SUBJECT: Procurement Integrated Enterprise Environment 6.0.0 Release

This memorandum announces the Procurement Integrated Enterprise Environment (PIEE) 6.0.0 release deployed June 24, 2019. This release impacts the following enterprise-wide capabilities:

- Electronic Document Access (EDA). The EDA system has been rebranded as the Electronic Data Access (EDA) module of PIEE and is the enterprise-wide source for electronic distribution of contract documents and contract data per DFARS 204.270. EDA is a technical refresh for this 20 year old system. Basic functionality within EDA remains the same, however, the underlying technology for the user interface and for reporting and storage have been upgraded.
- Contracting Officer Representative Tracking (CORT) Tool has been reengineered into two modules that meets the requirements of DFARS 201.602-2, PGI 201.602-2, DoDI 5000.72 and DoD COR Handbook.
 - Joint Appointment Module (JAM) is the enterprise-wide module for executing the nomination and appointment functions in a web-based application designed to improve management of official appointments impacting enterprise-wide procurement systems and procurement related appointments.
 - Surveillance and Performance Monitoring (SPM) is the enterprise-wide module for executing COR monitoring functions in a web-based application that facilitates management, oversight, surveillance, and performance monitoring of service contracts. Access to both applications is granted through SPM.

Also included in the PIEE 6.0.0 release is the enhancement for Government Purchase Cardholder (GPC) roles to be available for nomination and appointment in JAM. Please
