

If ongoing responsibility for medicals was imposed, demonstrated or accepted from the date of “settlement” through the life of the beneficiary or life of the injury, we may review and approve a proposed amount to be paid as an upfront lump sum payment for the full amount of the calculated cost for all related future medical care. This option would generally apply in workers’ compensation, no-fault insurance situations or when life-time medicals are imposed by law. In effect, this option may be used in place of administering a MSA if we have reviewed and approved a proposed MSA amount. We solicit comment on how to develop this process, the efficacy of it, and whether it would be utilized.

b. If Ongoing Responsibility for Medicals was Not Imposed, Demonstrated or Accepted.

If a beneficiary obtains a “settlement,” our general rule stated previously applies to the “settlement,” and ongoing responsibility for medicals has not been imposed on, demonstrated by or accepted by the defendant, the beneficiary may elect to make an upfront payment to Medicare in the amount of a specified percentage of “beneficiary proceeds.” This option would most often apply in liability insurance (including self-insurance situations, primarily due to policy caps. For the purposes of this option, the term “beneficiary proceeds” would be calculated by subtracting from the total “settlement” amount attorney fees and procurement costs borne by the beneficiary, Medicare’s demand amount (for conditional payments made by Medicare), and certain additional medical expenses the beneficiary paid out of pocket. Such additional medical expenses are specifically limited to items and services listed in 26 U.S.C. 213(d)(1)(A) through (C) and 26 U.S.C. 213(d)(2). The calculation of beneficiary proceeds does not include medical expenses paid by, or that are the responsibility of, a source other than the beneficiary. We specifically solicit comment on how to develop this process, its efficacy, and whether it would be utilized. We further request comment on the calculation of beneficiary proceeds, the appropriate percentage(s) to be used, and how the percentage(s) is/are justified.

Option 7. The Beneficiary Obtains a Compromise or Waiver of Recovery.

If the beneficiary obtains either a compromise or a waiver of recovery, Medicare would have the discretion to not pursue future medicals related to the specific “settlement” where the compromise or waiver of recovery was granted. If the beneficiary obtains

additional “settlements,” Medicare would review the conditional payments it made and adjust its claim for past and future medicals accordingly. We specifically solicit comment on whether this approach is practical and usable, as it relates to “future medicals.”

Again, we also solicit comment on additional options we may consider in order to provide workable solutions for beneficiaries with respect to resolving “future medicals” obligations.

IV. Collection of Information Requirements

This document does not impose information collection and recordkeeping requirements. Consequently, it need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995.

SUPPLEMENTARY INFORMATION:

I. Background

The contract clause at DFARS 252.211-7003, Item Identification and Valuation, requires unique identification for all delivered items for which the Government’s unit acquisition cost is \$5,000 or more and for other items designated by the Government. In addition, the clause requires identification of the Government’s unit acquisition cost for all delivered items, and provides

instructions to contractors regarding the identification and valuation processes.

This proposed rule revises the prescription and the clause at DFARS 252.211–7003 to update and clarify instructions for the identification and valuation processes. The changes include—

- Adding definitions for data matrix and type designation;
- Specifically addressing item unique identification requirements for items with warranty requirements; DoD serially managed items, and special tooling or special test equipment;
- Clarifying of data submission requirements for a Major Defense Acquisition Program; and,
- Adding an alternative data submission method using either hard copy or a wide-area-workflow attachment.

II. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

III. Regulatory Flexibility Act

DoD does not expect this proposed rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the changes being made do not increase the burden of the item unique identification requirements, nor do they cause the requirement to be applicable to any additional small businesses. However, an initial regulatory flexibility analysis has been performed and is summarized as follows:

The proposed changes are being made to refine the language of the regulations and update the clause and prescription to comply with existing item unique identification policy. This DFARS case also adds reporting requirements for special tooling and special test equipment, warranty, and type designation, updates text to describe the

reason for the policy, clears up language that has been confusing in practice, and adds an alternative method of data submission using either hard copy or a wide-area-workflow attachment. It also eliminates Alternate I of DFARS 252.211–7003, which cites reporting requirements covered by other mechanisms.

This rule will apply to small businesses involved in manufacturing. There are currently 1,495 small businesses registered in the Item Unique Identification Registry, out of 2,431 total companies registered. The changes made by this rule will not affect the number of businesses required to be registered in the Item Unique Identification Registry.

This rule does not add any new information collection requirements as it only clarifies existing requirements.

The rule does not duplicate, overlap, or conflict with any other Federal rules.

No alternatives were determined that will accomplish the objectives of the rule.

DoD invites comments from small business concerns and other interested parties on the expected impact of this rule on small entities.

DoD will also consider comments from small entities concerning the existing regulations in subparts affected by this rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610 (DFARS Case 2011–D055), in correspondence.

IV. Paperwork Reduction Act

This rule does not add any new information collection requirements that require the approval of the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. chapter 35) beyond those already covered by OMB Control Numbers 0704–0246 and 0704–0248. OMB Control Number 0704–0246, titled “Defense Federal Acquisition Regulations Supplement (DFARS) Part 245, Government Property, related clauses in DFARS 252, and related forms in DFARS 253,” which includes information collection requirements for DFARS subpart 211.274. OMB Control Number 0704–0248, titled “Defense Federal Acquisition Regulations Supplement (DFARS) Appendix F, Material Inspection and Receiving Report and related forms,” which covers all information submitted through the Wide Area Workflow system.

[Docket No. 120416007-2150-01]

RIN 0648-BB67

Fisheries of the Exclusive Economic Zone Off Alaska; Monitoring and Enforcement Requirements in the Bering Sea and Aleutian Islands Freezer Longline Fleet

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS issues a proposed rule that would modify equipment and operational requirements for freezer longliners (catcher/processors) named on License Limitation Program (LLP) licenses endorsed to catch and process Pacific cod at sea with hook-and-line gear in the Bering Sea and Aleutian Islands Management Area (BSAI). If approved, the proposed regulations would require vessel owners to select between two monitoring options: carry two observers so that all catch can be sampled, or carry one observer and use a motion-compensated scale to weigh Pacific cod before it is processed. The selected monitoring option would be required to be used when the vessel is operating in either the BSAI or Gulf of Alaska groundfish fisheries when directed fishing for Pacific cod is open in the BSAI, or while the vessel is fishing for groundfish under the Western Alaska Community Development Quota (CDQ) Program. A vessel owner who notifies NMFS that the vessel will not be used to conduct directed fishing for Pacific cod in the BSAI or to conduct groundfish CDQ fishing at any time during a particular year would not be required to select one of the monitoring options and would continue to follow observer coverage and catch reporting requirements that apply to catcher/processors not subject to this proposed action. These regulatory amendments address the need for enhanced catch accounting, monitoring, and enforcement created by the formation of a voluntary cooperative by the BSAI longline catcher/processor subsector in 2010, and are necessary to improve the precision of the accounting for allocated quota species. This action is intended to promote the goals and objectives of the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area, the Fishery Management Plan for Groundfish of the Gulf of Alaska, the Magnuson-Stevens Fishery Conservation and Management Act, and other applicable laws.
