in the supply chain of any company, in any industry, anywhere in the world.

“Exterior container” means a MIL-STD-129 defined container, bundle, or assembly that is sufficient by reason of material, design, and construction to protect unit packs and intermediate containers and their contents during shipment and storage. It can be a unit pack or a container with a combination of unit packs or intermediate containers. An exterior container may or may not be used as a shipping container.

“Palletized unit load” means a MIL-STD-129 defined quantity of items, packed or unpacked, arranged on a pallet in a specified manner and secured, strapped, or fastened on the pallet so that the whole palletized load is handled as a single unit. A palletized or skidded load is not considered to be a shipping container. A loaded 463L System pallet is not considered to be a palletized unit load. Refer to the Defense Transportation Regulation, DoD 4500.9-R, Part II, Chapter 203, for marking of 463L System pallets.

“Passive RFID tag” means a tag that reflects energy from the reader/interrogator or that receives and temporarily stores a small amount of energy from the reader/interrogator signal in order to generate the tag response.

(1) Until February 28, 2007, the acceptable tags are—

(i) EPC Class 0 passive RFID tags that meet the EPCglobal Class 0 specification; and

(ii) EPC Class 1 passive RFID tags that meet the EPCglobal Class 1 specification. This includes both the Generation 1 and Generation 2 Class 1 specifications.

(2) Beginning March 1, 2007, the only acceptable tags are EPC Class 1 passive RFID tags that meet the EPCglobal Class 1 Generation 2 specification. Class 0 and Class 1 Generation 1 tags will no longer be accepted after February 28, 2007.

(b)(1) Except as provided in paragraph (b)(2) of this clause, the Contractor shall affix passive RFID tags, at the case and palletized unit load packaging levels, for shipments of items that—

(c) The Contractor shall—

(1) Ensure that the data encoded on each passive RFID tag are unique (i.e., the binary number is never repeated on any and all contracts) and conforms to the requirements in paragraph (d) of this clause;

(2) Use passive tags that are readable; and

(3) Ensure that the passive tag is affixed at the appropriate location on the specific level of packaging, in accordance with MIL-STD-129 (Section 4.9.2) tag placement specifications.

(d) *Data syntax and standards.* The Contractor shall encode an approved RFID tag using the instructions provided in the EPC™ Tag Data Standards in effect at the time of contract award. The EPC™ Tag Data Standards are available at <http://www.epcglobalinc.org/standards/>.

“Acquisition cost,” for Government-furnished property in the possession of the Contractor (PIPC), means the amount identified in the contract, or in the absence of such identification, the fair market value. For property acquired or fabricated by the Contractor as Contractor-acquired PIPC, and subsequently transferred or delivered as Government-furnished PIPC, it is the original acquisition cost.

“Concatenated unique item identifier” means—

(1) For items that are serialized within the enterprise identifier, the linking together of the unique identifier data elements in order of the issuing agency code, enterprise identifier, and unique serial number within the enterprise identifier; or

(2) For items that are serialized within the original part, lot, or batch number, the linking together of the unique identifier data elements in order of the issuing agency code; enterprise identifier; original part, lot, or batch number; and serial number within the original part, lot, or batch number.

“DoD recognized unique identification equivalent” means a unique identification method that is in commercial use and has been recognized by DoD. All DoD recognized unique identification equivalents are listed at <http://www.acq.osd.mil/dpap/UID/equivalents.html>.

“Equipment” means a tangible item that is functionally complete for its intended purpose, durable, nonexpendable, and needed for the performance of a contract. Equipment is not intended for sale, and does not ordinarily lose its identity or become a component part of another article when put into use.

“Item unique identification (IUID)” means a system of assigning, reporting, and marking DoD property in the possession of the Contractor with unique item identifiers that have machine-readable data elements to distinguish an item from all other like and unlike items.

“IUID Registry” means the DoD data repository that receives input from both industry and Government sources and provides storage of, and access to, data that identifies and describes tangible Government personal property, including property in the possession of the Contractor.

“Material” means property that may be consumed or expended during the performance of a contract, component parts of a higher assembly, or items that lose their individual identity through incorporation into an end item. Material does not include equipment, special tooling, or special test equipment.

“Parent item” means the item assembly, intermediate component, or subassembly that has an embedded item with a unique item identifier or DoD recognized unique identification equivalent.

“Property in the possession of the Contractor (PIPC)” means tangible personal property, to which the Government has title, that is in the stewardship or possession of, or is controlled by, the Contractor for the performance of a contract. PIPC consists of both tangible Government-furnished property and Contractor-acquired property and includes equipment and material.

“Unique item identifier (UII)” means a set of data elements marked on items that is globally unique and unambiguous.

“Virtual UII” means the data elements for an item that have been captured in the IUID Registry, but have not yet been physically marked on an item with a DoD compliant 2D data matrix symbol.

(b) *Procedures for assigning and registering.*

(1) The Contractor shall provide IUID data for the IUID Registry for all Government-furnished PIPC requiring DoD unique identification under this contract, including Government-furnished PIPC located at subcontractor and alternate locations.

(2) Unless the Government provides the UII, the Contractor shall establish a concatenated UII or a DoD recognized unique identification equivalent for—

(i) Government-furnished PIPC with a unit acquisition cost of \$5,000 or more; and

(ii) The following items of Government-furnished PIPC for which the unit acquisition cost is less than \$5,000:

Contract Line, Subline, or Exhibit Line Item Number (if applicable)	Item Description
---	------------------

---

---

---

(3) Virtual UIIs may be assigned by the Contractor for existing Government-furnished PIPC requiring item unique identification, if the property can be accurately and uniquely identified using existing innate serialized identity until an event occurs requiring physical marking with the DoD compliant 2D data matrix.

(4) The Contractor shall assign and register a UII and the master item data for any subassembly, component, or part that does not have an existing UII when it is removed from a parent item and remains with the Contractor as a stand-alone item.

(5) Contractor-acquired PIPC is excluded from the IUID Registry. The Contractor shall report to the IUID Registry as Government-furnished PIPC any Contractor-acquired PIPC that—

(i) Is delivered to the Government; or

(ii) Is transferred by contract modification or other contract provision/requirement to another contract (including items that are transferred in place).

(6) If the initial transfer of Contractor-acquired PIPC is a delivery to DoD, the requirements of the Item Identification and Valuation clause of this contract (DFARS

(3) When an item cannot be physically marked or tagged due to a lack of available space to mark identifying information or because marking or tagging would have a deleterious effect, the Contractor shall—

(i) Attach to the item a tag that has the identifying information marked on the tag;

(ii) Mark the parent item with the DoD compliant 2D data matrix symbol, if feasible; and

(iii) Update the IUID Registry to indicate that the tagged or bagged UII item has become an embedded item within the parent item.
