**FPDS Ad Hoc Reports – Competitive Procedures but Only One Offer**

Instructions for running ad hoc FPDS reports to determine those actions and obligations where competitive procedures were used, but ‘effective competition’, described by DPAP memo as receiving more than one offer, were not achieved. In order to identify all the possible types of these actions correctly, five ad hoc reports must be run. Please note that organizations with a very high number of actions per year may need to run the reports by quarters or months in order to fit into the row restrictions of the ad hoc reports.

If you are unfamiliar with the ad hoc reports feature within FPDS or how to design the reports, please contact your office or agency system administrator.

1. **Contracts and Purchase Orders (All Actions)**

This report identifies contracts and purchase orders where competitive procedures (full and open competition, full and open competition after exclusion of sources, and competed under SAP) were used, but only one offer was received.
