HAEMAPHYSALIS LONGICORNIS (EAST ASIAN TICK) MONITORING

1. The East Asian tick, *Haemaphysalis longicornis*, was first detected in the United States at a New Jersey farm in November 2017. Since this initial discovery, the tick has been identified in West Virginia, Virginia, and Arkansas with additional states implementing surveillance efforts.
2. The East Asian tick is native to Japan, China, Korea, and Russia where it is a known or suspected vector of several viral, bacterial and protozoan pathogens of animal and human diseases. It has become a major invasive pest of cattle in New Zealand, Australia and several Pacific islands. The potential public health impact of the East Asian tick in the United States is undetermined at this time.
3. The Armed Forces Pest Management Board (AFPMB) recommends that tick surveillance programs should be implemented at installations in regions where tick-borne disease is prevalent in accordance with service specific guidance. Contact the following service organizations for sampling procedures, processing instructions and permits
 - a. Army Public Health Command (APHC) – Human Tick Testing Program (410) 436-5421 or email usarmy.apg.medcom-aphc.mbx.tickcom@mail.mil.
<https://phc.amedd.army.mil/topics/envirohealth/epm/Pages/HumanTickTestKitProgram.aspx>.
 - b. U.S. Air Force School of Aerospace Medicine (USAFSAM) – Medical Entomology Lab. Please contact Dr. Leah Colton (937) 938-3078, leah.colton@us.af.mil. AFMS Knowledge Exchange website:
https://kx2.afms.mil/kj/kx7/PublicHealth/Documents/Entomology/Sending%20Samples%20to%20the%20USAFSAM%20Medical%20Entomology%20Laboratory_May%202018.pdf.
 - c. Navy and Marine Corps Public Health Center - Preventive Medicine Directorate. Please contact LCDR James Dunford at commercial (757) 953-0756 or email at james.c.dunford.mil@mail.mil.
4. Information concerning installation tick management procedures may be found in installation pest and natural resource management plans.
5. General tick biology, surveillance, prevention, control and distribution information can be obtained at the following websites:
